

Schuyler Community Schools
Board of Education Regular Meeting
Monday, November 11, 2024 6:30 PM
Schuyler Community Schools Board Room
2023 Colfax Street
Schuyler, NE 68661

- I. Opening the Meeting
- II. Call to Order
- III. District Mission Statement
- IV. Nebraska Open Meetings Law
- V. Publication of Meeting
- VI. Board Member Roll Call
- VII. Pledge of Allegiance
- VIII. Approval of Agenda
- IX. Consent Agenda
- IX.A. Minutes of the October 14, 2024 meeting of the board
- IX.B. Financial Report
- IX.C. Resignations:
 - IX.C.1. Resignation of Lisa Lubken - special education teacher
- X. Public Comment
- XI. Discussion/Information Items
 - XI.A. Presentation on the new science standards that were adopted by the State Board of Education.
 - XI.B. 2024 Financial Literacy Status Report as required by Neb. Statute 79-3004
- XII. Action Items
 - XII.A. Recognition of State Qualifiers and Academic All-State Students - Girls Cross Country Team and Coaches
 - Madalyn Mendez
 - Arantza Catalan
 - Gabriela Rodriguez
 - Sinai Sanchez
 - Miriam Deanda
 - Alyza Arroyo
 - Coaches Adam Robinson and Mike Baptiste
 - XII.B.
 - XII.C. Recognition of NMEA All-State Band Student
 - Omar Barrios - 1st Chair Trumpet
 - Band Instructor - Morgan Semerad
 - XII.D.
 - XII.E. NCPA Academic All-State
 - XII.F. Softball Sofia Yopez

- XII.G. Lauren Wemhoff
- XII.H.
- XII.I. Boys Cross Country Joarcy Sanchez
- XII.J. Jairo Aguilar
- XII.K.
- XII.L. Girls Cross Country Madalyn Mendez
- XII.M. Linda Sebastian
- XII.N.
- XII.O. Volleyball Lizbeth Hernandez
- XII.P. Bela Jedlicka
- XII.Q.
- XII.R. Play Production Jasminlett Bernal
- XII.S. Jason Barrios
- XII.T.
- XII.U. Believers and Achievers
- XII.V. Allison Vavricek
- XII.W. Alexander Aldana
- XII.X. Addison Vavricek
- XII.Y. Enter into an agreement with the City of Schuyler for an SRO (School Resource Officer).

XIII. Information Items: Reports

- XIII.A. Building/District Administrators
 - XIII.A.1. The building principals will report on any schedule adjustments being made in preparation for the second semester.
- XIII.B. Superintendent
 - XIII.B.1. Superintendent's Evaluation
 - XIII.B.2. Update on negotiations with Schuyler Education Association
- XIII.C. Board Committee Reports
 - XIII.C.1. Congratulations to Renee Sayer, Amanda Jedlicka, and Paul Pleskach on their decisive victory for Schuyler Board of Education.
 - XIII.C.2. **Board Committee Meetings**

October 23rd @ 6:00 Budget/Finance/Negotiations (meet in preparation for negotiations)

October 23rd @ 6:30 Negotiations Meeting #1

Monday, November 4th @ 5:30 Board Policy/Handbooks/Support Programs

Monday, November 4th @ 6:30 Building/Grounds/Transportation

Wednesday, November 6th, @ 5:30 American Civics, Assessment and Instruction

- XIII.D. Schuyler Community Schools Foundation Report
- XIII.E. Student Council Board Report
- XIV. Adjourn

Prepared by: Christina Bywater, Secretary to the Board

NEBRASKA OPEN MEETINGS ACT

84-1407. Act, how cited.

Sections 84-1407 to 84-1414 shall be known and may be cited as the Open Meetings Act.

Source: Laws 2004, LB 821, § 34.

84-1408. Declaration of intent; meetings open to public.

It is hereby declared to be the policy of this state that the formation of public policy is public business and may not be conducted in secret.

Every meeting of a public body shall be open to the public in order that citizens may exercise their democratic privilege of attending and speaking at meetings of public bodies, except as otherwise provided by the Constitution of Nebraska, federal statutes, and the Open Meetings Act.

Source: Laws 1975, LB 325, § 1; Laws 1996, LB 900, § 1071; Laws 2004, LB 821, § 35.

Annotations

- Nebraska's public meetings laws do not apply to school board deliberations pertaining solely to disputed adjudicative facts. *McQuinn v. Douglas Cty. Sch. Dist. No. 66*, 259 Neb. 720, 612 N.W.2d 198 (2000).
- The primary purpose of the public meetings law is to ensure that public policy is formulated at open meetings. *Marks v. Judicial Nominating Comm.*, 236 Neb. 429, 461 N.W.2d 551 (1990).
- The public meetings law is broadly interpreted and liberally construed to obtain the objective of openness in favor of the public, and provisions permitting closed sessions must be narrowly and strictly construed. *Grein v. Board of Education of Fremont*, 216 Neb. 158, 343 N.W.2d 718 (1984).
- Although a committee was a subcommittee of a natural resources district board, it was not subject to the Open Meetings Act because there was never a quorum of board members in attendance and the committee did not hold hearings, make policy, or take formal action on behalf of the board. *Koch v. Lower Loup NRD*, 27 Neb. App. 301, 931 N.W.2d 160 (2019).
- A county board of equalization is a public body whose meetings shall be open to the public. *Wolf v. Grubbs*, 17 Neb. App. 292, 759 N.W.2d 499 (2009).

84-1409. Terms, defined.

For purposes of the Open Meetings Act, unless the context otherwise requires:

(1)(a) Public body means (i) governing bodies of all political subdivisions of the State of Nebraska, (ii) governing bodies of all agencies, created by the Constitution of Nebraska, statute, or otherwise pursuant to law, of the executive department of the State of Nebraska, (iii) all independent boards, commissions, bureaus, committees, councils, subunits, or any other bodies created by the Constitution of Nebraska, statute, or otherwise pursuant to law, (iv) all study or advisory committees of the executive department of the State of Nebraska whether having continuing existence or appointed as special committees with limited existence, (v) advisory committees of the bodies referred to in subdivisions (i), (ii), and (iii) of this subdivision, and (vi) instrumentalities exercising essentially public functions; and

(b) Public body does not include (i) subcommittees of such bodies unless a quorum of the public body attends a subcommittee meeting or unless such subcommittees are holding hearings, making policy, or taking formal action on behalf of their parent body, except that all meetings of any subcommittee established under section 81-15,175 are subject to the Open Meetings Act, (ii) entities conducting judicial proceedings unless a court or other judicial body is exercising rulemaking authority, deliberating, or deciding upon the issuance of administrative orders, and (iii) the Judicial Resources Commission or subcommittees or subgroups of the commission;

(2) Meeting means all regular, special, or called meetings, formal or informal, of any public body for the purposes of briefing, discussion of public business, formation of tentative policy, or the taking of any action of the public body; and

(3) Virtual conferencing means conducting or participating in a meeting electronically or telephonically with interaction among the participants subject to subsection (2) of section 84-1412.

Source: Laws 1975, LB 325, § 2; Laws 1983, LB 43, § 1; Laws 1989, LB 429, § 42; Laws 1989, LB 311, § 14; Laws 1992, LB 1019, § 124; Laws 1993, LB 635, § 1; Laws 1996, LB 1044, § 978; Laws 1997, LB 798, § 37; Laws 2004, LB 821, § 36; Laws 2007, LB296, § 810; Laws 2011, LB366, § 2; Laws 2021, LB83, § 11; Laws 2022, LB922, § 12.

Operative Date: July 21, 2022

Annotations

- A township is a political subdivision, and as such, a township board is subject to the provisions of the public meetings laws. *Steenblock v. Elkhorn Township Bd.*, 245 Neb. 722, 515 N.W.2d 128 (1994).
- A county agricultural society is a public body to which the provisions of the Nebraska public meetings law are applicable. *Nixon v. Madison Co. Ag. Soc'y*, 217 Neb. 37, 348 N.W.2d 119 (1984).
- Failure by a public governing body, as defined under section 84-1409, R.R.S.1943, to take and record a roll call vote on an action, as required by section 84-1413(2), R.S.Supp.,1980, grants any citizen the right to sue for the purpose of

having the action declared void. In this case such failure could not be later corrected by a nunc pro tunc order because there was no showing that a roll call vote on the disputed action was actually taken, and even if it was the record showed it was not recorded until over a year later. Sections 23-1301, R.R.S.1943, and 23-1302, R.R.S.1943, make it the duty of the county clerk to record proceedings of the board of county commissioners. *State ex rel. Schuler v. Dunbar*, 208 Neb. 69, 302 N.W.2d 674 (1981).

- Although a committee was a subcommittee of a natural resources district board, it was not subject to the Open Meetings Act because there was never a quorum of board members in attendance and the committee did not hold hearings, make policy, or take formal action on behalf of the board. *Koch v. Lower Loup NRD*, 27 Neb. App. 301, 931 N.W.2d 160 (2019).
- Although the Open Meetings Act does not define "subcommittee," a subcommittee is generally defined as a group within a committee to which the committee may refer business. *Koch v. Lower Loup NRD*, 27 Neb. App. 301, 931 N.W.2d 160 (2019).
- The Open Meetings Act does not require policymakers to remain ignorant of the issues they must decide until the moment the public is invited to comment on a proposed policy. By excluding nonquorum subgroups from the definition of a public body, the Legislature has balanced the public's need to be heard on matters of public policy with a practical accommodation for a public body's need for information to conduct business. *Koch v. Lower Loup NRD*, 27 Neb. App. 301, 931 N.W.2d 160 (2019).
- As an administrative agency of the county, a county board of equalization is a public body. *Wolf v. Grubbs*, 17 Neb. App. 292, 759 N.W.2d 499 (2009).
- The electors of a township at their annual meeting are a public body under the Open Meetings Act. *State ex rel. Newman v. Columbus Township Bd.*, 15 Neb. App. 656, 735 N.W.2d 399 (2007).
- The meeting at issue in this case was a "meeting" within the parameters of subsection (2) of this section because it involved the discussion of public business, the formation of tentative policy, or the taking of any action of the public power district. *Hansmeyer v. Nebraska Pub. Power Dist.*, 6 Neb. App. 889, 578 N.W.2d 476 (1998).
- Informational sessions in which the governmental body hears reports are briefings. *Johnson v. Nebraska Environmental Control Council*, 2 Neb. App. 263, 509 N.W.2d 21 (1993).

84-1410. Closed session; when; purpose; reasons listed; procedure; right to challenge; prohibited acts; chance meetings, conventions, or workshops.

(1) Any public body may hold a closed session by the affirmative vote of a majority of its voting members if a closed session is clearly necessary for the protection of the public interest or for the prevention of needless injury to the reputation of an individual and if such individual has not requested a public meeting. The subject matter and the reason necessitating the closed session shall be identified in the motion to close. Closed sessions may be held for, but shall not be limited to, such reasons as:

(a) Strategy sessions with respect to collective bargaining, real estate purchases, pending litigation, or litigation which is imminent as evidenced by communication of a claim or threat of litigation to or by the public body;

(b) Discussion regarding deployment of security personnel or devices;

(c) Investigative proceedings regarding allegations of criminal misconduct;

(d) Evaluation of the job performance of a person when necessary to prevent needless injury to the reputation of a person and if such person has not requested a public meeting;

(e) For the Community Trust created under section 81-1801.02, discussion regarding the amounts to be paid to individuals who have suffered from a tragedy of violence or natural disaster; or

(f) For public hospitals, governing board peer review activities, professional review activities, review and discussion of medical staff investigations or disciplinary actions, and any strategy session concerning transactional negotiations with any referral source that is required by federal law to be conducted at arms length.

Nothing in this section shall permit a closed meeting for discussion of the appointment or election of a new member to any public body.

(2) The vote to hold a closed session shall be taken in open session. The entire motion, the vote of each member on the question of holding a closed session, and the time when the closed session commenced and concluded shall be recorded in the minutes. If the motion to close passes, then the presiding officer immediately prior to the closed session shall restate on the record the limitation of the subject matter of the closed session. The public body holding such a closed session shall restrict its consideration of matters during the closed portions to only those purposes set forth in the motion to close as the reason for the closed session. The meeting shall be reconvened in open session before any formal action may be taken. For purposes of this section, formal action shall mean a collective decision or a collective commitment or promise to make a decision on any question, motion, proposal, resolution, order, or ordinance or formation of a position or policy but shall not include negotiating guidance given by members of the public body to legal counsel or other negotiators in closed sessions authorized under subdivision (1)(a) of this section.

(3) Any member of any public body shall have the right to challenge the continuation of a closed session if the member determines that the session has exceeded the reason stated in the original motion to hold a closed session or if the member contends that the closed session is neither clearly necessary for (a) the protection of the public interest or (b) the prevention of needless injury to the reputation of an individual. Such challenge shall be overruled only by a majority vote of the members of the public body. Such challenge and its disposition shall be recorded in the minutes.

(4) Nothing in this section shall be construed to require that any meeting be closed to the public. No person or public body shall fail to invite a portion of its members to a meeting, and no public body shall designate itself a subcommittee of the whole body for the purpose of circumventing the Open Meetings Act. No closed session, informal meeting, chance meeting, social gathering, email, fax, or other electronic communication shall be used for the purpose of circumventing the requirements of the act.

(5) The act does not apply to chance meetings or to attendance at or travel to conventions or workshops of members of a public body at which there is no meeting of the body then intentionally convened, if there is no vote or other action taken regarding any matter over which the public body has supervision, control, jurisdiction, or advisory power.

Source: Laws 1975, LB 325, § 3; Laws 1983, LB 43, § 2; Laws 1985, LB 117, § 1; Laws 1992, LB 1019, § 125; Laws 1994, LB 621, § 1; Laws 1996, LB 900, § 1072; Laws 2004, LB 821, § 37; Laws 2004, LB 1179, § 1; Laws 2006, LB 898, § 1; Laws 2011, LB390, § 29; Laws 2012, LB995, § 17.

Annotations

- There is no absolute discovery privilege for communications that occur during a closed session. *State ex rel. Upper Republican NRD v. District Judges*, 273 Neb. 148, 728 N.W.2d 275 (2007).
- If a person present at a meeting observes a public meetings law violation in the form of an improper closed session and fails to object, that person waives his or her right to object at a later date. *Wasikowski v. Nebraska Quality Jobs Bd.*, 264 Neb. 403, 648 N.W.2d 756 (2002).
- The public interest mentioned in this section is that shared by citizens in general and by the community at large concerning pecuniary or legal rights and liabilities. *Grein v. Board of Education*, 216 Neb. 158, 343 N.W.2d 718 (1984).
- Hearing in closed executive session was contrary to this section since there was no showing of necessity or reason under subdivision (1)(a), (b), or (c), but did not result in reversal of board decision. *Simonds v. Board of Examiners*, 213 Neb. 259, 329 N.W.2d 92 (1983).
- Negotiations for the purchase of land need not be conducted at an open meeting but the deliberations of a city council as to whether an offer to purchase real estate

should be made should take place in an open meeting. *Pokorny v. City of Schuyler*, 202 Neb. 334, 275 N.W.2d 281 (1979).

- Public meeting law was not violated where the Board of Regents of the University of Nebraska voted to hold a closed session to consider the university president's resignation, and also discussed the appointment of an interim president during such session. *Meyer v. Board of Regents*, 1 Neb. App. 893, 510 N.W.2d 450 (1993).

84-1411. Meetings of public body; notice; method; contents; when available; right to modify; duties concerning notice; virtual conferencing authorized; requirements; emergency meeting without notice; appearance before public body.

(1)(a) Each public body shall give reasonable advance publicized notice of the time and place of each meeting as provided in this subsection. Such notice shall be transmitted to all members of the public body and to the public.

(b)(i) Except as provided in subdivision (1)(b)(ii) of this section, in the case of a public body described in subdivision (1)(a)(i) of section 84-1409 or such body's advisory committee, such notice shall be published in a newspaper of general circulation within the public body's jurisdiction and, if available, on such newspaper's website.

(ii) In the case of the governing body of a city of the second class or village or such body's advisory committee, such notice shall be published by:

(A) Publication in a newspaper of general circulation within the public body's jurisdiction and, if available, on such newspaper's website; or

(B) Posting written notice in three conspicuous public places in such city or village. Such notice shall be posted in the same three places for each meeting.

(iii) In the case of a public body not described in subdivision (1)(b)(i) or (ii) of this section, such notice shall be given by a method designated by the public body.

(c) In addition to a method of notice required by subdivision (1)(b)(i) or (ii) of this section, such notice may also be provided by any other appropriate method designated by such public body or such advisory committee.

(d) Each public body shall record the methods and dates of such notice in its minutes.

(e) Such notice shall contain an agenda of subjects known at the time of the publicized notice or a statement that the agenda, which shall be kept continually current, shall be readily available for public inspection at the principal office of the public body during normal business hours. Agenda items shall be sufficiently descriptive to give the public reasonable notice of the matters to be considered at the meeting. Except for items of an emergency nature, the agenda shall not be altered later than (i) twenty-four hours before the scheduled commencement of the meeting or

(ii) forty-eight hours before the scheduled commencement of a meeting of a city council or village board scheduled outside the corporate limits of the municipality. The public body shall have the right to modify the agenda to include items of an emergency nature only at such public meeting.

(2)(a) The following entities may hold a meeting by means of virtual conferencing if the requirements of subdivision (2)(b) of this section are met:

(i) A state agency, state board, state commission, state council, or state committee, or an advisory committee of any such state entity;

(ii) An organization, including the governing body, created under the Interlocal Cooperation Act, the Joint Public Agency Act, or the Municipal Cooperative Financing Act;

(iii) The governing body of a public power district having a chartered territory of more than one county in this state;

(iv) The governing body of a public power and irrigation district having a chartered territory of more than one county in this state;

(v) An educational service unit;

(vi) The Educational Service Unit Coordinating Council;

(vii) An organization, including the governing body, of a risk management pool or its advisory committees organized in accordance with the Intergovernmental Risk Management Act;

(viii) A community college board of governors;

(ix) The Nebraska Brand Committee;

(x) A local public health department;

(xi) A metropolitan utilities district;

(xii) A regional metropolitan transit authority; and

(xiii) A natural resources district.

(b) The requirements for holding a meeting by means of virtual conferencing are as follows:

(i) Reasonable advance publicized notice is given as provided in subsection (1) of this section, including providing access to a dial-in number or link to the virtual conference;

(ii) In addition to the public's right to participate by virtual conferencing, reasonable arrangements are made to accommodate the public's right to attend at a physical site and participate as provided in section 84-1412, including reasonable seating, in at least one designated site in a building open to the public and identified in the notice, with: At least one member of the entity holding such meeting, or his or her designee, present at each site; a

recording of the hearing by audio or visual recording devices; and a reasonable opportunity for input, such as public comment or questions, is provided to at least the same extent as would be provided if virtual conferencing was not used;

(iii) At least one copy of all documents being considered at the meeting is available at any physical site open to the public where individuals may attend the virtual conference. The public body shall also provide links to an electronic copy of the agenda, all documents being considered at the meeting, and the current version of the Open Meetings Act; and

(iv) Except as otherwise provided in this subdivision or subsection (4) of section 79-2204, no more than one-half of the meetings of the state entities, advisory committees, boards, councils, organizations, or governing bodies are held by virtual conferencing in a calendar year. In the case of an organization created under the Interlocal Cooperation Act that sells electricity or natural gas at wholesale on a multistate basis or an organization created under the Municipal Cooperative Financing Act, the organization may hold more than one-half of its meetings by virtual conferencing if such organization holds at least one meeting each calendar year that is not by virtual conferencing. The governing body of a risk management pool that meets at least quarterly and the advisory committees of the governing body may each hold more than one-half of its meetings by virtual conferencing if the governing body's quarterly meetings are not held by virtual conferencing.

(3) Virtual conferencing, emails, faxes, or other electronic communication shall not be used to circumvent any of the public government purposes established in the Open Meetings Act.

(4) The secretary or other designee of each public body shall maintain a list of the news media requesting notification of meetings and shall make reasonable efforts to provide advance notification to them of the time and place of each meeting and the subjects to be discussed at that meeting.

(5) When it is necessary to hold an emergency meeting without reasonable advance public notice, the nature of the emergency shall be stated in the minutes and any formal action taken in such meeting shall pertain only to the emergency. Such emergency meetings may be held by virtual conferencing. The provisions of subsection (4) of this section shall be complied with in conducting emergency meetings. Complete minutes of such emergency meetings specifying the nature of the emergency and any formal action taken at the meeting shall be made available to the public by no later than the end of the next regular business day.

(6) A public body may allow a member of the public or any other witness to appear before the public body by means of virtual conferencing.

