RE: Compliance with CIPA requirements

This memo is to serve as evidence to prove Mid-America Technology Center, was, is, and will be in compliance with the requirements of the CIPA. The district employs an Internet content filter firewall known in brand as Untangle and it filters at all points of Internet connectivity. This firewall uses active service/customized database entries, keyword search, and category filtering/blocking methods. Mid-America Technology Center enforces an Internet usage policy that is approved by the district's board of education.

A handwritten signature in black ink that reads "Kenneth R. Stull". The signature is written in a cursive style with a large initial 'K' and a distinct 'R'.