(7)(a) Notwithstanding subsections (2) and (5) of this section, if an emergency is declared by the Governor pursuant to the Emergency Management Act as defined in section 81-829.39, a public body the territorial jurisdiction of which is included in the emergency declaration, in whole or in part, may hold a meeting by virtual conferencing during such emergency if the

public body gives reasonable advance publicized notice as described in subsection (1) of this section. The notice shall include information regarding access for the public and news media. In addition to any formal action taken pertaining to the emergency, the public body may hold such meeting for the purpose of briefing, discussion of public business, formation of tentative policy, or the taking of any action by the public body.

(b) The public body shall provide access by providing a dial-in number or a link to the virtual conference. The public body shall also provide links to an electronic copy of the agenda, all documents being considered at the meeting, and the current version of the Open Meetings Act. Reasonable arrangements shall be made to accommodate the public's right to hear and speak at the meeting and record the meeting. Subsection (4) of this section shall be complied with in conducting such meetings.

(c) The nature of the emergency shall be stated in the minutes. Complete minutes of such meeting specifying the nature of the emergency and any formal action taken at the meeting shall be made available for inspection as provided in subsection (5) of section 84-1413.

(8) In addition to any other statutory authorization for virtual conferencing, any public body not listed in subdivision (2)(a) of this section may hold a meeting by virtual conferencing if:

(a) The purpose of the virtual meeting is to discuss items that are scheduled to be discussed or acted upon at a subsequent non-virtual open meeting of the public body;

(b) No action is taken by the public body at the virtual meeting; and

(c) The public body complies with subdivisions (2)(b)(i) and (2)(b)(ii) of this section.

Source: Laws 1975, LB 325, § 4; Laws 1983, LB 43, § 3; Laws 1987, LB 663, § 25; Laws 1993, LB 635, § 2; Laws 1996, LB 469, § 6; Laws 1996, LB 1161, § 1; Laws 1999, LB 47, § 2; Laws 1999, LB 87, § 100; Laws 1999, LB 461, § 1; Laws 2000, LB 968, § 85; Laws 2004, LB 821, § 38; Laws 2004, LB 1179, § 2; Laws 2006, LB 898, § 2; Laws 2007, LB199, § 9; Laws 2009, LB361, § 2; Laws 2012, LB735, § 1; Laws 2013, LB510, § 1; Laws 2017, LB318, § 1; Laws 2019, LB212, § 5; Laws 2020, LB148, § 3; Laws 2021, LB83, § 12; Laws 2022, LB742, § 1; Laws 2022, LB908, § 1; Laws 2022, LB922, § 13.

Note: The Revisor of Statutes has pursuant to section 49-769 correlated LB742, section 1, with LB908, section 1, and LB922, section 13, to reflect all amendments.

Note: Changes made by LB742 and LB908 became effective July 21, 2022. Changes made by LB922 became operative July 21, 2022.

Annotations

- Under subsection (1) of this section, the Legislature has imposed only two conditions on the public body's notification method of a public meeting: (1) It must give reasonable advance publicized notice of the time and place of each meeting and (2) it must be recorded in the public body's minutes. *City of Elkhorn v. City of Omaha*, 272 Neb. 867, 725 N.W.2d 792 (2007).
- An emergency is "(a)ny event or occasional combination of circumstances which calls for immediate action or remedy; pressing necessity; exigency; a sudden or unexpected happening; an unforeseen occurrence or condition." *Steenblock v. Elkhorn Township Bd.*, 245 Neb. 722, 515 N.W.2d 128 (1994).
- An agenda which gives reasonable notice of the matters to be considered at a meeting of a city council complies with the requirements of this section. *Pokorny v. City of Schuyler*, 202 Neb. 334, 275 N.W.2d 281 (1979).
- When notice is required, a notice of a special meeting of a city council posted in three public places at 10:00 p.m. on the day preceding the meeting is not reasonable advance publicized notice of a meeting as is required by this section. *Pokorny v. City of Schuyler*, 202 Neb. 334, 275 N.W.2d 281 (1979).
- Teacher waived right to object to lack of public notice in board of education employment hearing by voluntary participation in the hearing without objection. *Alexander v. School Dist. No. 17*, 197 Neb. 251, 248 N.W.2d 335 (1976).
- A county board of commissioners and a county board of equalization are not required to give separate notices when the notice states only the time and place that the boards meet and directs a citizen to where the agendas for each board can be found. *Wolf v. Grubbs*, 17 Neb. App. 292, 759 N.W.2d 499 (2009).
- A county board of equalization is a public body which is required to give advanced publicized notice of its meetings. *Wolf v. Grubbs*, 17 Neb. App. 292, 759 N.W.2d 499 (2009).
- Notice of recessed and reconvened meetings must be given in the same fashion as the original meeting. *Wolf v. Grubbs*, 17 Neb. App. 292, 759 N.W.2d 499 (2009).
- True notice of a meeting is not given by burying such in the minutes of a prior board proceeding. *Wolf v. Grubbs*, 17 Neb. App. 292, 759 N.W.2d 499 (2009).
- An agenda notice which merely stated "work order reports" was an inadequate notice under this section because it did not give interested persons knowledge that plans for a 345 kv transmission line through the district was going to be discussed and voted upon at the meeting. Inadequate agenda notice under this section meant there was a substantial violation of the public meeting laws; however, later actions by the board of directors cured the defects in notice, and such actions were in substantial compliance with the statute. *Hansmeyer v. Nebraska Pub. Power Dist.*, 6 Neb. App. 889, 578 N.W.2d 476 (1998).

84-1412. Meetings of public body; rights of public; public body; powers and duties.

(1) Subject to the Open Meetings Act, the public has the right to attend and the right to speak at meetings of public bodies, and all or any part of a meeting of a public body, except for closed sessions called pursuant to section 84-1410, may be videotaped, televised, photographed, broadcast, or recorded by any person in attendance by means of a tape recorder, a camera, video equipment, or any other means of pictorial or sonic reproduction or in writing.

(2) It shall not be a violation of subsection (1) of this section for any public body to make and enforce reasonable rules and regulations regarding the conduct of persons attending, speaking at, videotaping, televising, photographing, broadcasting, or recording its meetings, including meetings held by virtual conferencing. A body may not be required to allow citizens to speak at each meeting, but it may not forbid public participation at all meetings.

(3) No public body shall require members of the public to identify themselves as a condition for admission to the meeting nor shall such body require that the name of any member of the public be placed on the agenda prior to such meeting in order to speak about items on the agenda. The body shall require any member of the public desiring to address the body to identify himself or herself, including an address and the name of any organization represented by such person unless the address requirement is waived to protect the security of the individual.

(4) No public body shall, for the purpose of circumventing the Open Meetings Act, hold a meeting in a place known by the body to be too small to accommodate the anticipated audience.

(5) No public body shall be deemed in violation of this section if it holds its meeting in its traditional meeting place which is located in this state.

(6) No public body shall be deemed in violation of this section if it holds a meeting outside of this state if, but only if:

(a) A member entity of the public body is located outside of this state and the meeting is in that member's jurisdiction;

(b) All out-of-state locations identified in the notice are located within public buildings used by members of the entity or at a place which will accommodate the anticipated audience;

(c) Reasonable arrangements are made to accommodate the public's right to attend, hear, and speak at the meeting, including making virtual conferencing available at an in-state location to members, the public, or the press, if requested twenty-four hours in advance;

(d) No more than twenty-five percent of the public body's meetings in a calendar year are held out-of-state;

(e) Out-of-state meetings are not used to circumvent any of the public government purposes established in the Open Meetings Act; and

(f) The public body publishes notice of the out-of-state meeting at least twenty-one days before the date of the meeting in a legal newspaper of statewide circulation.

(7) Each public body shall, upon request, make a reasonable effort to accommodate the public's right to hear the discussion and testimony presented at a meeting.

(8) Public bodies shall make available at the meeting or the instate location for virtual conferencing as required by subdivision (6)(c) of this section, for examination and copying by members of the public, at least one copy of all reproducible written material to be discussed at an open meeting, either in paper or electronic form. Public bodies shall make available at least one current copy of the Open Meetings Act posted in the meeting room at a location accessible to members of the public. At the beginning of the meeting, the public shall be informed about the location of the posted information.

Source: Laws 1975, LB 325, § 5; Laws 1983, LB 43, § 4; Laws 1985, LB 117, § 2; Laws 1987, LB 324, § 5; Laws 1996, LB 900, § 1073; Laws 2001, LB 250, § 2; Laws 2004, LB 821, § 39; Laws 2006, LB 898, § 3; Laws 2008, LB962, § 1; Laws 2021, LB83, § 13.

Annotations

- To preserve an objection that a public body failed to make documents available at a public meeting as required by subsection (8) of this section, a person who attends a public meeting must not only object to the violation, but must make that objection to the public body or to a member of the public body. *Stoetzel & Sons v. City of Hastings*, 265 Neb. 637, 658 N.W.2d 636 (2003).

84-1413. Meetings; minutes; roll call vote; secret ballot; when; agenda and minutes; required on website; when.

(1) Each public body shall keep minutes of all meetings showing the time, place, members present and absent, and the substance of all matters discussed.

(2) Any action taken on any question or motion duly moved and seconded shall be by roll call vote of the public body in open session, and the record shall state how each member voted or if the member was absent or not voting. The requirements of a roll call or viva voce vote shall be satisfied by a public body which utilizes an electronic voting device which allows the yeas and nays of each member of such public body to be readily seen by the public.

(3) The vote to elect leadership within a public body may be taken by secret ballot, but the total number of votes for each candidate shall be recorded in the minutes.

(4) The minutes of all meetings and evidence and documentation received or disclosed in open session shall be public records and open to public inspection during normal business hours.

(5) Minutes shall be written or kept as an electronic record and shall be available for inspection within ten working days or prior to the next convened meeting, whichever occurs

earlier, except that cities of the second class and villages may have an additional ten working days if the employee responsible for writing or keeping the minutes is absent due to a serious illness or emergency.

(6) Beginning July 31, 2022, the governing body of a natural resources district, the city council of a city of the metropolitan class, the city council of a city of the primary class, the city council of a city of the first class, the county board of a county with a population greater than twenty-five thousand inhabitants, and the school board of a school district shall make available on such entity's public website the agenda and minutes of any meeting of the governing body. The agenda shall be placed on the website at least twenty-four hours before the meeting of the governing body. Minutes shall be placed on the website at such time as the minutes are available for inspection as provided in subsection (5) of this section. This information shall be available on the public website for at least six months.

Source: Laws 1975, LB 325, § 6; Laws 1978, LB 609, § 3; Laws 1979, LB 86, § 9; Laws 1987, LB 663, § 26; Laws 2005, LB 501, § 1; Laws 2009, LB361, § 3; Laws 2015, LB365, § 2; Laws 2016, LB876, § 1; Laws 2021, LB83, § 14; Laws 2022, LB742, § 2.

Effective Date: July 21, 2022

Annotations

- If a person present at a meeting observes and fails to object to an alleged public meetings laws violation in the form of a failure to conduct rollcall votes before taking actions on questions or motions pending, that person waives his or her right to object at a later date. *Hauser v. Nebraska Police Stds. Adv. Council*, 264 Neb. 944, 653 N.W.2d 240 (2002).
- Subsection (2) of this section does not require the record to state that the vote was by roll call, but requires only that the record show if and how each member voted. Neither does the statute set a time limit for recording the results of a vote, after which no corrections of the record can be made. If no intervening rights of third persons have arisen, a board of county commissioners has power to correct the record of the proceedings had at a previous meeting so as to make them speak the truth, particularly where the correction supplies some omitted fact or action and is done not to contradict or change the original record but to have the record show that a certain action was taken or thing done, which the original record fails to show. *State ex rel. Schuler v. Dunbar*, 214 Neb. 85, 333 N.W.2d 652 (1983).
- Failure by a public governing body, as defined under section 84-1409, R.R.S.1943, to take and record a roll call vote on an action, as required by section 84-1413(2), R.S.Supp.,1980, grants any citizen the right to sue for the purpose of having the action declared void. In this case such failure could not be later corrected by a nunc pro tunc order because there was no showing that a roll call vote on the disputed action was actually taken, and even if it was the record showed it was not recorded until over a year later. Sections 23-1301, R.R.S.1943,

and 23-1302, R.R.S.1943, make it the duty of the county clerk to record proceedings of the board of county commissioners. *State ex rel. Schuler v. Dunbar*, 208 Neb. 69, 302 N.W.2d 674 (1981).

- There is no requirement that a public body make a record of where notice was published or posted. *Wolf v. Grubbs*, 17 Neb. App. 292, 759 N.W.2d 499 (2009).

84-1414. Unlawful action by public body; declared void or voidable by district court; when; duty to enforce open meeting laws; citizen's suit; procedure; violations; penalties.

(1) Any motion, resolution, rule, regulation, ordinance, or formal action of a public body made or taken in violation of the Open Meetings Act shall be declared void by the district court if the suit is commenced within one hundred twenty days of the meeting of the public body at which the alleged violation occurred. Any motion, resolution, rule, regulation, ordinance, or formal action of a public body made or taken in substantial violation of the Open Meetings Act shall be voidable by the district court if the suit is commenced more than one hundred twenty days after but within one year of the meeting of the public body in which the alleged violation occurred. A suit to void any final action shall be commenced within one year of the action.

(2) The Attorney General and the county attorney of the county in which the public body ordinarily meets shall enforce the Open Meetings Act.

(3) Any citizen of this state may commence a suit in the district court of the county in which the public body ordinarily meets or in which the plaintiff resides for the purpose of requiring compliance with or preventing violations of the Open Meetings Act, for the purpose of declaring an action of a public body void, or for the purpose of determining the applicability of the act to discussions or decisions of the public body. It shall not be a defense that the citizen attended the meeting and failed to object at such time. The court may order payment of reasonable attorney's fees and court costs to a successful plaintiff in a suit brought under this section.

(4) Any member of a public body who knowingly violates or conspires to violate or who attends or remains at a meeting knowing that the public body is in violation of any provision of the Open Meetings Act shall be guilty of a Class IV misdemeanor for a first offense and a Class III misdemeanor for a second or subsequent offense.

Source: Laws 1975, LB 325, § 9; Laws 1977, LB 39, § 318; Laws 1983, LB 43, § 5; Laws 1992, LB 1019, § 126; Laws 1994, LB 621, § 2; Laws 1996, LB 900, § 1074; Laws 2004, LB 821, § 40; Laws 2006, LB 898, § 4.

Annotations

- The Legislature has granted standing to a broad scope of its citizens for the very limited purpose of challenging meetings allegedly in violation of the Open Meetings Act, so that they may help police the public policy embodied by the act. *Schauer v. Grooms*, 280 Neb. 426, 786 N.W.2d 909 (2010).

- Any citizen of the state may commence an action to declare a public body's action void. *City of Elkhorn v. City of Omaha*, 272 Neb. 867, 725 N.W.2d 792 (2007).
- The reading of ordinances constitutes a formal action under subsection (1) of this section. *City of Elkhorn v. City of Omaha*, 272 Neb. 867, 725 N.W.2d 792 (2007).
- If a person present at a meeting observes a public meetings law violation in the form of an improper closed session and fails to object, that person waives his or her right to object at a later date. *Wasikowski v. Nebraska Quality Jobs Bd.*, 264 Neb. 403, 648 N.W.2d 756 (2002).
- Under the Public Meetings Act, a county lacks capacity to maintain an action to declare its official conduct "void" for noncompliance with the act. *County of York v. Johnson*, 230 Neb. 403, 432 N.W.2d 215 (1988).
- When a petitioner under this section is successful in the district court, that court may allow attorney fees. *Tracy Corp. II v. Nebraska Pub. Serv. Comm.*, 218 Neb. 900, 360 N.W.2d 485 (1984).
- Informal discussions between the Tax Commissioner and the State Board of Equalization in which instructions were clarified, with such clarification leading to the amendment of hearing notices, did not constitute a public meeting subject to the provisions of this section. *Box Butte County v. State Board of Equalization and Assessment*, 206 Neb. 696, 295 N.W.2d 670 (1980).
- The right to collaterally attack an order made in contravention of the Public Meeting Act must occur within a period of one year as is specifically provided by this section. *Witt v. School District No. 70*, 202 Neb. 63, 273 N.W.2d 669 (1979).
- Statutory change, requiring "publicized notice" for board of education employment hearings, occurring between dates meeting scheduled and conducted, held not to void proceedings. *Alexander v. School Dist. No. 17*, 197 Neb. 251, 248 N.W.2d 335 (1976).
- Voiding an entire meeting is a proper remedy for violations of the Open Meetings Act. Once a meeting has been declared void pursuant to Nebraska's public meetings law, board members are prohibited from considering any information obtained at the illegal meeting. *Wolf v. Grubbs*, 17 Neb. App. 292, 759 N.W.2d 499 (2009).
- Actions by the board of directors were merely voidable under this section, and not void. Pursuant to subsection (3) of this section, the plaintiffs were awarded partial attorney fees because they were successful in having the court declare that the board of directors was in substantial violation of the statute, even though the plaintiffs did not get the relief requested of having the board's actions declared void. *Hansmeyer v. Nebraska Pub. Power Dist.*, 6 Neb. App. 889, 578 N.W.2d 476 (1998).

- Schuyler Post Office
- Colfax County Courthouse

Action Item

VI. Board Member Roll Call

Action Item

VII. Pledge of Allegiance

Action Item

VIII. Approval of Agenda

Action Item

IX. Consent Agenda

Action Item

Business Manager hire was discussed.

Discuss, Consider and Take Action on the consent agenda. This motion, made by Brian Vavricek and seconded by Dr Renee Sayer, Passed.

Chuck Misek: Nay, Richard Brabec: Yea, Amanda Jedlicka: Yea, Dr Renee Sayer: Yea, Virginia Semerad: Yea, Brian Vavricek: Yea

Yea: 5, Nay: 1

Motion to discuss Business Manager. This motion, made by Chuck Misek and seconded by Richard Brabec, Passed.

Richard Brabec: Yea, Amanda Jedlicka: Yea, Chuck Misek: Yea, Dr Renee Sayer: Yea, Virginia

Semerad: Yea, Brian Vavricek: Yea
Yea: 6, Nay: 0

IX.A. Minutes of the September 9th meeting of the board.
Action Item

IX.B. Financial Report
Action Item

IX.C. Resignations:
Action Item

IX.C.1. Mary Cinfel - Business Manager
Action Item

IX.D. New Hire Recommendations:
Action Item

IX.D.1. Dr. Willam Robinson - Business Manager

Action Item

X. Public Comment
Action Item

XI. Discussion/Information Items
Action Item

XI.A. Samantha Ladwig will present the possibility of having an SRO (School Resource Officer).
Action Item

XI.B. Bill Comley will present on the opportunity for a childcare within Schuyler Community Schools.
Action Item
Bill Comley

XII. Action Items
Action Item

XII.A. Accounts at Homestead Bank

Remove from the accounts:

Joey Lefdal
Travis Steinhoff
Andy Banahan
Mary Cinfel

Add to the accounts:

William Robinson
Josh McPhillips
Josh Rowan
Amanda Jedlicka
Action Item

Misek requested to ensure his removal from any accounts at Pinnacle since he is no longer Treasurer of the board.

Make a motion to remove Joey Lefdal, Travis Steinhoff, Andy Banahan, and Mary Cinfel from all Pinnacle accounts and add William Robinson, Josh McPhillips, Amanda Jedlicka, and Josh Rowan to the appropriate Pinnacle bank accounts. This motion, made by Brian Vavricek and seconded by Chuck Misek, Passed.

Amanda Jedlicka: Abstain (With Conflict), Richard Brabec: Yea, Chuck Misek: Yea, Dr Renee Sayer: Yea, Virginia Semerad: Yea, Brian Vavricek: Yea
Yea: 5, Nay: 0, Abstain (With Conflict): 1

XII.B. Lunch Account at Homestead Bank

Remove from the account:

Chuck Misek
Joey Lefdal
Mary Cinfel

Add to the account:

William Robinson
Amanda Jedlicka
Action Item

Make a motion to remove Chuck Misek, Joey Lefdal, and Mary Cinfel from the Homestead Bank account and add William Robinson and Amanda Jedlicka. This motion, made by Brian Vavricek and seconded by Virginia Semerad, Passed.

Amanda Jedlicka: Abstain (With Conflict), Richard Brabec: Yea, Chuck Misek: Yea, Dr Renee Sayer: Yea, Virginia Semerad: Yea, Brian Vavricek: Yea
Yea: 5, Nay: 0, Abstain (With Conflict): 1

XII.C. Appoint Local Board NASB Delegate Assembly Representative

Action Item

The representative will attend the delegate assembly held during the State Education Conference in November.

Board president appointed Renee Sayer as the Delegate Assembly Representative.

XII.D. Approve the development of a single room childcare setting for January, 2025.
Action Item

Make a motion to approve the development of a single room childcare setting to begin in January, 2025. This motion, made by Dr Renee Sayer and seconded by Amanda Jedlicka, Passed.

Richard Brabec: Yea, Amanda Jedlicka: Yea, Chuck Misek: Yea, Dr Renee Sayer: Yea, Virginia Semerad: Yea, Brian Vavricek: Yea
Yea: 6, Nay: 0

XIII. Information Items: Reports
Action Item

Grade	Topic	Standard	Code	2017 Indicators	2024 Indicators
6	Energy	Gather, analyze, and communicate evidence of energy.	NE.SC.6.4.1.c	relationships among the energy transferred, the type of matter, the mass, and the change in the average kinetic energy of the particles as measured by the temperature of the sample.	among the energy transferred, type of matter, mass, and change in average kinetic energy of particles as measured by the temperature of the sample. Assessment does not include calculating the total amount of thermal energy transferred.
6	Energy	Gather, analyze, and communicate evidence of energy.	NE.SC.6.4.1.d	Construct, use, and present arguments to support the claim that when the kinetic energy of an object changes, energy is transferred to or from the object	Construct, use, and present arguments to support the claim that when kinetic energy of an object changes, energy is transferred to or from the object. Assessment does not include calculations of energy.
6	Living Things	Gather, analyze, and communicate evidence of the relationship between structure and in living things	NE.SC.6.6.2.a	Conduct an investigation to provide evidence that living things are made of cells; either one cell or many different numbers and types of cells.	Conduct an investigation to provide evidence that living things are made of cells; either one cell or many varied cells.
6	Living Things	Gather, analyze, and communicate evidence of the relationship between structure and in living things	NE.SC.6.6.2.b	Develop and use a model to describe the function of a cell as a whole and ways parts of cells contribute to the function	cell as a whole and ways parts of a cell contribute to the function. Assessment of organelle structure/function relationships is limited to the cell wall and cell membrane. Assessment of the function of the other organelles is limited to their relationship to the whole cell. Assessment does not include the biochemical function of cells or cell parts.
6	Living Things	Gather, analyze, and communicate evidence of the relationship between structure and in living things	NE.SC.6.6.2.d	Gather and synthesize information that sensory receptors respond to stimuli by sending messages to the brain for immediate behavior or storage as memories	Gather and synthesize information that sensory receptors respond to stimuli by sending messages to the brain for immediate behavior or stored as memories. Assessment does not include mechanisms for the transmission of this information.
6	Earth	communicate evidence of the flow of energy and cycling of matter associated with Earth's materials and processes.	NE.SC.6.13.5.a	Develop a model to describe the cycling of water through Earth's systems driven by energy from the sun and the force of gravity	Develop a model to describe how the water cycle is driven by the sun's energy and the force of gravity.
7	Energy and Matter	Gather, analyze, and communicate evidence of the structure, properties, and interactions of matter.	NE.SC.7.3.1.b	Gather and make sense of information to describe that synthetic materials come from natural resources and impact society.	Gather and make sense of information to describe how natural materials may undergo chemical reactions to create new synthetic materials and have an impact on society. Assessment is limited to qualitative information.
7	Ecosystems	Gather, analyze, and communicate evidence of interdependent relationships in ecosystems.	NE.SC.7.7.3.b	Evaluate competing design solutions for maintaining biodiversity and ecosystem services	Develop and use a model to describe how stable ecosystems maintain biodiversity and ecosystem services.
7	Earth	Gather, analyze, and communicate evidence to explain Earth's history.	NE.SC.7.14.6.c	Analyze and interpret data on natural hazards to forecast future catastrophic events and inform the development of technologies to mitigate their effects.	Analyze and interpret data on geologic hazards to forecast future catastrophic events and inform the development of technologies to mitigate their effects.

8	Forces and Interactions	Gather, analyze, and communicate evidence of forces and interactions.	NE.SC.8.1.1.c	Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.	Plan an investigation to provide evidence of Newton's Laws that the <u>change</u> in an object's motion depends on the sum of the forces on the object and the mass of the object. Assessment is limited to forces and changes in motion in one-dimension in an inertial reference frame and to change in one variable at a time; does not include use of trigonometry.
8	Forces and Interactions	Gather, analyze, and communicate evidence of forces and interactions.	NE.SC.8.1.1.e	Construct and present arguments using evidence to support the claim that gravitational interactions are attractive and depend on the masses of interacting objects	Construct and present arguments using evidence to support the claim that gravitational interactions are attractive and depend on both the mass and distance of <u>interacting objects</u> . Assessment does not include Newton's Law of Gravitation or Kepler's Laws.
8	Forces and Interactions	Gather, analyze, and communicate evidence of forces and interactions.	NE.SC.8.1.1.f	Conduct an investigation and evaluate the experimental design to provide evidence that fields exist between objects exerting forces on each other even though the objects are not in contact.	Conduct an investigation and evaluate the experimental design to provide evidence that electrical and magnetic fields exist between objects <u>exerting forces on each other</u> even though the objects are not in contact. Assessment is limited to electric and magnetic fields and limited to <u>qualitative evidence for the existence of fields</u> .
8	Waves and Electromagnetic radiation	Gather, analyze, and communicate evidence of waves and electromagnetic radiation	NE.SC.8.2.2.b	Develop and use a model to describe that waves are reflected, absorbed, or transmitted through various materials	mechanical waves are reflected, absorbed, or transmitted <u>through various materials</u> . Assessment is limited to <u>qualitative applications</u> pertaining to light and mechanical waves.
8	Waves and Electromagnetic radiation	Gather, analyze, and communicate evidence of waves and electromagnetic radiation	NE.SC.8.2.2.c	Integrate qualitative scientific and technical information to support the claim that digitized signals are a more reliable way to encode and transmit information than analog signals.	Gather and make sense of information to support the claim that the <u>structure of analog and digital signals</u> allows for encoding and transmission of information.
8	Energy	Gather, analyze, and communicate evidence of energy.	NE.SC.8.4.3.a	Construct and interpret graphical displays of data to describe the relationships of kinetic energy to the mass of an object and to the speed of an object.	Construct and interpret graphical displays of data to describe the <u>relationships of</u> kinetic energy to the mass and speed of an object.
8	Earth	Gather, analyze, and communicate evidence to explain Earth's history.	NE.SC.8.14.7.a	Construct a scientific explanation based on evidence from rock strata for how the geologic time scale is used to organize Earth's 4.6-billion-year-old history.	found within rock strata, including index fossils, for how the <u>geologic time scale</u> is used to organize Earth's 4.6-billion-year-old history. Assessment does not include recalling the names of specific periods or epochs and events within them.

Grade	Topic	Standard	Code	2017 Indicators	2024 Indicators
HS	Life Sciences	Gather, analyze, and communicate evidence of interdependent relationships in ecosystems.	NE.SC.HS.7.2.d	Evaluate the evidence for the role of group behavior on individual and species' chances to survive and reproduce.	Evaluate the evidence for <u>how group behavior has evolved</u> because membership can increase the chances of survival for individuals and their genetic relatives.
HS	Biology	Gather, analyze, and communicate evidence of the relationship between structure and function in living things	NE.SC.HSP.6.1.a	Construct an explanation based on evidence for how the sequence of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.	Construct an explanation based on evidence for how the sequence of DNA determines <u>the structure of proteins which carry out the essential functions of life</u> through systems of specialized cells.
HS	Biology	Gather, analyze, and communicate evidence of the relationship between structure and function in living things	NE.SC.HSP.6.1.d	Use a model to illustrate the role of cell signaling and cell communication in producing and maintaining cellular functions within organisms.	Use a model to illustrate the role of cells in producing signals <u>which maintain cellular functions</u> within organisms
HS	Biology	Gather, analyze, and communicate evidence of interdependent relationships in ecosystems.	NE.SC.HSP.7.2.a	Use mathematical and/or computational representations to support explanations of factors that affect carrying capacity of ecosystems at different scales.	Use mathematical and/or computational representations to support explanations of factors that affect carrying capacity of ecosystems <u>at different scales.</u>
HS	Biology	Gather, analyze, and communicate evidence of interdependent relationships in ecosystems.	NE.SC.HSP.7.2.e	Create or revise a simulation to test a solution to mitigate the impacts of human activity on biodiversity.	Create or revise a solution to mitigate the impacts of human activity on biodiversity.
HS	Biology	Gather, analyze, and communicate evidence of interdependent relationships in ecosystems.	NE.SC.HSP.7.2.f	Evaluate evidence for the role of behavior on individual and species' chances to survive and reproduce.	Evaluate evidence for the role of behavior on individual and species' <u>chances to survive and reproduce.</u>
HS	Biology	Gather, analyze, and communicate evidence of the inheritance and variation of traits.	NE.SC.HSP.9.4.A	Use a model to illustrate the role of cellular division (mitosis) and differentiation in producing and maintaining complex organisms.	moved to SC.HSP.6.1.g
HS	Anatomy and Physiology	Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the integumentary system.	NE.SC.HSP.6.2.a	Communicate scientific information that explains the patterns of organization in the integumentary system.	Plan and conduct an investigation to identify <u>patterns of organization</u> in the integumentary system
HS	Anatomy and Physiology	Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the integumentary system.	NE.SC.HSP.6.2.b	Ask questions to clarify the role of various proteins and integumentary system function.	Ask questions to clarify the role of various structures in integumentary system function.
HS	Anatomy and Physiology	Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the integumentary system.	NE.SC.HSP.6.2.e	Construct a scientific explanation based on evidence for the role of cell division in integumentary system dysfunction.	Engage in arguments from evidence for the <u>role of cell division</u> in integumentary system dysfunction.
HS	Anatomy and Physiology	Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the integumentary system.	NE.SC.HSP.6.2.f	Develop and use a model to explain the relationship between the integumentary system and other body systems.	Deleted

HS	Anatomy and Physiology	Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the integumentary system.	NE.SC.HSP.6.2.g	Construct and revise an explanation based on evidence for the role of the integumentary system in the cycling of matter and flow of energy among body systems.	Deleted	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the skeletal system.	NE.SC.HSP.6.3.a	Communicate scientific information that explains the patterns of organization in the skeletal system.	Plan and conduct an investigation to identify patterns of organization in the skeletal system.	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the skeletal system.	NE.SC.HSP.6.3.c	Plan and conduct an investigation to gather evidence that feedback mechanisms in the skeletal system help maintain homeostasis.	Obtain, evaluate, and communicate information that feedback mechanisms in the skeletal system help maintain homeostasis.	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the skeletal system.	NE.SC.HSP.6.3.e	Construct and present arguments using evidence to support claims about the causes of dysfunction in the skeletal system.	Engage in arguments from evidence to support claims about the causes of dysfunction in the skeletal system.	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the skeletal system.	NE.SC.HSP.6.3.f	Develop and use a model to explain the relationship between the skeletal system and other body systems.	Deleted	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the muscular system.	NE.SC.HSP.6.4.a	Communicate scientific information that explains the patterns of organization in the muscular system.	Plan and conduct an investigation to identify patterns of organization in the muscular system	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the muscular system.	NE.SC.HSP.6.4.c	Construct an argument based on evidence that muscle contraction is the result of biochemical reactions	Engage in arguments from evidence that muscle contraction is the result of biochemical reactions.	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the muscular system.	NE.SC.HSP.6.4.d	Plan and conduct an investigation to gather evidence that feedback mechanisms in the muscular system help maintain homeostasis.	Obtain, evaluate, and communicate evidence that feedback mechanisms in the muscular system help maintain homeostasis	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the muscular system.	NE.SC.HSP.6.4.e	Construct and present arguments using evidence to support claims about the causes of dysfunction in the muscular system.	Engage in arguments from evidence to support claims about the causes of dysfunction in the muscular system.	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the muscular system.	NE.SC.HSP.6.4.f	Develop and use a model to explain the relationship between the muscular system and other body systems.	Deleted	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the muscular system.	NE.SC.HSP.6.4.g	Construct and revise an explanation based on evidence for the role of the muscular system in the cycling of matter and flow of energy among body systems.	Deleted	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the nervous system.	NE.SC.HSP.6.5.a	Communicate scientific information that explains the patterns of organization in the nervous system.	Plan and conduct an investigation to identify patterns of organization in the nervous system	

HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the nervous system.	NE.SC.HSP.6.5.c	Construct an argument based on evidence that production of a nerve impulse is the result of biochemical reactions.	Engage in arguments from evidence that production of a nerve impulse <u>is the result of</u> biochemical reactions.
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the nervous system.	NE.SC.HSP.6.5.d	Plan and conduct an investigation to gather evidence that feedback mechanisms in the nervous system help maintain homeostasis.	Obtain, evaluate or communicate evidence that feedback mechanisms in the nervous system help maintain homeostasis
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the nervous system.	NE.SC.HSP.6.5.e	Construct and present arguments using evidence to support claims about the causes of dysfunction in the nervous system.	Engage in arguments from evidence to support claims about the <u>causes</u> of dysfunction in the nervous system.
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the nervous system.	NE.SC.HSP.6.5.f	Develop and use a model to explain the relationship between the nervous system and other body systems.	Deleted
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the nervous system.	NE.SC.HSP.6.5.g	Construct and revise an explanation based on evidence for the role of the nervous system in the cycling of matter and flow of energy among body systems.	Deleted
HS	Anatomy and Physiology	Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the cardiovascular/respiratory systems.	NE.SC.HSP.6.6.a	Communicate scientific information that explains the patterns of organization in the cardiovascular/respiratory systems.	Plan and conduct an investigation to identify <u>patterns</u> of organization in the cardiovascular/respiratory systems
HS	Anatomy and Physiology	Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the cardiovascular/respiratory systems.	NE.SC.HSP.6.6.c	Plan and conduct an investigation to gather evidence that feedback mechanisms in the cardiovascular/respiratory systems help maintain homeostasis.	Obtain, evaluate and communicate evidence that feedback mechanisms in the cardiovascular/respiratory systems help maintain <u>homeostasis</u> .
HS	Anatomy and Physiology	Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the cardiovascular/respiratory systems.	NE.SC.HSP.6.6.d	Construct and present arguments using evidence to support claims about the causes of dysfunction in the cardiovascular/respiratory systems.	Engage in arguments from evidence to support claims about the <u>causes</u> of dysfunction in the cardiovascular/respiratory systems
HS	Anatomy and Physiology	Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the cardiovascular/respiratory systems.	NE.SC.HSP.6.6.e	Develop and use a model to explain the relationship between the cardiovascular/respiratory systems and other body systems.	Deleted
HS	Anatomy and Physiology	Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the cardiovascular/respiratory systems.	NE.SC.HSP.6.6.f	Construct and revise an explanation based on evidence for the role of the cardiovascular/respiratory systems in the cycling of matter and flow of energy among body systems.	Deleted
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the digestive system.	NE.SC.HSP.6.7.a	Communicate scientific information that explains the patterns of organization in the digestive system.	Plan and conduct an investigation to identify <u>patterns</u> of organization in the digestive system

HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the digestive system.	NE.SC.HSP.6.7.c	Plan and conduct an investigation to gather evidence that feedback mechanisms in the digestive system help maintain homeostasis.	Obtain, evaluate and communicate evidence that feedback mechanisms in the digestive system help maintain homeostasis	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the digestive system.	NE.SC.HSP.6.7.d	Construct and present arguments using evidence to support claims about the causes of dysfunction in the digestive system.	Engage in arguments from evidence to support claims about the <u>causes</u> of dysfunction in the digestive system	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the digestive system.	NE.SC.HSP.6.7.e	Develop and use a model to explain the relationship between the digestive system and other body systems.	Deleted	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the digestive system.	NE.SC.HSP.6.7.f	Construct and revise an explanation based on evidence for the role of the digestive system in the cycling of matter and flow of energy among body systems.	Deleted	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the urinary system.	NE.SC.HSP.6.8.a	Communicate scientific information that explains the patterns of organization in the urinary system.	Plan and conduct an investigation to identify <u>patterns</u> of organization in the urinary system.	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the urinary system.	NE.SC.HSP.6.8.c	Plan and conduct an investigation to gather evidence that feedback mechanisms in the urinary system help maintain homeostasis.	Obtain, evaluate and communicate evidence that feedback mechanisms in the urinary system help maintain homeostasis.	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the urinary system.	NE.SC.HSP.6.8.d	Construct and present arguments using evidence to support claims about the causes of dysfunction in the urinary system.	Engage in arguments from evidence to support claims about the <u>causes</u> of dysfunction in the urinary system.	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the urinary system.	NE.SC.HSP.6.8.e	Develop and use a model to explain the relationship between the urinary system and other body systems.	Deleted	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the urinary system.	NE.SC.HSP.6.8.f	Construct and revise an explanation based on evidence for the role of the urinary system in the cycling of matter and flow of energy among body systems.	Deleted	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the reproductive system.	NE.SC.HSP.6.9.a	Communicate scientific information that explains the patterns of organization in the reproductive system.	Plan and conduct an investigation to identify <u>patterns</u> of organization in the reproductive system.	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the reproductive system.	NE.SC.HSP.6.9.c	Plan and conduct an investigation to gather evidence that feedback mechanisms in the reproductive system help maintain homeostasis.	that feedback mechanisms in the reproductive system help maintain <u>homeostasis</u> .	
HS	Anatomy and Physiology	evidence of the relationship between the structures and physiological processes of the reproductive system.	NE.SC.HSP.6.9.d	Construct and present arguments using evidence to support claims about the causes of dysfunction in the reproductive system.	Engage in arguments from evidence to support claims about the <u>causes</u> of dysfunction in the reproductive system.	

Grade	Topic	Standard	Code	2017 Indicators	2024 Indicators
HS	Earth & Space Sciences	Gather, analyze, and communicate evidence to defend that the universe changes over time.	NE.SC.HS.11.1.a	Develop a model based on evidence to illustrate the stages of stars, like the sun, and the role of nuclear fusion in the sun's core to release energy that eventually reaches Earth in the form of radiation.	how the <u>stages</u> of stars and the role of nuclear fusion in a star's core <u>releases energy</u> that reaches Earth in the form of radiation. Assessment does not include details of the atomic and sub-atomic processes involved with the sun's nuclear fusion.
HS	Earth & Space Sciences	Gather, analyze, and communicate evidence to describe the interactions between society, environment, and economy.	NE.SC.HS.15.5.c	Create a computational simulation to illustrate the relationships among management of natural resources, the sustainability of human populations, and biodiversity.	Use a computational simulation to illustrate the relationships among management of natural resources, the sustainability of human populations, and biodiversity. Assessment is limited to using provided multi-parameter programs or constructing simplified spreadsheet calculations.

CONTENT AREA STANDARDS STRUCTURE

The overall structure of Nebraska's College and Career Ready Standards for Science (CCR-Science) reflects the two-tier structure common across all Nebraska content area standards. The two levels within the structure include **standards** and **indicators**. The standards are broad, overarching content-based statements that describe the basic cognitive, affective, or psychomotor expectations of student learning. The standards, across all grade levels, reflect long-term goals for learning. **Indicators** further describe what students must know and be able to do to meet the standard. These performance-based statements provide clear expectations related to student learning in each content area. Additionally, indicators provide guidance related to the assessment of student learning. This guidance is articulated by including **assessment boundary** statements.

The CCR-Science standards describe the knowledge and skills that students should learn, but they do not prescribe particular curriculum, lessons, teaching techniques, or activities. Standards describe what students are expected to know and be able to do, while the local curriculum describes how teachers will help students master the standards. A wide variety of instructional resources may be used to meet the state content area standards. Decisions about curriculum and instruction are made locally by individual school districts and classroom teachers. The Nebraska Department of Education provides guidance related to high-quality instructional materials selection and implementation. Please visit the [Nebraska Instructional Materials Collaborative](#).

In addition to a common structure for content area standards, a consistent numbering system is used for content area standards. The numbering system is as follows:

CONTENT AREA STANDARDS OVERVIEW

Nebraska Revised Statute 79-760.01 requires the State Board of Education to adopt measurable academic content standards for the areas of reading, writing, mathematics, science, and social studies. Standards describe grade-level expectations for given content areas and provide a framework upon which Nebraska districts develop, establish, and implement curriculum. For effective teaching and learning to occur, the content area standards should drive local decisions related to instructional materials, resources, and interim, formative, and summative assessments.

The Nebraska Department of Education has identified quality criteria in the development of content area standards. These criteria ensure that standards are grounded in a strong research base of human cognition, motivation, and teaching and learning and describe essential knowledge and skills for college, career, and civic readiness. The revised science standards, written by teams of Nebraska educators and reviewed by local and national experts, were developed with the following indicators of quality:

Measurable: Standards provide benchmarks against which student progress toward learning goals can be measured.

Appropriately challenging: Standards must build in complexity so that by the end of grade 12, students are prepared for postsecondary education and the workforce.

Connected: Student learning is most effective when it connects knowledge and skills to related topics and authentic applications.

Clearly worded: Content area standards must effectively communicate what students should know and be able to do.

Scaffolded: Indicators in the Nebraska content area standards scaffold student learning by sequencing connected knowledge and skills across grades so that students build and deepen understanding and ability over time.

Specific: Specificity assures that the language used in standards and indicators is sufficiently detailed to be accurately interpreted by educators

ORGANIZATION AND STRUCTURE OF COLLEGE AND CAREER READY STANDARDS FOR SCIENCE (CCR-SCIENCE)

Nebraska's College and Career Ready Standards for Science (CCR-Science) are organized by grade level for grades K-8 and by grade span in high school. K-5 standards are organized to reflect the developmental nature of learning for elementary students and attend to the learning progressions that build foundational understandings of science. By the time students reach middle school (Grades 6-8), they build on this foundation in order to develop more sophisticated understandings of science concepts through high school. The topic progression for the CCR-Science standards is included in [Appendix A: Topic Progression](#).

Within each grade level/span the standards are organized around topics, and each standard addresses one topic. Each CCR-Science standard begins with the common stem: "Gather, analyze, and communicate..." This stem highlights long-term learning goals associated with rigorous science standards and provides guidance for high quality classroom instruction. To facilitate high-quality instruction, students actively gather evidence from multiple sources related to the topics. Evidence is carefully analyzed in order to describe and explain natural phenomena, and then, students communicate their understanding of the content using a variety of tools and strategies. It is important to note that while topics are introduced in a spiraled model, they are connected, and deeper understanding at subsequent

grade levels and spans requires foundational understanding of multiple topics.

The indicators reflect the three dimensions of science learning outlined in A Framework for K-12 Science Education¹. Each CCR-Science indicator includes a disciplinary core idea, a crosscutting concept (underline), and a **science and engineering practice** (**bold**).

Disciplinary Core Ideas (DCI)

The disciplinary core ideas are the focused, limited set of science ideas identified in the Framework as necessary for ALL students throughout their education and beyond their K-12 school years to achieve scientific literacy. The limited number of disciplinary core ideas allows more time for students and teachers to engage in the science and engineering practices as they deeply explore science ideas. To allow students to continually build on and revise their knowledge and abilities, the disciplinary core ideas are built on developmental learning progressions (Appendix A).

Crosscutting Concepts (CCC)

The crosscutting concepts are used to organize and make sense of disciplinary core ideas. They serve as tools that bridge disciplinary boundaries and deepen understanding of science content. With grade-appropriate proficiency, students are expected to use patterns (cause and effect, scale, proportion, and quantity), systems and system models (energy and matter, structure and function) and stability and change as they gather, analyze, and communicate scientific understanding.

These crosscutting concepts provide structure for synthesizing knowledge from various fields into a coherent and scientifically-based view of the world.

Science and Engineering Practices (SEP)

The **science and engineering practices** are used by students to demonstrate understanding of the disciplinary core ideas and crosscutting concepts. Engaging in the practices of science and engineering helps students understand the wide range of approaches used to investigate natural phenomena and develop solutions to challenges. Students are expected to demonstrate grade-appropriate proficiency in asking questions and defining problems, developing and using models, planning and carrying out investigations, analyzing and interpreting data, using mathematics and computational thinking, constructing explanations and designing solutions, engaging in argument from evidence, and obtaining, evaluating, and communicating information as they gather, analyze, and communicate scientific information.

Each science indicator focuses on one crosscutting concept and one **science and engineering practice** as an example to guide assessment. Curriculum, instruction, and assessment should reflect authentic science practice and be phenomena-based. Furthermore, curriculum, instruction, and assessment should use crosscutting concepts and **science and engineering practices** that go beyond what is stated in the indicator to better reflect authentic science practice. Utilizing the range of SEPs and CCCs will support deeper learning and greater understanding of the DCIs.

The following table lists the disciplinary core ideas, crosscutting concepts, and **science and engineering practices**:

Science and Engineering Practices	Disciplinary Core Ideas	Crosscutting Concepts
<ul style="list-style-type: none"> Asking Questions and Defining Problems Developing and Using Models Planning and Carrying Out Investigations Analyzing and Interpreting Data Using Mathematics and Computational Thinking Constructing Explanations and Designing Solutions Engaging in Argument from Evidence Obtaining, Evaluating, and Communicating Information 	<p>LS1: From Molecules to Organisms: Structures and Processes LS2: Ecosystems: Interactions, Energy, and Dynamics LS3: Heredity: Inheritance and Variation of Traits LS4: Biological Evolution: Unity & Diversity PS1: Matter and Its Interactions PS2: Motion and Stability: Forces and Interactions PS3: Energy PS4: Waves and Their Applications in Technologies for Information Transfer ESS1: Earth's Place in the Universe ESS2: Earth's Systems ESS3: Earth and Human Activity ETS1: Engineering Design</p>	<ul style="list-style-type: none">  Patterns  Cause and Effect  Scale, Proportion, and Quantity  Systems and System Models  Energy and Matter  Structure and Function  Stability and Change

Icon Titles & Descriptions

Nebraska Connections

Opportunities to teach science using topics directly relevant to our state (e.g. Ogallala Aquifer, agriculture, Nebraska-specific flora and fauna, Nebraska's rich geologic history, etc.) are listed throughout the CCR-Science standards as "Nebraska Connections." These connections allow educators to use local, regional, and state-specific contexts for teaching, learning, and assessment. Educators should use these as recommendations for investigation with students. Additionally, assessment developers have the opportunity to use the Nebraska contexts to develop Nebraska-specific examples or scenarios from which students would demonstrate their general understanding. This approach provides the opportunity for educators to draw upon Nebraska's natural environment and rich history and resources in engineering design and scientific research to support student learning.

Civic Science Connections

Within the CCR-Science standards, opportunities to create civic science connections have been identified. These connections are designed to highlight the importance of students engaging in the study of civic ideals, principles, and practices through participation in the act of "citizen science." Citizen science is the public involvement in inquiry and discovery of new scientific knowledge. This engagement helps students build science knowledge and skills while improving social behavior, increasing engagement, and strengthening community partnerships. Citizen science projects enlist K-12 students to collect or analyze data

for real-world research studies. Citizen science, in conjunction with the CCR-Science standards, helps bridge our K-12 students with stakeholders in the community, both locally and globally.

Computer Science Connections

Natural connections between science and computer science have been identified throughout the standards, especially in the middle level and in high school as students expand their ability to use computational thinking to develop complex models and simulations of natural and designed systems. Computers and other digital tools allow students to collect, record, organize, analyze, and communicate data as they engage in science learning.

Engineering, Technology, and Applications of Science Connections

Connections to engineering, technology, and applications of science are included at all grade levels and in all domains. They highlight the interdependence of science, engineering, and technology. Additionally, these connections drive the research and development cycle where discoveries in science lead to new technologies developed using the engineering design process. These connections call attention to the effects of scientific and technological advances on society and the environment.

Engineering Design

Performance indicators for the engineering design process are intentionally embedded in all grade levels. These indicators allow students to demonstrate their ability to define problems, develop possible solutions, and improve designs. ***These indicators should be reinforced whenever students are engaged in practicing engineering design during instruction.*** Having students engage in the engineering design process will prepare them to solve challenges both in and out of the classroom.

EDUCATOR SUPPORT & RESOURCES

Implementation

Effective science teaching, learning, and assessments should integrate disciplinary core ideas, crosscutting concepts, and **science and engineering practices**. Integration of the three dimensions will allow students to explain scientific phenomena, engage in sensemaking, design solutions to problems, and build a foundation upon which they can continue to learn and be able to apply science knowledge and skills within and outside the K-12 education arena. While each indicator incorporates the three dimensions, this alone does not drive student outcomes. Ultimately, student learning depends on how the standards are translated to instructional practices.

To support educators while they explore and implement content standards, the Nebraska Department of Education has developed the [Content Area Standards Implementation Framework](#). The Framework is based on implementation science and includes stages from “Exploration” to “Deep Implementation,” the types of work and activities associated with each stage, and roles of educators in ensuring successful implementation. The goal of the framework is to guide the alignment of standards, instruction, materials, and assessment to create a coherent system of learning.

Phenomenon-based Instruction

Three-dimensional instruction offers authentic learning experiences when students engage in describing and explaining the natural world. This involves focusing the conceptual learning on anchoring and investigative phenomena to better comprehend their observations. Students utilize evidence in the sensemaking process to build concepts in their minds. Phenomena are natural, observable events that we can explain or predict using our science knowledge (the singular form of phenomena is phenomenon).

Teachers are encouraged to adopt phenomenon-based instruction to fully engage students in three-dimensional science learning. This method can be summarized in three steps:

1. Introduce a new unit or concept with a phenomenon: Start by presenting a phenomenon that is relevant to students' lives. This engages them in asking questions about their observations and fosters a desire to learn more. Many teachers already use this approach by introducing new units or concepts with tangible examples such as pictures, videos, demonstrations, or laboratory experiences.
2. Engaging in science and engineering practices: Provide opportunities for students to gather and reason about information to explain the phenomenon. Sensemaking represents a shift in science instruction where teachers refrain from giving students direct answers. Instead, they should offer multiple opportunities for students to explore the phenomenon individually and in groups, while scaffolding their learning. This approach supports students in developing an understanding of scientific concepts and constructing their own explanations for the phenomenon.
3. Communicating understanding: Ensure students have multiple opportunities to articulate their thinking about why the phenomenon occurs. To deepen their understanding, check that student explanations progress from simple descriptions of what they observe to more complex explanations and predictions of what they think is happening with the phenomenon.

Throughout this process, teachers should not provide direct answers about the phenomenon. Instead, they should facilitate experiences that help students reach an appropriate understanding. Often, this involves engaging students in scientific arguments where they challenge each other's claims and explanations using their observations and collected evidence.

Teacher Guides

The [Teacher Guides](#) were created to provide guidance for developing effective instruction aligned to Nebraska's College and Career Ready Science Standards. They are intended to support teachers, administrators, science specialists, ESU's, instructional coaches, parents, and other stakeholders as they plan instruction and assessment at a local level.

The [Teacher Guides](#) are meant as a resource document which unwraps the indicators to support teacher's understanding of the standards. They are not meant to be used by students, and therefore they are not written in student-friendly language.

Nebraska Science Classroom Formative Task Repository

[The Nebraska Science Classroom Formative Task Repository](#) is a collection of K-12 formative tasks aligned to the indicator level of the standards. Tasks were developed by Nebraska educators and cover the breadth of the standards giving students an opportunity to provide evidence of what they can know and can do related to that standard.

Graduation Requirements

The high school life science, physical science, and Earth and space science standards are intended for **ALL** students to have learned by the end of 30 credit hours of high school science courses.

Rule 10

003.05 Graduation Requirements. Each high school must require from grades nine through twelve at least 200 credit hours for graduation, for which at least 80 percent must be from the core curriculum. The number of credit hours given for a course may be less than the number of instructional units and may be increased up to 25 percent above the number of instructional units.

003.05A3 Science. Thirty credit hours of science with course content that includes biological, earth/space, and physical science concepts with corresponding science inquiry skills and laboratory experience.

Course examples that offer the scope and sequence to include all three domains are included in [Appendix B: HS Integrated Science Course Model](#).

High School Plus Standards (HSP)

The High School Plus (HSP) standards represent advanced science topics designed to enhance the rigor of general science curricula or supplement additional advanced science courses. The standards were developed using postsecondary syllabi from entry level science courses for science majors (e.g. UNL LIFE 120, CHEM 109). Introducing the content to high school students will scaffold their learning providing a bridge between high school science coursework and postsecondary level coursework. If the indicator includes HSP, it is a plus standard which is supplemental.

KINDERGARTEN

The Kindergarten standards and indicators help students gather, analyze, and communicate evidence as they formulate answers to questions tailored to student interest and current topics that may include but are not limited to:

What happens if you change how hard you push or pull an object?

Students are able to apply an understanding of the effects of different strengths or different directions of pushes and pulls on the motion of an object to analyze a design solution.

What is the weather like today and how is it different from yesterday?

Students are expected to develop understanding of patterns and variations in local weather and the purpose of weather forecasting to prepare for and respond to, severe weather.

Where do animals live and why do they live there?

Students are also expected to develop understanding of what plants and animals (including humans) need to survive and the relationship between their needs and where they live.

.....

SC.K.1 Forces and Interactions: Pushes and Pulls

SC.K.1.1 Gather, analyze, and communicate evidence of forces and their interactions.

SC.K.1.1.a **Plan and conduct an investigation to compare the effects of** different strengths or different directions of pushes and pulls on the motion of an object. Assessment is limited to different relative strengths or different directions, but not both at the same time. Assessment does not include non-contact pushes or pulls such as those produced by magnets.

SC.K.1.1.b **Analyze data to determine if a design solution works** as intended to change the speed or direction of an object with a push or a pull. Assessment does not include friction as a mechanism for change in speed.

SC.K.7 Interdependent Relationships in Ecosystems: Animals, Plants, and Their Environment

SC.K.7.2 Gather, analyze, and communicate evidence of interdependent relationships in ecosystems.

SC.K.7.2.a **Use observations to describe patterns** of what plants and animals (including humans) need to survive.

SC.K.7.2.b **Construct an argument supported by evidence for how plants and animals (including humans) can change the environment** to meet their needs.

SC.K.7.2.c **Use a model to represent the relationship between the needs** of different plants or animals (including humans) and the places they live.

 *NE plants and animals*

SC.K.7.2.d **Communicate solutions** that will increase the positive impact of humans on the land, water, air, and/or other living things in the local environment.

 *NE conservation organizations and agricultural practices*

SC.K.12 Weather and Climate

SC.K.12.3 Gather, analyze, and communicate evidence of weather and climate.

SC.K.12.3.a **Use and share observations** of local weather conditions to describe patterns over time. Assessment of quantitative observations limited to whole numbers and relative measures such as warmer/cooler.

SC.K.12.3.b **Ask questions to obtain information** about the purpose of weather forecasting to prepare for, and respond to, severe weather.

 *emphasis on blizzards, tornadoes, drought, and floods*

SC.K.12.3.c **Make observations to determine** the effect of sunlight on Earth's surface.

SC.K.12.3.d **Use tools and materials to design and build a structure** that will reduce the warming effect of sunlight on an area.

SC.K.12.3.e **Ask questions, make observations, and gather information** about a situation people want to change to **define a simple problem that can be solved** through the development of a new or improved object or tool.

GRADE 1

The grade 1 standards and indicators help students gather, analyze, and communicate evidence as they formulate answers to questions tailored to student interest and current topics that may include but are not limited to:

What happens when materials vibrate?

Students are expected to develop understanding of the relationship between sound and vibrating materials.

How are parents and their children similar and different?

The understanding is developed that young plants and animals are like, but not exactly the same as, their parents.

What happens when there is no light?

Students are expected to develop understanding of the relationship between the availability of light and the ability to see objects. The idea that light travels from place to place can be understood by students at this level through determining the effect of placing objects made with different materials in the path of a beam of light.

What objects are in the sky and how do they seem to move?

Students are able to observe, describe, and predict some patterns of the movement of objects in the sky.

What are some ways plants and animals meet their needs so they can survive and grow?

Students are also expected to develop understanding of how plants and animals use their external parts to help them survive, grow, and meet their needs as well as how the behaviors of parents and offspring help offspring survive.

.....

SC.1.2 Waves: Light and Sound

SC.1.2.1 Gather, analyze, and communicate evidence of light and sound waves.

SC.1.2.1.a **Plan and conduct investigations** to provide evidence that vibrating materials can make sound and that sound can make materials vibrate.

SC.1.2.1.b **Make observations to construct** an evidence-based explanation that objects can be seen only when illuminated.

SC.1.2.1.c **Plan and conduct an investigation** to determine the effect of placing objects made with different materials in the path of a beam of light. *Assessment does not include the speed of light.*

SC.1.2.1.d **Use tools and materials to design and build** a device that uses light or sound to solve the problem of communicating over a distance. *Assessment does not include technological details for how communication devices work.*

SC.1.6 Structure, Function, and Information Processing

SC.1.6.2 Gather, analyze, and communicate evidence to show the relationship between structure and function in living things.

SC.1.6.2.a **Use materials to design a solution** to a human problem by mimicking how plants and/or animals use their external parts to help them survive, grow, and meet their needs.

 *NE plants and animals*

SC.1.6.2.b **Develop a simple sketch, drawing, or physical model** to illustrate how the shape of an object helps it function as needed to solve a given problem.

SC.1.6.2.c **Read grade appropriate texts and use media to determine** patterns in a behavior of parents and offspring that help offspring survive.

 *NE plants and animals*

SC.1.6.2.d **Make observations to construct an evidence-based account** that young plants and animals are like, but not exactly like, their parents. Assessment does not include inheritance or animals that undergo metamorphosis or hybrids.

 *NE plants and animals*

SC.1.11 Space Systems: Patterns and Cycles

SC.1.11.3 Gather, analyze, and communicate evidence of patterns and cycles of space systems.

SC.1.11.3.a **Use observations** of the sun, moon, and stars to describe patterns that can be predicted. Assessment of star patterns is limited to stars being seen at night and not during the day.

SC.1.11.3.b **Make observations** at different times of the year to relate the amount of daylight to the time of year. Assessment is limited to relative amounts of daylight, not quantifying the hours or time of daylight.

GRADE 2

The grade 2 standards and indicators help students gather, analyze, and communicate evidence as they formulate answers to questions tailored to student interest and current topics that may include but are not limited to:

How are materials similar and different from one another and how do the properties of the materials relate to their use?

An understanding of observable properties of materials is developed by students at this level through analysis and classification of different materials.

What do plants need to grow?

Students are expected to develop an understanding of what plants need to grow and how plants depend on animals for seed dispersal and pollination.

How many types of living things live in a place?

Students are expected to compare the diversity of life in different habitats.

How does land change and what causes it to change?

Students are able to apply their understanding of the idea that wind and water can change the shape of land to compare design solutions to slow or prevent such change.

What are the different kinds of land and bodies of water?

Students are able to use information and models to identify and represent the shapes and kinds of land and bodies of water in an area and where water is found on Earth.

.....

SC.2.3 Structure and Properties of Matter

SC.2.3.1 Gather, analyze, and communicate evidence of the structure, properties, and interactions of matter.

SC.2.3.1.a **Plan and conduct an investigation** to describe and classify different kinds of materials by their observable properties.

 *Soil properties*

SC.2.3.1.b **Analyze data obtained from testing different materials** to determine which materials have the properties that are best suited for an intended purpose. *Assessment of quantitative measurements is limited to length and weight.*

SC.2.3.1.c **Analyze data** from tests of two objects, **designed to solve the same problem**, to compare the strengths and weaknesses based on the properties.

SC.2.3.1.d **Make observations to construct an evidence-based account** of how an object made of a small set of pieces can be disassembled and made into a new object.

SC.2.3.1.e **Construct an argument with evidence** that some changes caused by heating or cooling can be reversed and some cannot.

SC.2.7 Interdependent Relationships in Ecosystems

SC.2.7.2 Gather, analyze, and communicate evidence of interdependent relationships in ecosystems.

SC.2.7.2.a **Plan and conduct an investigation** to determine if plants need sunlight and water to grow. *Assessment is limited to testing one variable at a time.*

SC.2.7.2.b **Develop a simple model** that mimics the function of an animal in dispersing seeds or pollinating plants.

SC.2.7.2.c **Make observations** of plants and animals **to compare** the diversity of life in different habitats. Assessment does not include specific animal and plant names in specific habitats.

 *NE habitats*

SC.2.13 Earth's Systems: Processes That Shape the Earth

SC.2.13.3 Gather, analyze, and communicate evidence of the processes that shape the earth.

SC.2.13.3.a **Use information from several sources to provide evidence** that Earth events can occur quickly or slowly.

Assessment does not include quantitative measurements of timescales.

 *Flooding and tornadoes quickly cause change; wind slowly formed the Sandhills*

SC.2.13.3.b **Compare multiple solutions designed to** slow or prevent wind or water from changing the shape of the land.

 *Soil conservation*

SC.2.13.3.c **Develop a model to represent** the shapes and kinds of land and bodies of water in an area. Assessment does not include quantitative scaling in models.

 *Human made dams, sandbagging, windbreaks, terracing*

SC.2.13.3.d **Obtain information to identify** where water is found on Earth and that it can be solid or liquid.

 *NE water bodies*

GRADE 3

The grade 3 standards and indicators help students gather, analyze, and communicate evidence as they formulate answers to questions tailored to student interest and current topics that may include but are not limited to:

How do equal and unequal forces on an object affect the object?

Students are able to determine the effects of balanced and unbalanced forces on the motion of an object and the cause and effect relationships of electrical or magnetic interactions between two objects not in contact with each other.

How can magnets be used?

Students are able to apply their understanding of magnetic interactions to define a simple design problem that can be solved with magnets.

How do organisms vary in their traits?

Students are expected to develop an understanding of the similarities and differences of organisms' life cycles. Students develop an understanding that organisms have different inherited traits and that the environment can also affect the traits that an organism develops. In addition, students are able to construct an explanation using evidence for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing.

How are plants, animals, and environments of the past similar or different from current plants, animals, and environments?

Students are expected to develop an understanding of types of organisms that lived long ago, and also about the nature of their environments.

What happens to organisms when their environment changes?

Students are expected to develop an understanding of the idea that when the environment changes some organisms survive and reproduce, some move to new locations, some move into the transformed environment, and some die.

What is typical weather in different parts of the world and during different times of the year?

Students are able to organize and use data to describe typical weather conditions expected during a particular season.

How can the impact of weather-related hazards be reduced?

By applying their understanding of weather-related hazards, students are able to make a claim about the merit of a design solution that reduces the impacts of such hazards.

.....

SC.3.1 Forces and Interactions: Motion and Stability

SC.3.1.1 Gather, analyze, and communicate evidence of forces and their interactions.

SC.3.1.1.a **Plan and conduct an investigation** to provide evidence of the effects of balanced and unbalanced forces on the motion of an object. Assessment is limited to one variable at a time: number, size, or direction of forces. Assessment does not include quantitative force size, only qualitative and relative. Assessment is limited to gravity being addressed as a force that pulls objects down.

SC.3.1.1.b **Make observations and/or measurements** of an object's motion to provide evidence that a pattern can be used to predict future motion. Assessment does not include technical terms such as period and frequency.

SC.3.1.1.c **Ask questions** to determine cause and effect relationships of electrical or magnetic interactions between two objects not in contact with each other. Assessment is limited to forces produced by objects that can be manipulated by students. Electrical interactions are limited to static electricity.

SC.3.1.1.d **Define a simple design problem** that can be solved by applying scientific ideas about magnets.

SC.3.7 Interdependent Relationships in Ecosystems

SC.3.7.2 Gather, analyze, and communicate evidence of the interdependent relations in ecosystems.

SC.3.7.2.a **Construct an argument** that some animals form groups that help members survive.

 *NE animals*

SC.3.7.2.b **SC.3.7.2.b Analyze and interpret data** from fossils to provide evidence of the organisms and environments in which they lived long ago. Assessment does not include identification of specific fossils or present plants and animals. Assessment is limited to major fossil types and relative ages.

 *NE fossils; NE geologic history*

SC.3.7.2.c **Construct an argument with evidence** that in a particular habitat some organisms can survive well, some survive less well, and some cannot survive at all.

 *NE habitats*

SC.3.7.2.d **Make a claim about the merit of a solution to a problem** caused when the environment changes and the types of plants and animals that live there may change. Assessment is limited to a single environmental change. Assessment does not include the greenhouse effect or climate change.

 *NE habitats*

SC.3.7.2.e **Generate and compare multiple possible solutions to a problem** based on how well each is likely to meet the criteria and constraints of the problem.

SC.3.9 Inheritance and Variation: Life Cycles and Traits

SC.3.9.3 Gather and analyze data to communicate an understanding of inheritance and variation of traits through life cycles and environmental influences.

SC.3.9.3.a **Develop models** to describe that organisms have unique and diverse life cycles but all have in common birth, growth, reproduction, and death. Assessment of plant life cycles is limited to those of flowering plants. Assessment does not include details of human reproduction.

 *NE plants and animals*

SC.3.9.3.b **Analyze and interpret data** to provide evidence that plants and animals have traits inherited from parents and that variation of these traits exists in a group of similar organisms. Assessment does not include genetic mechanisms of inheritance and prediction of traits. Assessment is limited to non-human examples.

 *NE plants and animals*

SC.3.9.3.c **Use evidence to support the explanation** that traits can be influenced by the environment.

 *NE plants, animals, and habitats*

SC.3.9.3.d **Use evidence to construct an explanation** for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing.

 *NE plants, animals, and habitats*

SC.3.12 Weather and Climate

SC.3.12.4 Gather and analyze data to communicate an understanding of weather and climate.

SC.3.12.4.a **Represent data** in table, pictograph, and bar graph displays to describe typical weather conditions expected during a particular season. Assessment of graphical displays is limited to pictographs and bar graphs. Assessment does not include climate change.

 *NE weather and climate*

SC.3.12.4.b **Obtain and combine information** to describe climates in different regions of the world.

SC.3.12.4.c **Make a claim about the merit of a design solution** that reduces the impacts of a weather-related hazard.

GRADE 4

The grade 4 standards and indicators help students gather, analyze, and communicate evidence as they formulate answers to questions tailored to student interest and current topics that may include but are not limited to:

What are waves and what are some of the things they can do?

Students are able to use a model of waves to describe patterns of waves in terms of amplitude and wavelength, and that waves can cause objects to move.

What is energy and how is it related to motion?

Students are able to use evidence to construct an explanation of the relationship between the speed of an object and the energy of that object.

How is energy transferred?

Students are expected to develop an understanding that energy can be transferred from place to place by sound, light, heat, and electrical currents or from object to object through collisions.

How can energy be used to solve a problem?

They apply their understanding of energy to design, test, and refine a device that converts energy from one form to another.

How do internal and external structures support the survival, growth, behavior, and reproduction of plants and animals?

Students are expected to develop an understanding that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction. By developing a model, students describe that an object can be seen when light reflected from its surface enters the eye.

.....

SC.4.2 Waves: Waves and Information

SC.4.2.1 Gather, analyze, and communicate evidence of waves and the information they transfer.

SC.4.2.1.a **Develop a model** of waves to describe patterns in terms of amplitude and wavelength and that waves can cause objects to move. Assessment does not include interference effects, electromagnetic waves, non-periodic waves, or quantitative models of amplitude and wavelength.

SC.4.2.1.b **Generate and compare multiple solutions** that use patterns to transfer information.

SC.4.4 Energy: Conservation and Transfer

SC.4.4.2 Gather, analyze and communicate evidence of energy conservation and transfer.

SC.4.4.2.a Use evidence to **construct an explanation** relating the speed of an object to the energy of that object. Assessment does not include quantitative measures of changes in the speed of an object or on any precise or quantitative definition of energy.

SC.4.4.2.b **Make observations** to provide evidence that energy can be transferred from place to place by sound, light, heat, and electrical currents. Assessment does not include quantitative measurements of energy.

 *NE energy producers*

SC.4.4.2.c **Ask questions** and predict outcomes about the changes in energy that occur when objects collide. Assessment does not include quantitative measurements of energy.

SC.4.4.2.d Apply scientific ideas to **design, test, and refine a device** that converts energy from one form to another. Devices should be limited to those that convert motion energy to electric energy or use stored energy to cause motion or produce light or sound.

SC.4.4.2.e **Plan and carry out fair tests in which variables are controlled** and failure points are considered to identify aspects of a model or prototype that can be improved.

SC.4.4.2.f **Obtain and combine information** to describe that energy and fuels are derived from natural resources and that their uses affect the environment.

 *NE ethanol production*

SC.4.6 Structure, Function, and Information Processing

SC.4.6.3 Gather and analyze data to communicate an understanding of structure, function and information processing of living things.

SC.4.6.3.a **Develop a model** to describe that light reflecting from objects and entering the eyes allows objects to be seen. Assessment does not include knowledge of specific colors reflected and seen, the cellular mechanisms of vision, or how the retina works.

SC.4.6.3.b **Construct an argument** that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction. Assessment is limited to macroscopic structures within plant and animal systems.

 *NE plants and animals*

SC.4.6.3.c **Use a model** to describe that animals receive different types of information through their senses, process the information in their brain, and respond to the information. Assessment does not include the mechanisms by which the brain stores and recalls information or the mechanisms of how sensory receptors function.

 *NE plants and animals*

SC.4.13 Earth's Systems: Processes That Shape the Earth

SC.4.13.4 Gather and analyze data to communicate an understanding of Earth's systems and processes that shape the Earth.

SC.4.13.4.a **Identify evidence** from patterns in rock formations and fossils in rock layers to support an explanation for changes in a landscape over time. Assessment does not include specific knowledge of the mechanism of rock formation or memorization of specific rock formations and layers. Assessment is limited to relative time.

 *NE fossils and geologic history*

SC.4.13.4.b **Make observations and/or measurements** to provide evidence of the effects of weathering or the rate of erosion by water, ice, wind, or vegetation. Assessment is limited to a single form of weathering or erosion.

SC.4.13.4.c **Analyze and interpret data** from maps to describe patterns of Earth's features.

SC.4.13.4.d **Generate and compare multiple solutions** to reduce the impacts of natural Earth processes on humans.
Assessment is limited to earthquakes, floods, tsunamis, and volcanic eruptions.

GRADE 5

The grade 5 standards and indicators help students gather, analyze, and communicate evidence as they formulate answers to questions tailored to student interest and current topics that may include but are not limited to:

When matter changes, does its weight (mass) change?

Students are able to describe that matter is made of particles too small to be seen through the development of a model. Students develop an understanding of the idea that regardless of the type of change that matter undergoes, the total weight of matter is conserved.

Can new substances be created by combining other substances?

Students determine whether the mixing of two or more substances results in new substance.

How does matter cycle through ecosystems and where does the energy in food come from and what is it used for?

Students develop an understanding of the idea that plants get the materials they need for growth chiefly from air and water. Using models, students can describe the movement of matter among plants, animals, decomposers, and the environment and that energy in animals' food was once energy from the sun.

How much water can be found in different places on Earth and how does water move through the Earth system?

Students describe and graph data to provide evidence about the distribution of water on Earth. Through the development of a model using an example students are able to describe ways the geosphere, biosphere, hydrosphere, and/or atmosphere interact. This model will also allow students to define a simple design problem that relates to the conservation of fresh water.

How do lengths and directions of shadows or relative lengths of day and night change from day to day, and how does the appearance of some stars change in different seasons?

Students are expected to develop an understanding of patterns of daily changes in length and direction of shadows, day and night, and the seasonal appearance of some stars in the night sky.

.....

SC.5.3 Structure and Properties of Matter

SC.5.3.1 Gather, analyze, and communicate evidence of structure and properties of matter.

SC.5.3.1.a **Develop a model** to describe that matter is made of particles too small to be seen. Assessment does not include the atomic-scale mechanism of evaporation and condensation or defining the unseen particles.

SC.5.3.1.b **Measure and graph quantities** to provide evidence that regardless of the type of change that occurs when heating, cooling, or mixing substances, the total weight of matter is conserved. Assessment does not include distinguishing mass and weight.

SC.5.3.1.c **Make observations and measurements** to identify materials based on their properties. Assessment does not include density or distinguishing mass and weight.

SC.5.3.1.d **Conduct an investigation** to determine whether the mixing of two or more substances results in new substances.

SC.5.8 Matter and Energy in Organisms and Ecosystems

SC.5.8.2 Gather and analyze data to communicate understanding of matter and energy in organisms and ecosystems.

SC.5.8.2.a **Use models** to describe that energy in animals' food (used for body repair, growth, and motion and to maintain body warmth) was once energy from the sun.

SC.5.8.2.b **Support an argument** that plants get the materials they need for growth chiefly from air and water.

SC.5.8.2.c **Develop a model** to describe the movement of matter among plants, animals, decomposers, and the environment. Assessment does not include molecular explanations or the biochemical mechanisms of photosynthesis.

 *NE ecosystems*

SC.5.11 Space Systems: Earth's Stars and Solar System

SC.5.11.3 Gather and analyze data to communicate understanding of space systems: Earth's stars and solar system.

SC.5.11.3.a **Support an argument** that the gravitational force exerted by Earth on objects is directed down toward Earth's center. Assessment does not include mathematical representation of gravitational force.

SC.5.11.3.b **Support an argument** that differences in the apparent brightness of the sun compared to other stars is due to their relative distances from Earth. Assessment is limited to relative distances, not sizes, of stars. Assessment does not include other factors that affect apparent brightness (such as stellar masses, age, and stage).

SC.5.11.3.c **Represent data in graphical displays** to reveal patterns of daily changes in the length and direction of shadows, length of day and night, and the seasonal appearance of some stars in the night sky. Assessment does not include causes of seasons.

SC.5.13 Earth's Systems

SC.5.13.4 Gather and analyze data to communicate understanding of Earth's systems.

SC.5.13.4.a **Develop a model** using an example to describe ways the geosphere, biosphere, hydrosphere, and/or atmosphere interact. Assessment is limited to the interactions of two systems at a time.

 *NE systems*

SC.5.13.4.b **Describe and graph** the amounts of salt water and fresh water in various reservoirs to provide evidence about the distribution of water on Earth. Assessment is limited to oceans, lakes, rivers, glaciers, groundwater, and polar ice caps but does not include the atmosphere.

 *NE bodies of water*

SC.5.13.4.c **Obtain and combine information** about ways individual communities use science ideas to protect the Earth's resources and environment.

 *NE conservation organizations*

SC.5.13.4.d **Define a simple design problem** that can be solved by applying scientific ideas about the conservation of fresh water on Earth.

 *NE conservation organizations*

SC.5.13.4.e **Define a simple design problem** reflecting a need or a want that includes specified criteria for success and constraints on materials, time, or cost.

GRADE 6

The grade 6 standards and indicators help students gather, analyze, and communicate evidence as they formulate answers to questions tailored to student interest and current topics that may include but are not limited to:

How can energy be transferred from one object or system to another?

Students are expected to know the difference between energy and temperature and begin to develop an understanding of the relationship between force and energy. Students are also expected to apply an understanding of design to the process of energy transfer.

How do the structures of organisms contribute to life's functions?

Students are expected to understand that all organisms are made of cells, that special structures are responsible for particular functions in organisms, and that for many organisms the body is a system of multiple interacting subsystems that form a hierarchy from cells to the body.

How do organisms grow, develop, and reproduce?

Students are expected to explain how select structures, functions, and behaviors of organisms change in predictable ways as they progress from birth to old age.

What factors interact and influence weather and climate?

Students are expected to construct and use models to develop an understanding of the factors that determine weather and climate. A systems approach is also important here, examining the feedbacks between systems as energy from the sun is transferred between systems and circulates through the oceans and atmosphere.

How does water move through Earth's systems?

Students understand how Earth's geosystems operate by modeling the flow of energy and cycling of matter within and among different systems.

.....

SC.6.4 Energy

SC.6.4.1 Gather, analyze, and communicate evidence of energy.

SC.6.4.1.a Apply scientific principles to **design, construct, and test a device** that either minimizes or maximizes thermal energy transfer. Assessment does not include calculating the total amount of thermal energy transferred.

SC.6.4.1.b **Define the criteria and constraints of a design problem** with sufficient precision to ensure a successful solution, taking into account relevant scientific principle and potential impacts on people and the natural environment that may limit possible solutions.

SC.6.4.1.c **Plan an investigation** to determine the relationships among the energy transferred, type of matter, mass, and change in average kinetic energy of particles as measured by the temperature of the sample. Assessment does not include calculating the total amount of thermal energy transferred.

SC.6.4.1.d **Construct, use, and present arguments** to support the claim that when kinetic energy of an object changes, energy is transferred to or from the object. Assessment does not include calculations of energy.

SC.6.6 Structure and Function and Information Processing

SC.6.6.2 Gather, analyze, and communicate evidence of the relationship between structure and function in living things.

SC.6.6.2.a **Conduct an investigation** to provide evidence that living things are made of cells; either one cell or many varied cells.

SC.6.6.2.b **Develop and use a model** to describe the function of a cell as a whole and ways parts of a cell contribute to the function. Assessment of organelle structure/function relationships is limited to the cell wall and cell membrane. Assessment of the function of the other organelles is limited to their relationship to the whole cell. Assessment does not include the biochemical function of cells or cell parts.

SC.6.6.2.c **Use argument supported by evidence** for how the body is a system of interacting subsystems composed of groups of cells. Assessment does not include the mechanism of one body system independent of others. Assessment is limited to the circulatory, excretory, digestive, respiratory, muscular, and nervous systems.

SC.6.6.2.d **Gather and synthesize information** that sensory receptors respond to stimuli by sending messages to the brain for immediate behavior or stored as memories. Assessment does not include mechanisms for the transmission of this information.

SC.6.9 Growth, Development, and Reproduction of Organisms

SC.6.9.3 Gather, analyze, and communicate evidence of the inheritance and variation of traits.

SC.6.9.3.a **Construct an argument** based on evidence for how plant and animal adaptations affect the probability of successful reproduction.

 *monarchs/milkweed; seed dispersal in prairie grasses*

SC.6.9.3.b **Construct a scientific explanation** based on evidence for how environmental and genetic factors influence the growth of organisms. Assessment does not include genetic mechanisms, gene regulation, or biochemical processes.

 *NE plants and animals*

SC.6.9.3.c **Develop and use a model** to describe why asexual reproduction results in offspring with identical genetic information and sexual reproduction results in offspring with genetic variation. Assessment does not include specific changes at the molecular level, mechanisms for protein synthesis, or specific types of mutations.

SC.6.12 Weather and Climate

SC.6.12.4 Gather, analyze, and communicate evidence of factors and interactions that affect weather and climate.

SC.6.12.4.a **Collect data** to provide evidence for how the motions and complex interactions of air masses result in changes in weather conditions. Assessment does not include recalling the names of cloud types or weather symbols used on weather maps or the reported diagrams from weather stations.

 *NE weather conditions*

SC.6.12.4.b **Develop and use a model** to describe how unequal heating and rotation of the Earth cause patterns of atmospheric and oceanic circulation that determine regional climates. Assessment does not include the dynamics of the Coriolis effect.

SC.6.12.4.c **Ask questions** to clarify evidence of the factors that have caused the change in global temperatures over thousands of years.

SC.6.12.4.d **Analyze and interpret data** on weather and climate to forecast future catastrophic events and inform the development of technologies to mitigate their effect.

SC.6.13 Earth's Systems

SC.6.13.5 Gather, analyze, and communicate evidence of the flow of energy and cycling of matter associated with Earth's materials and processes.

SC.6.13.5.a **Develop a model** to describe how the water cycle is driven by the sun's energy and the force of gravity.

A quantitative understanding of the latent heat of vaporization and fusion is not assessed.

 NE systems

GRADE 7

The grade 7 standards and indicators help students gather, analyze, and communicate evidence as they formulate answers to questions tailored to student interest and current topics that may include but are not limited to:

How does thermal energy affect particles?

Students will be able to provide molecular level descriptions that explain states of matter and changes between states.

Why do different pure substances have different physical and chemical properties and how do those properties determine how substances are used?

Students are expected to understand what occurs at the atomic molecular scales.

What happens when new materials are formed?

Students are expected to provide molecular level descriptions to explain that chemical reactions involve regrouping of atoms to form new substances and that atoms rearrange during chemical reactions.

How do organisms obtain and use energy?

Students are expected to use conceptual and physical models to explain the transfer of energy and cycling of matter as they construct explanations for the role of photosynthesis in cycling matter in ecosystems.

How does matter and energy move through an ecosystem?

Students are expected to construct explanations for the cycling of matter in organisms and the interaction of organisms to obtain matter and energy from an ecosystem to survive and grow.

How do organisms interact with other organisms in the physical environment to obtain matter and energy?

Students are expected to understand that organisms and populations of organisms are dependent on their environmental interactions both with other organisms and with non-living factors.

How do people figure out that Earth and life on Earth have changed over time?

Students are expected to examine geoscience data in order to understand the processes and events in Earth's history.

How do the materials in and on Earth's crust change over time?

Students are expected to understand how Earth's geosystems operate by modeling the flow of energy and the cycling of matter within and among different systems.

How do human activities affect Earth's systems?

Students are expected to understand the ways that human activities impact Earth's other systems

.....

SC.7.3 Structure and Properties of Matter

SC.7.3.1 Gather, analyze, and communicate evidence of the structure, properties, and interactions of matter.

SC.7.3.1.a **Develop models** to describe the atomic composition of simple molecules. Assessment does not include valence electrons and bonding energy, discussing the ionic nature of subunits of complex structures, or a complete description of all individual atoms in a complex molecule or extended structure is not required.

SC.7.3.1.b **Gather and make sense of information** to describe how natural materials may undergo chemical reactions to create new synthetic materials and have an impact on society. Assessment is limited to qualitative information.

SC.7.3.1.c **Develop a model** that predicts and describes changes in particle motion, temperature, and state of a pure substance when thermal energy is added or removed.

SC.7.5 Chemical Reactions

SC.7.5.2 Gather, analyze, and communicate evidence of chemical reactions.

SC.7.5.2.a **Analyze and interpret data** on the properties of substances before and after the substances interact to determine if a chemical reaction has occurred. Assessment is limited to analysis of the following properties: density, melting point, boiling point, solubility, flammability, and odor.

SC.7.5.2.b **Develop and use a model** to describe how the total number of atoms does not change in a chemical reaction and thus mass is conserved. Assessment does not include the use of atomic masses, balancing symbolic equations, or intermolecular forces.

SC.7.5.2.c **Undertake a design project** to construct, test, and modify a device that either releases or absorbs thermal energy by chemical processes. Assessment is limited to the criteria of amount, time, and temperature of substance in testing the device.

SC.7.5.2.d **Analyze data from tests** to determine similarities and differences among several design solutions to identify the best characteristics of each that can be combined into a new solution to better meet the criteria for success.

SC.7.7 Interdependent Relationships in Ecosystems

SC.7.7.3 Gather, analyze, and communicate evidence of interdependent relationships in ecosystems.

SC.7.7.3.a **Construct an explanation** that predicts patterns of interactions among organisms across multiple ecosystems.

 *NE ecosystems*

SC.7.7.3.b **Develop and use a model** to describe how stable ecosystems maintain biodiversity and ecosystem services.

 *NE endangered species and reintroduction of species*

SC.7.7.3.c **Evaluate competing design solutions** using a systematic process to determine how well they meet the criteria and constraints of the problem.

SC.7.7.3.d Apply scientific principles to **design a method for monitoring and increasing positive human impact** on the environment.

SC.7.8 Matter and Energy in Organisms and Ecosystems

SC.7.8.4 Gather, analyze, and communicate evidence of the flow of energy and cycling of matter in organisms and ecosystems.

SC.7.8.4.a **Construct a scientific explanation** based on evidence for the role of photosynthesis in the cycling of matter and flow of energy into and out of organisms. Assessment does not include the biochemical mechanisms of photosynthesis.

 *NE food webs*

SC.7.8.4.b **Develop a model** to describe how food is rearranged through chemical reactions forming new molecules that support growth and/or release energy as matter moves through an organism. Assessment does not include details of the chemical reactions for photosynthesis or respiration.

SC.7.8.4.c **Analyze and interpret data** to provide evidence for the effects of resource availability on organisms and populations of organisms in an ecosystem.

 *NE plants and animals*

SC.7.8.4.d **Develop a model** to describe the cycling of matter and flow of energy among living and nonliving parts of an ecosystem. Assessment does not include the use of chemical reactions to describe the processes.

 *NE ecosystems*

SC.7.8.4.e **Construct an argument** supported by evidence that changes to physical or biological components of an ecosystem affect populations.

 *NE ecosystems*

SC.7.13 Earth's Systems

SC.7.13.5 Gather, analyze, and communicate evidence of the flow of energy and cycling of matter associated with Earth's materials and processes.

SC.7.13.5.a **Develop a model** to describe the cycling of Earth's materials and the flow of energy that drives this process. Assessment does not include the identification and naming of minerals.

SC.7.13.5.b **Construct a scientific explanation** based on evidence for how the uneven distributions of Earth's mineral, energy, and groundwater resources are the result of past and current geoscience processes.

 *NE resources*

SC.7.13.5.c **Construct an argument** supported by evidence for how increases in human population and per-capita consumption of natural resources impact Earth's systems.

 *Food security and NE agriculture*

SC.7.14 History of Earth

SC.7.14.6 Gather, analyze, and communicate evidence to explain Earth's history.

SC.7.14.6.a **Construct an explanation** based on evidence for how geoscience processes have changed Earth's surface at varying time and spatial scales.

 *NE geographic features*

SC.7.14.6.b **Analyze and interpret data** on the distribution of fossils and rocks, continental shapes, and seafloor structures to provide evidence of past plate motions. Paleomagnetic anomalies in oceanic and continental crust are not assessed.

SC.7.14.6.c **Analyze and interpret data** on geologic hazards to forecast future catastrophic events and inform the development of technologies to mitigate their effects.

GRADE 8

The grade 8 standards and indicators help students gather, analyze, and communicate evidence as they formulate answers to questions tailored to student interest and current topics that may include but are not limited to:

How can one describe physical interactions between objects and within systems of objects?

Students will be expected to apply Newton's Third Law of Motion to relate forces to explain the motion of objects. Students also apply ideas about gravitational, electrical, and magnetic forces to explain a variety of phenomena including beginning ideas about why some materials attract each other while other repel.

How does the energy of an object change related to its mass, speed, and position in a system?

Students understand that objects that are moving have kinetic energy and that objects may also contain stored (potential) energy, depending on their relative positions.

What are the characteristic properties of waves and how can they be used?

Students are expected to describe and predict characteristic properties and behaviors of waves when the waves interact with matter. Students can apply an understanding of waves as a means to send digital information.

What factors cause genes to change and how does that affect the structure and function of organisms?

Students are expected to understand the ways humans can select for specific traits, the role of technology, genetic modification, and the nature of ethical responsibilities related to selective breeding.

How does genetic variation among organisms in a species affect survival and reproduction? How does the environment influence genetic traits in populations over multiple generations?

Students are expected to analyze data from the fossil record to describe evidence of the history of life on Earth and can construct explanations for similarities in organisms. They have a beginning understanding of the role of variation in natural selection and how this leads to speciation.

What is Earth's place in the Universe? What makes up our solar system and how can the motion of Earth explain seasons and eclipses?

Students are expected to examine the Earth's place in relation to the solar system, Milky Way galaxy, and universe. There is a strong emphasis on a systems approach, using models of the solar system to explain astronomical and other observations of the cyclic patterns of eclipses, tides, and seasons

.....

SC.8.1 Forces and Interactions

SC.8.1.1 Gather, analyze, and communicate evidence of forces and interactions.

SC.8.1.1.a Apply Newton's Third Law to **design a solution** to a problem involving the motion of two colliding objects.
Assessment is limited to vertical or horizontal interactions in one dimension.

SC.8.1.1.b **Develop a model** to generate data for iterative testing and modification of a proposed object, tool, or process such that an optimal design can be achieved.

SC.8.1.1.c **Plan an investigation** to provide evidence of Newton's Laws that the change in an object's motion depends on the sum of the forces on the object and the mass of the object. Assessment is limited to forces and changes in motion in one-dimension in an inertial reference frame and to change in one variable at a time; does not include use of trigonometry.

SC.8.1.1.d **Ask questions** about data to determine the factors that affect the strength of electrical and magnetic forces. Assessment about questions that require quantitative answers is limited to proportional reasoning and algebraic thinking.

SC.8.1.1.e **Construct and present arguments** using evidence to support the claim that gravitational interactions are attractive and depend on both the mass and distance of interacting objects. Assessment does not include Newton's Law of Gravitation or Kepler's Laws.

SC.8.1.1.f **Conduct an investigation** and evaluate the experimental design to provide evidence that electrical and magnetic fields exist between objects exerting forces on each other even though the objects are not in contact. Assessment is limited to electric and magnetic fields, and limited to qualitative evidence for the existence of fields.

SC.8.2 Waves and Electromagnetic Radiation

SC.8.2.2 Gather, analyze, and communicate evidence of waves and electromagnetic radiation.

SC.8.2.2.a **Use mathematical representations** to describe a simple model for waves that includes how the amplitude of a wave is related to the energy in a wave. Assessment does not include electromagnetic waves and is limited to standard repeating waves.

SC.8.2.2.b **Develop and use a model** to describe that Light and mechanical waves are reflected, absorbed, or transmitted through various materials. Assessment is limited to qualitative applications pertaining to light and mechanical waves.

SC.8.2.2.c **Gather and make sense of information** to support the claim that the structure of analog and digital signals allows for encoding and transmission of information.

SC.8.4 Energy

SC.8.4.3 Gather, analyze, and communicate evidence of energy.

SC.8.4.3.a **Construct and interpret graphical displays of data** to describe the relationships of kinetic energy to the mass and speed of an object.

SC.8.4.3.b **Develop a model** to describe that when the arrangement of objects interacting at a distance changes, then different amounts of potential energy are stored in the system. Assessment is limited to two objects. Assessment is limited to electric, magnetic, and gravitational interactions.

SC.8.9 Heredity: Inheritance and Variation of Traits

SC.8.9.4 Gather, analyze, and communicate evidence of the inheritance and variation of traits.

SC.8.9.4.a **Develop and use a model** to describe why structural changes to genes (mutations) may result in harmful, beneficial, or neutral effects to structure and function of organisms. Assessment does not include specific changes at the molecular level, mechanisms for protein synthesis, or specific types of mutations.

SC.8.9.4.b **Gather and synthesize information** about technologies that have changed the way humans influence inheritance of desired traits in organisms.

 *NE agriculture practices*

SC.8.10 Natural Selection and Adaptations

SC.8.10.5 Gather, analyze, and communicate evidence of natural selection and adaptations.

SC.8.10.5.a **Analyze and interpret data** for patterns in the fossil record that document the existence, diversity, extinction, and change of life forms throughout the history of life on Earth under the assumption that natural laws operate today as in the past. Assessment does not include the names of individual species or geological eras in the fossil record.

 *NE Geological History*

SC.8.10.5.b **Apply scientific ideas to construct an explanation** for the anatomical similarities and differences among and between modern and fossil organisms to infer evolutionary relationships.

 *NE Geological History*

SC.8.10.5.c **Construct an explanation** based on evidence that describes how genetic variations of traits in a population increase some individuals' probability of surviving and reproducing in a specific environment.

SC.8.10.5.d **Use mathematical representations** to support explanations of how natural selection may lead to increases and decreases of specific traits in populations over time. Assessment does not include Hardy Weinberg calculations.

 *NE plants and animals*

SC.8.11 Space Systems

SC.8.11.6 Gather, analyze, and communicate evidence of the interactions among bodies in space.

SC.8.11.6.a **Develop and use a model** of the Earth-sun-moon system to describe the cyclic patterns of lunar phases, eclipses of the sun and moon, and seasons.

SC.8.11.6.b **Develop and use a model to describe** the role of gravity in the motions within the galaxy and the solar system. Assessment does not include Kepler's Laws of orbital motion or the apparent retrograde motion of planets as viewed from Earth.

SC.8.11.6.c **Analyze and interpret data** to determine scale properties of objects in the solar system. Assessment does not include recalling facts about properties of the planets and other solar system bodies.

SC.8.14 History of Earth

SC.8.14.7 Gather, analyze, and communicate evidence to explain Earth's history.

SC.8.14.7.a **Construct a scientific explanation** based on evidence found within rock strata, including index fossils, for how the geologic time scale is used to organize Earth's 4.6-billion-year-old history. Assessment does not include recalling the names of specific periods or epochs and events within them.

 *NE Geological History*

HS PHYSICAL SCIENCES

The physical science standards and indicators help students gather, analyze, and communicate evidence as they formulate answers to questions tailored to student interest and current topics that may include but are not limited to:

How can one explain the structure and properties of matter?

Students are expected to develop understanding of the substructure of atoms and provide more mechanistic explanations of the properties of substances. Students are able to use the periodic table as a tool to explain and predict the properties of elements.

How do substances combine or change (react) to make new substances? How does one characterize and explain these reactions and make predictions about them?"

Students will be able to explain important biological and geophysical phenomena. Students are also able to apply an understanding of the process of optimization in engineering design to chemical reaction systems.

How can one explain and predict interactions between objects and within systems of objects?

Students are expected to build an understanding of forces and interactions, total momentum of a system of objects is conserved when there is no net force on the system, and predict the gravitational and electrostatic forces between objects. Students are able to apply scientific and engineering ideas to design, evaluate, and refine a device that minimizes the force on a macroscopic object during a collision.

How is energy transferred and conserved?

Students are expected to develop an understanding that energy at both the macroscopic and the atomic scale can be accounted for as either motions of particles or energy associated with the configuration (relative positions) of particles. In some cases, the energy associated with the configuration of particles can be thought of as stored in fields.

How are waves used to transfer energy and send and store information?

Students are expected to apply understanding of how wave properties and the interactions of electromagnetic radiation with matter can transfer information across long distances, store information, and investigate nature on many scales.

SC.HS.1 Forces and Interactions

SC.HS.1.1 Gather, analyze, and communicate evidence of forces and interactions.

SC.HS.1.1.a **Analyze data** to support the claim that Newton's Second Law of Motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration. Assessment is limited to one-dimensional motion and to macroscopic objects moving at non-relativistic speeds.

SC.HS.1.1.b **Use mathematical representations** to support the claim that the total momentum of a system of objects is conserved when there is no net force on the system. Assessment is limited to systems of two macroscopic bodies moving in one dimension.

 *NE roadside and highway safety*

SC.HS.1.1.c **Apply science and engineering ideas to design, evaluate, and refine** a device that minimizes the force on a macroscopic object during a collision. Assessment is limited to qualitative evaluations and/or algebraic manipulations.

SC.HS.1.1.d **Use mathematical representations** of Newton's Law of Gravitation and Coulomb's Law to describe and predict the gravitational and electrostatic forces between objects. Assessment is limited to systems with two objects.

SC.HS.1.1.e **Plan and conduct an investigation** to provide evidence that an electrical current can produce a magnetic field and that a changing magnetic field can produce an electrical current. Assessment is limited to designing and conducting investigations with provided materials and tools.

 *NE energy producers*

SC.HS.2 Waves and Electromagnetic Radiation

SC.HS.2.2 Gather, analyze, and communicate evidence of the interactions of waves.

SC.HS.2.2.a **Use mathematical representations** to support a claim regarding relationships among the frequency, wavelength, and speed of waves traveling in various media. Assessment is limited to algebraic relationships and describing those relationships qualitatively.

SC.HS.2.2.b **Evaluate claims** about the advantages of digital transmission and storage of information.

SC.HS.2.2.c **Evaluate the claims, evidence, and reasoning** behind the idea that electromagnetic radiation can be described either by a wave model or a particle model, and that for some situations one model is more useful than the other. Assessment does not include using quantum theory.

SC.HS.2.2.d **Evaluate the validity and reliability of claims** in published materials of the effects that different frequencies of electromagnetic radiation have when absorbed by matter. Assessment is limited to qualitative descriptions.

SC.HS.2.2.e **Communicate technical information** about how some technological devices use the principles of wave behavior and wave interactions with matter to transmit and capture information and energy. Assessments are limited to qualitative information. Assessments do not include band theory.

SC.HS.3 Structure and Properties of Matter

SC.HS.3.3 Gather, analyze, and communicate evidence of the structure, properties, and interactions of matter.

SC.HS.3.3.a **Use the periodic table as a model** to predict the relative properties of elements based on the patterns of electrons in the outermost energy level of atoms. Assessment is limited to main group elements. Assessment does not include quantitative understanding of ionization energy beyond relative trends.

 *NE Geology*

SC.HS.3.3.b **Plan and conduct an investigation** to gather evidence to compare the structure of substances at the macro scale to infer the strength of electrical forces between particles. Assessment does not include Raoult's law calculations of vapor pressure.

SC.HS.3.3.c **Develop models** to illustrate the changes in the composition of the nucleus of the atom and the energy released during the processes of fission, fusion, and radioactive decay. Assessment does not include quantitative calculation of energy released. Assessment is limited to alpha, beta, and gamma radioactive decays.

 *NE Geologic history and nuclear power production*

SC.HS.3.3.d **Communicate scientific and technical information** about why the molecular-level structure is important in the functioning of designed materials. Assessment is limited to provided molecular structures of specific designed materials.

 *NE manufacturers*

SC.HS.4 Energy

SC.HS.4.4 Gather, analyze, and communicate evidence of the interactions of energy.

SC.HS.4.4.a **Create a computational model** to calculate the change in the energy of one component in a system when the change in energy of the other component(s) and energy flows in and out of the system are known. Assessment is limited to basic algebraic expressions or computations; to systems of two or three components; and to thermal energy, kinetic energy, and/or the energies in gravitational, magnetic, or electric fields.

SC.HS.4.4.b **Develop and use models** to illustrate that energy at the macroscopic scale can be accounted for as a combination of energy associated with the motion of particles (objects) and energy associated with the relative positions of particles (objects).

SC.HS.4.4.c **Design, build, and refine a device** that works within given constraints to convert one form of energy into another form of energy. Assessment for quantitative evaluations is limited to total output for a given input. Assessment is limited to devices constructed with materials provided to students.

 *NE energy producers*

SC.HS.4.4.d **Analyze a major global challenge** to specify qualitative and quantitative criteria and constraints for solutions that account for societal needs and wants.

SC.HS.4.4.e **Plan and conduct an investigation** to provide evidence that the transfer of thermal energy when two components of different temperature are combined within a closed system results in a more uniform energy distribution among the components in the system (second law of thermodynamics). Assessment is limited to investigations based on materials and tools provided to students.

SC.HS.4.4.f **Develop and use a model** of two objects interacting through electrical or magnetic fields to illustrate the forces between objects and the changes in energy of the objects due to the interaction. Assessment is limited to systems containing two objects.

SC.HS.5 Chemical Reactions

SC.HS.5.5 Gather, analyze, and communicate evidence of chemical reactions.

SC.HS.5.5.a **Construct and revise an explanation** for the outcome of a simple chemical reaction based on the outermost electron states of atoms, trends in the periodic table, and knowledge of the patterns of chemical properties. Assessment is limited to chemical reactions involving main group elements and combustion reactions.

 *NE energy and ethanol production*

SC.HS.5.5.b **Develop a model** to illustrate that the release or absorption of energy from a chemical reaction system depends on the changes in total bond energy. Assessment does not include calculating the total bond energy changes during a chemical reaction from the bond energies of reactants and products.

 *NE energy and ethanol production*

SC.HS.5.5.c **Apply scientific principles** and evidence to provide an explanation about the effects of changing the temperature or concentration of the reacting particles on the rate at which a reaction occurs. Assessment is limited to simple reactions in which there are only two reactants; evidence from temperature, concentration, and rate data; and qualitative relationships between rate and temperature.

 *NE energy and ethanol production*

SC.HS.5.5.d **Refine the design** of a chemical system by specifying a change in conditions that would produce increased amounts of products at equilibrium. Assessment is limited to specifying the change in only one variable at a time. Assessment does not include calculating equilibrium constants and concentrations.

 *NE energy and ethanol production*

SC.HS.5.5.e **Design a solution** to a complex real-world problem by breaking it down into smaller, more manageable problems that can be solved through engineering.

SC.HS.5.5.f **Use mathematical representations** to support the claim that atoms, and therefore mass, are conserved during a chemical reaction. Assessment does not include complex chemical reactions.

 *NE energy and ethanol production*

HS LIFE SCIENCES

The life science standards and indicators help students gather, analyze, and communicate evidence as they formulate answers to questions tailored to student interest and current topics that may include but are not limited to:

How do the structures of organisms enable life's functions?

Students are expected to investigate explanations for the structure and function of cells as the basic units of life, the hierarchical systems of organisms, and the role of specialized cells for maintenance and growth. Students will demonstrate understanding of how systems of cells function together to support the life processes.

How are the characteristics from one generation related to the previous generation?

High school students demonstrate understanding of the relationship of DNA and chromosomes in the processes of cellular division that pass traits from one generation to the next. Students can determine why individuals of the same species vary in how they look, function, and behave. Ethical issues related to genetic modification of organisms and the nature of science can be described.

How do organisms obtain and use energy they need to live and grow? How do matter and energy move through ecosystems?

Students will be expected to develop understanding of organisms' interactions with each other and their physical environment, how organisms obtain resources, change the environment, and how

these changes affect both organisms and ecosystems. Students will use mathematical concepts to construct explanations for the role of energy in the cycling of matter in organisms and ecosystems.

How do organisms interact with the living and non-living environment to obtain matter and energy?

Students will be expected to investigate the role of biodiversity in ecosystems and the role of animal behavior on survival of individuals and species. Students will develop increased understanding of interactions among organisms and how those interactions influence the dynamics of ecosystems.

How can there be so many similarities among organisms yet so many different plants, animals, and microorganisms? How does biodiversity affect humans?

Students will be expected to demonstrate understanding of the factors causing natural selection and the process of evolution of species over time. They demonstrate understanding of how multiple lines of evidence contribute to the strength of scientific theories of natural selection and evolution

.....

SC.HS.6 Structure and Function

SC.HS.6.1 Gather, analyze, and communicate evidence of the relationship between structure and function in living things.

SC.HS.6.1.a **Construct an explanation** based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells. Assessment does not include identification of specific cell or tissue types, whole body systems, specific protein structures and functions, or the biochemistry of protein synthesis.

 NE agricultural practices

SC.HS.6.1.b **Develop and use a model** to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms. Assessment does not include interactions and functions at the molecular or chemical reaction level.

SC.HS.6.1.c **Plan and conduct an investigation** to provide evidence that feedback mechanisms maintain homeostasis. Assessment does not include the cellular processes involved in the feedback mechanism.

 NE agricultural practices

SC.HS.6.1.d **Use a model** to illustrate the role of cellular division (mitosis) and differentiation in producing and maintaining complex organisms. Assessment does not include specific gene control mechanisms or rote memorization of the steps of mitosis.

SC.HS.7 Interdependent Relationships in Ecosystems

SC.HS.7.2 Gather, analyze, and communicate evidence of interdependent relationships in ecosystems.

SC.HS.7.2.a **Use mathematical and/or computational representations to support explanations** of factors that affect carrying capacity of ecosystems at different scales. Assessment does not include deriving mathematical equations to make comparisons.

SC.HS.7.2.b **Use mathematical representations** to support and revise explanations based on evidence about factors affecting biodiversity and populations in ecosystems of different scales. Assessment is limited to provided data.

SC.HS.7.2.c **Evaluate the claims, evidence, and reasoning** that the interactions in ecosystems maintain relatively consistent numbers and types of organisms in stable conditions, but changing conditions may result in a new ecosystem.

 *NE river systems and ecosystems*

SC.HS.7.2.d **Evaluate the evidence** for how group behavior has evolved because membership can increase the chances of survival for individuals and their genetic relatives.

SC.HS.7.2.e **Design, evaluate, and refine a solution** for increasing the positive impacts of human activities on the environment and biodiversity.

 *NE native species, conservation organizations, agriculture practices*

SC.HS.7.2.f **Use a computer simulation** to model the impact of proposed solutions to a complex real-world problem with numerous criteria and constraints on interactions within and between systems relevant to the problem. Assessment is limited to testing solutions for a proposed problem related to threatened or endangered species, or to genetic variation of organisms for multiple species.

SC.HS.8 Matter and Energy in Organisms and Ecosystems

SC.HS.8.3 Gather, analyze, and communicate evidence of the flow of energy and cycling of matter in organisms and ecosystems.

SC.HS.8.3.a **Use a model** to illustrate how photosynthesis transforms light energy into stored chemical energy. Assessment does not include specific biochemical steps.

SC.HS.8.3.b **Construct and revise an explanation** based on evidence for how carbon, hydrogen, and oxygen from sugar molecules may combine with other molecules to form the four basic macromolecules. Assessment does not include the details of the specific chemical reactions or identification of macromolecules.

SC.HS.8.3.c **Use a model** to illustrate that cellular respiration is a chemical process whereby the bonds of food molecules are broken and bonds in new compounds are formed resulting in a net transfer of energy. Assessment should not include identification of the steps or specific processes involved in cellular respiration.

SC.HS.8.3.d **Construct and revise an explanation** based on evidence for the cycling of matter and flow of energy in aerobic and anaerobic conditions. Assessment does not include the specific chemical processes of either aerobic or anaerobic respiration.

 *NE ethanol production*

SC.HS.8.3.e **Use mathematical representations** to support claims for the cycling of matter and flow of energy among organisms in an ecosystem. Assessment is limited to proportional reasoning to describe the cycling of matter and flow of energy.

 *NE agricultural practices*

SC.HS.8.3.f **Develop a model** to illustrate the role of photosynthesis and cellular respiration in the cycling of carbon among the biosphere, atmosphere, hydrosphere, and geosphere. Assessment does not include the specific chemical steps of photosynthesis and respiration.

SC.HS.9 Heredity: Inheritance and Variation of Traits

SC.HS.9.4 Gather, analyze, and communicate evidence of the inheritance and variation of traits.

SC.HS.9.4.a **Develop and use a model** to explain the relationships between the role of DNA and chromosomes in coding the instructions for characteristic traits passed from parents to offspring. Assessment does not include the phases of meiosis or the molecular mechanism of specific steps in the process.

 NE agricultural practices

SC.HS.9.4.b **Make and defend a claim** based on evidence that inheritable genetic variations may result from: (1) new genetic combinations through meiosis, (2) viable errors occurring during replication, and/or (3) mutations caused by environmental factors. Assessment does not include the phases of meiosis or the molecular mechanism of specific steps in the process.

 NE plants and animals

SC.HS.9.4.c **Apply concepts of statistics and probability** to explain the variation and distribution of expressed traits in a population. Assessment does not include Hardy-Weinberg calculations.

 NE plants and animals

SC.HS.10 Biological Evolution

SC.HS.10.5 Gather, analyze, and communicate evidence of biological evolution.

SC.HS.10.5.a **Communicate scientific** information that common ancestry and biological evolution are supported by multiple lines of empirical evidence.

 NE fossil record

SC.HS.10.5.b **Construct an explanation** based on evidence that natural selection primarily results from four factors: (1) the potential for a species to increase in number, (2) the heritable genetic variation of individuals in a species due to mutation and reproduction, (3) competition for limited resources, and (4) the proliferation of those organisms that are better able to survive and reproduce in the environment. Assessment does not include other mechanisms of evolution, such as genetic drift, gene flow through migration, and co-evolution.

 NE plants and animals

SC.HS.10.5.c **Apply concepts of statistics and probability** to support explanations that organisms with an advantageous heritable trait tend to increase in proportion to organisms lacking this trait. Assessment is limited to basic statistical and graphical analysis. Assessment does not include allele frequency calculations.

 NE plants and animals

SC.HS.10.5.d **Construct an explanation** based on evidence for how natural selection leads to adaptation of populations.

SC.HS.10.5.e **Evaluate the evidence** supporting claims that changes in environmental conditions may result in: (1) increases in the number of individuals of some species, (2) the emergence of new species over time, and (3) the extinction of other species.

 NE plants and animals

HS EARTH AND SPACE SCIENCES

The earth and space science standards and indicators help students gather, analyze, and communicate evidence as they formulate answers to questions tailored to student interests and current topics that may include but are not limited to:

What is the universe and what goes on in stars? What are the predictable patterns caused by Earth's movement in the solar system?

Students examine the processes governing the formation, evolution, and workings of the solar system and universe in order to understand how matter in the universe formed and how short-term changes in the behavior of the sun directly affect humans. Engineering and technology play a large role here in obtaining and analyzing data that support theories of the formation of the solar system and universe.

How do people reconstruct and date events in Earth's planetary history? Why do the continents move?

Students can construct explanations for the scales of time over which Earth processes operate. An important aspect of the earth and space sciences involves making inferences about events in Earth's history based on a data record that is increasingly incomplete the farther one goes back in time.

How do the properties and movements of water shape Earth's surface and affect its systems?

Students develop models and explanations for the ways that

feedbacks between different Earth systems control the appearance of Earth's surface. Central to this is the tension between internal systems, which are largely responsible for creating and at Earth's surface and the sun-driven surface systems that tear down land through weathering and erosion. Students understand the role water plays in affecting weather and understand chemical cycles in Earth's systems.

What regulates weather and climate?

Students understand the system interactions that control weather and climate. Students can understand the analysis and interpretation of different kinds of geoscience data allow student to construct explanations for the many factors that drive climate change over a wide range of timescales.

How do humans depend on Earth's resources? How do people model and predict the effects of human activities?

Students understand the complex and significant interdependencies between humans and the rest of Earth's systems through the impacts of natural hazards, our dependencies on natural resources, and the environmental impacts of human activities

SC.HS.11 Space Systems

SC.HS.11.1. Gather, analyze, and communicate evidence to defend that the universe changes over time.

SC.HS.11.1.a **Use a model** based on evidence to illustrate how the stages of stars and the role of nuclear fusion in a star's core releases energy that reaches Earth in the form of radiation. Assessment does not include details of the atomic and sub-atomic processes involved with the sun's nuclear fusion.

SC.HS.11.1.b **Construct an explanation** of the Big Bang theory based on astronomical evidence of light spectra, motion of distant galaxies, and composition of matter in the universe.

SC.HS.11.1.c **Communicate scientific ideas** about the way stars, throughout their stellar stages, produce elements. Details of the many different nucleosynthesis pathways for stars of differing masses are not assessed.

SC.HS.11.1.d **Use mathematical or computational representations** to predict the motion of orbiting objects in the solar system. Mathematical representations for the gravitational attraction of bodies and Kepler's Laws of orbital motions should not deal with more than two bodies, nor involve calculus.

SC.HS.12 Weather and Climate

SC.HS.12.2 Gather, analyze, and communicate evidence to support that Earth's climate and weather are influenced by energy flow through Earth systems.

SC.HS.12.2.a **Construct an explanation based on evidence** for how the sun's energy moves among Earth's systems.

SC.HS.12.2.b **Use a model** to describe how variations in the flow of energy into and out of Earth's systems result in changes in climate. Assessment of the results of changes in climate is limited to changes in surface temperatures, precipitation patterns, glacial ice volumes, sea levels, and biosphere distribution.

SC.HS.12.2.c **Analyze geoscience data** and the results from global climate models to make an evidence-based forecast of the current rate and scale of global or regional climate changes.

 *NE data*

SC.HS.12.2.d **Evaluate the validity and reliability** of past and present models of Earth conditions to make projections of future climate trends and their impacts.

SC.HS.13 Earth's Systems

SC.HS.13.3 Gather, analyze, and communicate evidence to defend the position that Earth's systems are interconnected and impact one another.

SC.HS.13.3.a **Analyze geoscience data** to make the claim that one change to Earth's surface can create feedbacks that cause changes to other Earth systems.

 *NE geologic time scale and fossil record*

SC.HS.13.3.b **Develop a model** based on evidence of Earth's interior to describe the cycling of matter.

SC.HS.13.3.c **Construct an argument based on evidence** to explain the multiple processes that cause Earth's plates to move.

SC.HS.13.3.d **Plan and conduct an investigation** of the properties of water and their effects on Earth materials, surface processes, and groundwater systems.

 *NE water systems*

SC.HS.13.3.e **Develop a quantitative model** to describe the cycling of carbon and other nutrients among the hydrosphere, atmosphere, geosphere, and biosphere, today and in the geological past.

SC.HS.14 History of Earth

SC.HS.14.4 Gather, analyze, and communicate evidence to interpret Earth's history.

SC.HS.14.4.a **Evaluate evidence** of the past and current movements of continental and oceanic crust and the theory of plate tectonics to explain the differences in age, structure, and composition of crustal and sedimentary rocks.

SC.HS.14.4.b **Apply scientific reasoning** and evidence from ancient Earth materials, meteorites, and other planetary surfaces to reconstruct Earth's formation and early history.

SC.HS.14.4.c **Develop a model** to illustrate how Earth's internal and surface processes operate over time to form, modify, and recycle continental and ocean floor features. Assessment does not include memorization of the details of the formation of specific geographic

features of Earth's surface.

 *NE water systems and surface processes*

SC.HS.14.4.d **Construct an argument** based on evidence to validate coevolution of Earth's systems and life on Earth. Assessment does not include a comprehensive understanding of the mechanisms of how the biosphere interacts with all of Earth's other systems.

SC.HS.15 Sustainability

SC.HS.15.5 Gather, analyze, and communicate evidence to describe the interactions between society, environment, and economy.

SC.HS.15.5.a **Construct an explanation based on evidence** for how the availability of natural resources, occurrence of natural hazards, and changes in climate have influenced human activity.

 *NE historical events*

SC.HS.15.5.b **Evaluate competing design solutions** for developing, managing, and utilizing energy and mineral resources based on cost-benefit ratios.

SC.HS.15.5.c **Use a computational simulation** to illustrate the relationships among management of natural resources, the sustainability of human populations, and biodiversity. Assessment is limited to using provided multi-parameter programs or constructing simplified spreadsheet calculations.

 *NE resource management*

SC.HS.15.5.d **Evaluate or refine a technological solution** that increases positive impacts of human activities on natural systems.

SC.HS.15.5.e **Evaluate a solution to a complex real-world problem** based on prioritized criteria and tradeoffs that account for a range of constraints, including cost, safety, reliability, and aesthetics, as well as possible social, cultural, and environmental impacts.

SC.HS.15.5.f **Use a computational representation** to illustrate the relationships among Earth systems and the degree to which those relationships are being modified due to human activity. Assessment does not include running computational representations but is limited to using the published results of scientific computational models.

PLUS STANDARDS (OPTIONAL)

The High School Plus (HSP) standards represent advanced science topics designed to enhance the rigor of general science curricula or supplement additional advanced science courses. The standards were developed using postsecondary syllabi from entry level science courses for science majors (e.g. UNL LIFE 120, CHEM 109). Introducing the content to high school students will scaffold their learning providing a bridge between high school science coursework and postsecondary level coursework.

PHYSICS

SC.HSP.1 Forces, Interactions, and Motion

SC.HSP.1.1 Gather, analyze, and communicate evidence of forces, interactions, and motion.

SC.HSP.1.1.a **Generate and interpret mathematical and graphical representations** to describe the relationships between position, velocity, acceleration and time. Examples of data could include tables or graphs of position or velocity as a function of time for objects subject to no acceleration and objects undergoing a constant acceleration, including projectile motion, free fall, and circular motion. Examples should also include both average and instantaneous velocities. Assessment is limited to one and two-dimensional motion and to objects moving at non-relativistic speeds.

SC.HSP.1.1.b **Use mathematical and pictorial models** as applied to Newton's second law of motion describing the relationship among the net force on a macroscopic object, its mass, and its acceleration. Examples include drawing and using free body diagrams to analyze the net force on the object and the resulting motion; vectors including decomposition and recomposition, addition and subtraction. Assessment is limited to two-dimensional motion.

SC.HSP.1.1.c **Use mathematical representations** of momentum to predict the outcome of a collision. Emphasis is on the quantitative conservation of momentum in interactions and the qualitative meaning of this principle. **Assessment is limited to quantitative analysis of systems of two macroscopic bodies moving in one-dimension and qualitative analysis of multiple macroscopic bodies moving in two or three-dimensions.**

SC.HSP.1.1.d **Apply scientific and engineering ideas** to design, evaluate, and refine a device that minimizes the force on a macroscopic object during a collision. Examples of evaluation and refinement could include determining the success of the device at protecting an object from damage and modifying the design to improve it by applying the impulse-momentum theorem. Examples of a device could include a football helmet or an airbag. **Assessment is limited to qualitative evaluations and/or algebraic manipulations.**

SC.HSP.1.1.e **Use mathematical representations** of Newton's Law of Gravitation and Coulomb's Law to describe and predict the gravitational and electrostatic forces between objects. Emphasis is on both quantitative and conceptual descriptions of forces from gravitational and electric sources. **Assessment can be expanded to systems with multiple objects.**

SC.HSP.2 Waves, Electromagnetic Radiation, and Optics

SC.HSP.2.2 Gather, analyze, and communicate evidence of the interactions of waves and optics.

SC.HSP.2.2.a **Use mathematical representations** to describe the relationships among the frequency, wavelength, and speed of waves traveling in various media. Examples of data could include electromagnetic radiation traveling in a vacuum and glass, sound waves traveling through air and water, and seismic waves traveling through the Earth. Examples also include descriptive changes in observed frequency based on relative motion of observer or source (Doppler effect). **Assessment is limited to algebraic relationships and describing those relationships qualitatively.**

SC.P.2.2.b **Develop and use models** to predict interactions of longitudinal and transverse waves in various media. Examples could include P, S and Surface seismic waves, water waves, and waves on a spring. Emphasis is on structure and function of waves.

SC.HSP.2.2.c **Develop and use models** to describe the behavior of light at the boundary of various media. Emphasis is on both geometric (ray diagrams) and algebraic models (mirror and thin lens equation, Snell's Law).

SC.HSP.2.2.d **Evaluate the claims, evidence, and reasoning** behind the idea that electromagnetic radiation can be described either by a wave model or a particle model, and that for some situations one model is more useful than

the other. Emphasis is on how the experimental evidence supports the claim and how a theory is generally modified in light of new evidence. Examples of a phenomenon could include resonance, interference, diffraction, photoelectric effect and the idea that photons associated with different frequencies of light have different energies. **Assessment includes qualitative and quantitative models of light.**

SC.HSP.2.2.e **Use evidence to support explanations** for causes of emission and absorption spectra of electromagnetic radiation. Emphasis is on the idea that photons associated with different frequencies of light have different energies. This could include the displacement and broadening of spectral lines (redshift and blueshift). Examples could include different elements absorb or emit specific frequencies of light. Assessment is limited to qualitative descriptions.

SC.HSP.2.2.f **Communicate technical information** about how some technological devices use the principles of wave behavior and wave interactions with matter to transmit and capture information and energy. Examples could include solar cells capturing light and converting it to electricity; medical imaging; communications technology; lasers. **Assessments are limited to qualitative information. Assessments do not include band theory.**

SC.HSP.4 Energy: Physics

SC.HSP.4.3 Gather, analyze, and communicate evidence of the interactions of energy.

SC.HSP.4.3.a **Create a computational model** to calculate the change in the energy of one component in a system when the change in energy of the other component(s) and energy flows in and out of the system are known. Emphasis is on explaining the meaning of mathematical expressions used in the model including the Work-Energy theorem. **Assessment is limited to basic algebraic expressions or computations; to systems of two or three components; and to thermal energy, kinetic energy, and/or the energies in gravitational, magnetic, or electric fields.**

SC.HSP.4.3.b **Plan and conduct an investigation** to rate the power and efficiency used in performing work on a system. Emphasis is on the quantitative determination of power in interactions. Examples could include use of pulleys and electric motors.

SC.HSP.4.3.c **Design, build, and refine a device** that works within given constraints to convert one form of energy into another form of energy. Emphasis is on both qualitative and quantitative evaluations of devices. Examples of devices could include Rube Goldberg devices, wind turbines, solar cells, solar ovens, generators, heat engines and heat pumps. Examples of constraints could include use of renewable energy forms and efficiency. **Assessment for quantitative evaluations is limited to total output for a given input. Assessment is limited to devices constructed with materials provided to students.**

SC.HSP.4.3.d **Analyze a major global challenge** to specify qualitative and quantitative criteria and constraints for solutions that account for societal needs and wants. Examples could include analysis of renewable energy systems for electricity generation and the effect of autonomous electric cars on the economy, society and the environment.

SC.HSP.4.3.e **Plan and conduct an investigation** to provide evidence for the transfer of thermal energy within a system based on the Laws of Thermodynamics. Emphasis is on analyzing data from student investigations and using mathematical thinking to describe the energy changes both quantitatively and conceptually, such as changes in entropy of a system. Examples of investigations could include mixing liquids at different initial temperatures or adding objects at different temperatures to water, changes from kinetic to thermal energy, and heat engines and heat pumps. **Assessment is limited to investigations based on materials and tools provided to students.**

SC.HSP.4.3.f **Develop and use a model** of two objects interacting through gravitational, electric, or magnetic fields to illustrate the forces between objects and the changes in energy of the objects due to the interaction. Examples of models could include drawings, diagrams, and texts, such as drawings of what happens when two charges of opposite polarity are near each other. **Assessment is limited to systems containing two objects.**

SC.HSP.16 Electricity and Magnetism

SC.HSP.16.4 Gather, analyze, and communicate evidence of electricity and magnetism.

SC.HSP.16.4.a **Use mathematical representations** of field forces to describe and predict forces at a distance between objects. Emphasis is on both quantitative and conceptual descriptions of forces from gravitational and electric sources. **Assessment can be expanded to systems with multiple objects.**

SC.HSP.16.4.b **Use models** to visualize and describe gravitational, magnetic and electrical fields and predict resulting forces on nearby objects. Examples of fields include point charges, charged parallel plates/rings/spheres, and bar magnets. Also could include electromagnetic forces, such as the magnetic force acting on a moving charge. **Assessment is limited to descriptive analysis of the fields and the forces they produce.**

SC.HSP.16.4.c **Use mathematical representations** to provide evidence that describes and predicts relationships between power, current, voltage, and resistance. Emphasis is on insulators and conductors accounting for Ohm's Law, total resistance for combinations of resistors and $P=IV$.

SC.HSP.16.4.d **Evaluate competing design solutions** for construction and use of electrical consumer products accounting for a range of constraints, including cost, safety, reliability, and aesthetics as well as possible social, cultural, and environmental impacts. Examples could include efficiency of light bulbs (visible intensity vs. power) and thermal energy limits of wire.

SC.HSP.16.4.e **Obtain and communicate technical information** about how some technological devices use alternating current and others use direct current. Examples could include why public utilities use AC while many devices use DC and energy loss in transmission of electricity.

SC.HSP.16.4.f **Design a solution** to a problem using the fact that an electric current can produce a magnetic field and/or that a changing magnetic field can produce an electric current. Emphasis is on both quantitative and conceptual descriptions of electric and magnetic fields. Examples include designing a generator, motor or transformer. **Assessment is limited to systems with two objects.**

SC.HSP.16.4.g **Analyze a major global challenge** to specify qualitative and quantitative criteria and constraints for solutions that account for societal needs and wants. Examples could include analysis of renewable energy systems for electricity generation and the effect of autonomous electric cars on the economy, society and the environment.

CHEMISTRY

SC.HSP.3 Structure and Properties of Matter

SC.HSP.3.1 Gather, analyze, and communicate evidence of the structure, properties, and interactions of matter.

SC.HSP.3.1.a **Use the periodic table as a model** to predict the relative properties of elements based on the patterns of electrons in the outermost energy level of atoms. Assessment does not include quantitative understanding of ionization energy beyond relative trends.

SC.HSP.3.1.b **Plan and conduct an investigation** to gather evidence to compare the structure of substances at the macro scale to infer the strength of electrical forces between particles. Examples of intramolecular forces include bond type, polarity of bonds and, resonance structures. Examples of intermolecular forces include hydrogen bonds, dipole-dipole. **Assessment does not include Raoult's law calculations of vapor pressure.**

SC.HSP.3.1.c **Develop and use models** to predict and explain forces that are in and between molecules. Examples of intramolecular forces include bond type, polarity of bonds and, resonance structures. Examples of intermolecular forces include hydrogen bonds, dipole-dipole.

SC.HSP.3.3.d **Evaluate a solution** to a complex, real-world problem based on prioritized criteria and tradeoffs that account for a range of constraints, including cost, safety, reliability, and aesthetics, as well as possible social, cultural, and environmental impacts. Examples could include the effects of concentration of solutions on the freezing/boiling point (melting of ice on roadways), aspartame and caffeine in beverages, fluoride in drinking water.

SC.HSP.3.3.e **Develop models** to illustrate the changes in the composition of the nucleus of the atom and the energy released during the processes of fission, fusion, and radioactive decay. **Assessment is limited to alpha, beta, and gamma radioactive decays.**

SC.HSP.3.3.f **Develop and use models** to describe and predict mechanisms of the quantum mechanical model of the atom. Examples of representation include Aufbau Diagram, Hund's Rule, Pauli Exclusion, and orbital shapes, Hybridization of orbitals, and electron configuration. (This is an upper-level course indicator. It is not recommended for all students.)

SC.HSP.3.3.g **Evaluate the evidence** supporting claims about how atoms absorb and emit energy in the form of electromagnetic radiation. Examples include using mathematical relationships to demonstrate the relationship between observed light spectrum, wavelength of light and emission spectrum. (This is an upper-level course indicator. It is not recommended for all students.)

SC.HSP.3.3.h **Use mathematical representations** to quantify matter through the analysis of patterns in chemical compounds at different scales. Emphasis is on the mole concept, empirical formula, molecular formula, percent composition, and law of constant composition. (This is an upper-level course indicator. It is not recommended for all students.)

SC.HSP.4 Energy: Chemistry

SC.HSP.4.2 Gather, analyze, and communicate evidence of the interactions of energy.

SC.HSP.4.2.a **Use statistical and mathematical techniques** to describe qualitative and quantitative thermodynamic relationships. Thermodynamic relationships may include: Enthalpy, Hess's Law, Heats of Formation. Examples of data displays or graphs could include energy diagrams to communicate bond energies of products or reactants. Lab investigations may include calorimetry. (This is an upper-level course indicator. It is not recommended for all students.)

SC.HSP.4.2.b **Plan and conduct an investigation** to gather evidence of how the Kinetic Molecular Theory and gas laws are related. Examples include Dalton's Law of particle pressures, Graham's Law of Diffusion and Effusion, and empirical gas laws. (This is an upper-level course indicator. It is not recommended for all students.)

SC.HSP.4.2.c **Analyze and interpret data** to explain changes in energy within a system and/or energy flows in and out of

a system. Emphasis is on the use of mathematical expressions to describe the change in energy within the system. Investigations could include electrochemistry (electrolysis). (This is an upper-level course indicator. It is not recommended for all students.)

SC.HSP.4.2.d **Analyze a major global challenge** to specify qualitative and quantitative criteria and constraints for solutions that account for societal needs and wants. Examples could include alternative energies, carbon footprint, and crude oil refining process.

SC.HSP.5 Chemical Reactions

SC.HSP.5.3 Gather, analyze, and communicate evidence of chemical reactions.

SC.HSP.5.3.a **Plan and conduct an investigation** to generate evidence that answers scientific questions related to changes in solution chemistry. Examples include titrations, solubility, and Le Chatelier's Principle. (This is an upper-level course indicator. It is not recommended for all students.)

SC.HSP.5.3.b **Use a model** to identify electron transfer and balance a redox reaction. Emphasis would be on using half reaction method for balancing equations and understanding electron transfer. Examples include electrochemical cells and electroplating. (This is an upper-level course indicator. It is not recommended for all students.)

SC.HSP.5.3.c **Use mathematical and/or computational representations** to predict and explain relationships within chemical systems. Examples include stoichiometric calculations, gas stoichiometry, limiting reactant, empirical formula/molecular formula calculations, % comp % yield. (This is an upper-level course indicator. It is not recommended for all students.)

SC.HSP.5.3.d **Use mathematical representations** to analyze the proportion and quantity of particles in solution. Emphasis is on molarity and developing net ionic equations. (This is an upper-level course indicator. It is not recommended for all students.)

SC.HSP.5.3.e **Plan and conduct an investigation** to predict the outcome of a chemical reaction based on patterns of chemical properties. Examples of reaction types could include single replacement, double replacement, etc. Examples of patterns could include the use of solubility rules, activity series. (This is an upper-level course indicator. It is not recommended for all students.)

SC.HS.5.3.f **Construct and revise an explanation** for the outcome of a simple chemical reaction based on the outermost electron states of atoms, trends in the periodic table, and knowledge of the patterns of chemical properties.

BIOLOGY

SC.HSP.6 Structure and Function

SC.HSP.6.1 Gather, analyze, and communicate evidence of the relationship between structure and function in living things.

SC.HSP.6.1.a **Construct an explanation** based on evidence for how the sequence of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.

SC.HSP.6.1.b **Develop and use a model** to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms. Emphasis is on functions at the organism system level such as nutrient uptake, water delivery, and organism movement in response to neural stimuli. An example of an interacting system could be an artery depending on the proper function of elastic tissue and smooth muscle to regulate and deliver the proper amount of blood within the circulatory system. **Assessment does not include interactions and functions at the molecular level.**

SC.HSP.6.1.c **Plan and conduct an investigation** to provide evidence that feedback mechanisms maintain homeostasis. Examples of investigations could include heart rate response to exercise, stomate response to moisture and temperature, and root development in response to water levels.

SC.HSP.6.1.d **Use a model** to illustrate the role of cells in producing signals which maintain cellular function within organisms. Emphasis is on conceptual understanding of the types of cell signals, signal reception, signal transduction, and types of cellular responses.

SC.HSP.6.1.e **Construct an explanation** based on evidence that plants have structures that function to support survival, growth, behavior, and reproduction. Emphasis is on plant structure, growth, and development, nutrient uptake and transport, plant reproduction, and plant responses to internal and external stimuli.

SC.HSP.6.1.f **Construct an explanation** based on evidence that animals have structures that function to support survival, growth, behavior, and reproduction. Emphasis is on the basic principles of animal form and functions. Examples of basic principles could include animal nutrition, circulation, gas exchange, immunity, osmoregulation and excretion, hormonal and endocrine control, reproduction, development, neural control systems, and animal behavior.

SC.HSP.6.1.g **Use a model** to illustrate the role of cellular division (mitosis) and differentiation in producing and maintaining complex organisms.

SC.HSP.7 Interdependent Relationships in Ecosystems

SC.HSP.7.2 Gather, analyze, and communicate evidence of interdependent relationships in ecosystems.

SC.HSP.7.2.a **Use mathematical and/or computational representations** to support explanations of factors that affect carrying capacity of ecosystems at different scales. Emphasis is on quantitative analysis and comparison of the relationships among interdependent factors including boundaries, resources, climate and competition. Examples of mathematical comparisons could include graphs, charts, histograms, and population changes gathered from simulations or historical data sets. **Assessment does not include deriving mathematical equations to make comparisons.**

SC.HSP.7.2.b **Use mathematical representations** to support and revise explanations based on evidence about factors affecting biodiversity and populations in ecosystems of different scales. Examples of mathematical representations include finding the average, determining trends, and using graphical comparisons of multiple sets of data. Assessment is limited to provided data.

SC.HSP.7.2.c **Evaluate the claims, evidence, and reasoning** related to the principle that complex interactions in ecosystems maintain relatively consistent numbers and types of organisms in stable conditions, but changing conditions may result in a new ecosystem. Examples of changes in ecosystem conditions could include modest biological or physical changes, such as moderate hunting or a seasonal flood; and extreme changes, such as volcanic eruption or sea level rise.

SC.HSP.7.2.d **Design, evaluate, and refine a solution** for increasing the positive impacts of human activities on the

environment and biodiversity. Examples of human activities can include habitat development and restoration, supporting native pollinators, reducing consumption, rotating crops, using integrated pest management.

SC.HSP.7.2.e **Create or revise a solution** to mitigate the impacts of human activity on biodiversity. Emphasis is on testing solutions for a proposed problem related to threatened or endangered species, or to genetic variation of organisms for multiple species.

SC.HSP.7.2.f **Evaluate evidence** for the role of behavior on individual and species' chances to survive and reproduce. Emphasis is on: (1) distinguishing between group and individual behavior, (2) identifying evidence supporting the outcomes of group behavior, and (3) developing logical and reasonable arguments based on evidence. Examples of behaviors could include fixed action patterns, imprinting, kinesis, taxis, hibernation, estivation, habituation, spatial learning, associative learning, cognition, foraging behavior, agonistic behavior, altruism, social learning, flocking, schooling, herding, and cooperative behaviors such as hunting, migrating, and swarming.

SC.HSP.8 Matter and Energy in Organisms and Ecosystems

SC.HSP.8.3 Gather, analyze, and communicate evidence of the flow of energy and cycling of matter in organisms and ecosystems.

SC.HSP.8.3.a **Use a model to illustrate how** photosynthesis transforms light energy into stored chemical energy. Emphasis is on illustrating inputs and outputs of matter and the transfer and transformation of energy in photosynthesis by plants and other photosynthesizing organisms. Examples of models could include diagrams, chemical equations, and conceptual models.

SC.HSP.8.3.b **Construct and revise an explanation** based on evidence for how carbon, hydrogen, and oxygen from sugar molecules may combine with other molecules to form amino acids and/or other large carbon-based molecules. Emphasis is on using evidence from models and simulations to support explanations.

SC.HSP.8.3.c **Use a model** to illustrate that cellular respiration is a chemical process whereby the bonds of food molecules and oxygen molecules are broken and the bonds in new compounds are formed resulting in a net transfer of energy. Emphasis is on the conceptual understanding of the steps or specific processes involved in cellular respiration.

SC.HSP.8.3.d **Construct and revise an explanation** based on evidence for the cycling of matter and flow of energy in aerobic and anaerobic conditions. Emphasis is on conceptual understanding of the role of metabolism in different environments.

SC.HSP.8.3.e **Use mathematical representations** to support claims for the cycling of matter and flow of energy among organisms in an ecosystem. Emphasis is on using a mathematical model of stored energy in biomass to describe the transfer of energy from one trophic level to another and that matter and energy are conserved as matter cycles and energy flows through ecosystems. Emphasis is on atoms and molecules such as carbon, oxygen, hydrogen and nitrogen being conserved as they move through an ecosystem. **Assessment is limited to proportional reasoning to describe the cycling of matter and flow of energy.**

SC.HSP.8.3.f **Develop a model to illustrate the role** of photosynthesis and cellular respiration in the cycling of carbon among the biosphere, atmosphere, hydrosphere, and geosphere. Examples of models could include simulations and mathematical models.

SC.HSP.8.3.g **Use models** to illustrate how atomic structure and bonding impact the properties of water and their influence on biological systems. Emphasis is on atomic structure, types of chemical bonds, and properties of water and how those properties influence organisms and ecosystems.

SC.HSP.8.3.h **Construct an explanation** based on evidence for how ATP powers cellular work and for how enzymes affect the rate of and the amount of energy needed for metabolic reactions. Emphasis is on the structure of ATP and how ATP is used to power cellular work by coupling exergonic and endergonic reactions. Emphasis is on how enzymes speed up and/or lower the activation energy needed for metabolic reactions and how the regulation of enzyme activity helps control metabolism.

SC.HSP.9 Inheritance and Variation of Traits

SC.HSP.9.4 Gather, analyze, and communicate evidence of the inheritance and variation of traits.

SC.HSP.9.4.a **Ask questions** to clarify relationships about the role of DNA and chromosomes in coding the instructions for characteristic traits passed from parents to offspring.

SC.HSP.9.4.b **Make and defend a claim** based on evidence that inheritable genetic variations may result from: (1) new genetic combinations through meiosis, (2) viable errors occurring during replication, and/or (3) mutations caused by environmental factors. Emphasis is on using data to support arguments for the way variation occurs.

SC.HSP.9.4.c **Apply concepts of statistics and probability** to explain the variation and distribution of expressed traits in a population. Emphasis is on the use of mathematics to describe the probability of traits as it relates to genetic and environmental factors in the expression of traits [examples could include Hardy-Weinberg calculations and chi-square calculations].

SC.HSP.9.4.d **Evaluate evidence** supporting claims that gene regulation can explain the variation and distribution of expressed traits in a population. Emphasis is on the differences in gene expression of multi-cellular organisms, leading to different cell types within organisms and the distribution of traits in a population.

SC.HSP.9.4.e **Construct an explanation** based on evidence for the role of biotechnology in the research and understanding of biological systems. Emphasis is on the evolution of genomes, how biotechnology allows researchers to study the sequence, expression, and function of genes, and the practical applications of biotechnology.

SC.HSP.10 Biological Evolution

SC.HSP.10.5 Gather, analyze, and communicate evidence of biological evolution.

SC.HSP.10.5.a **Communicate scientific information** that common ancestry and biological evolution are supported by multiple lines of empirical evidence. Emphasis is on a conceptual understanding of the role each line of evidence has relating to common ancestry and biological evolution. Examples of evidence could include similarities in DNA sequences, anatomical structures, and order of appearance of structures in embryological development.

SC.HSP.10.5.b **Construct an explanation** based on evidence that the process of evolution primarily results from four factors: (1) the potential for a species to increase in number, (2) the heritable genetic variation of individuals in a species due to mutation and sexual reproduction, (3) competition for limited resources, and (4) the proliferation of those organisms that are better able to survive and reproduce in the environment. Emphasis is on using evidence to explain the influence each of the four factors has on number of organisms, behaviors, morphology, or physiology in terms of ability to compete for limited resources and subsequent survival of individuals and adaptation of species. Examples of evidence could include mathematical models such as simple distribution graphs and proportional reasoning.

SC.HSP.10.5.c **Apply concepts of statistics and probability** to support explanations that organisms with an advantageous heritable trait tend to increase in proportion to organisms lacking this trait. Emphasis is on analyzing shifts in numerical distribution of traits and using these shifts as evidence to support explanations. Examples of basic statistical and graphical analysis could include allele frequency calculations.

SC.HSP.10.5.d **Construct an explanation** based on evidence for how natural selection leads to adaptation of populations. Emphasis is on using data to provide evidence for how specific biotic and abiotic differences in ecosystems (such as ranges of seasonal temperature, long-term climate change, acidity, light, geographic barriers, or evolution of other organisms) contribute to a change in gene frequency over time, leading to adaptation of populations.

SC.HSP.10.5.e **Evaluate evidence** supporting claims that changes in environmental conditions may result in: (1) increases in the number of individuals of some species, (2) the emergence of new species over time, and (3) the extinction of other species. Emphasis is on determining cause and effect relationships for how changes to the environment such as deforestation, fishing, application of fertilizers, drought, flood, and the rate of change of the environment affect distribution or disappearance of traits in species.

SC.HSP.10.5.f **Develop and use models** to illustrate patterns in the evolutionary history of biological diversity. Emphasis is on how the structure and function of bacteria, archaea, protists, fungi, plants, and animals are used in are related in the tree of life.

ANATOMY AND PHYSIOLOGY

SC.HSP.6 Structure and Function: Anatomy & Physiology

SC.HSP.6.2 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the *integumentary system*.

SC.HSP.6.2.a **Plan and conduct an investigation** to identify patterns of organization in the integumentary system. Information could be gathered from dissections, models, simulations, and scientific texts.

SC.HSP.6.2.b **Ask questions** to clarify the role of various structures in integumentary system function.

SC.HSP.6.2.c **Develop and use a model** to identify and describe the relationship between the structures and physiological processes of the integumentary system.

SC.HSP.6.2.d **Plan and conduct an investigation to gather evidence** that feedback mechanisms in the integumentary system help maintain homeostasis.

SC.HSP.6.2.e **Engage in arguments from evidence** for the role of cell division in integumentary system dysfunction.

SC.HSP.6.3 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the *skeletal system*.

SC.HSP.6.3.a **Plan and conduct an investigation** to identify patterns of organization in the skeletal system. Information could be gathered from dissections, models, simulations, and scientific texts.

SC.HSP.6.3.b **Develop and use a model** to identify and describe the relationship between the structures and physiological processes of the skeletal system.

SC.HSP.6.3.c **Obtain, evaluate, and communicate information** that feedback mechanisms in the skeletal system help maintain homeostasis.

SC.HSP.6.3.d **Develop and use a model** to explain the order of events necessary for bone formation.

SC.HSP.6.3.e **Engage in arguments from evidence** to support claims about the causes of dysfunction in the skeletal system. Evidence could include data obtained from case studies.

SC.HSP.6.4 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the *muscular system*.

SC.HSP.6.4.a **Plan and conduct an investigation** to identify patterns of organization in the muscular system. Information could be gathered from dissections, models, simulations, and scientific texts.

SC.HSP.6.4.b **Develop and use a model** to identify and describe the relationship between the structures and physiological processes of the muscular system.

SC.HSP.6.4.c **Engage in arguments from evidence** that muscle contraction is the result of biochemical reactions.

SC.HSP.6.4.d **Obtain, evaluate, and communicate** that feedback mechanisms in the muscular system help maintain homeostasis.

SC.HSP.6.4.e **Engage in arguments from evidence** to support claims about the causes of dysfunction in the muscular system. Evidence could include data obtained from case studies.

SC.HSP.6.5 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the *nervous system*.

SC.HSP.6.5.a **Plan and conduct an investigation** to identify patterns of organization in the nervous system. Information could be gathered from dissections, models, simulations, and scientific texts.

SC.HSP.6.5.b **Develop and use a model** to identify and describe the relationship between the structures and physiological processes of the nervous system.

SC.HSP.6.5.c **Engage in arguments from evidence** that production of a nerve impulse is the result of biochemical reactions.

SC.HSP.6.5.d **Obtain, evaluate, and communicate evidence** that feedback mechanisms in the nervous system help maintain homeostasis.

SC.HSP.6.5.e **Engage in arguments from evidence** to support claims about the causes of dysfunction in the nervous system. Evidence could include data obtained from case studies.

SC.HSP.6.6 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the *cardiovascular/respiratory systems*.

SC.HSP.6.6.a **Plan and conduct an investigation** to identify patterns of organization in the cardiovascular/respiratory systems. Information could be gathered from dissections, models, simulations, and scientific texts.

SC.HSP.6.6.b **Develop and use a model** to identify and describe the relationship between the structures and physiological processes of the cardiovascular/respiratory systems.

SC.HSP.6.6.c **Obtain, evaluate and communicate evidence** that feedback mechanisms in the cardiovascular/respiratory systems help maintain homeostasis.

SC.HSP.6.6.d **Engage in arguments from evidence** to support claims about the causes of dysfunction in the cardiovascular/respiratory systems. Evidence could include data obtained from case studies.

SC.HSP.6.7 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the *digestive system*.

SC.HSP.6.7.a **Plan and conduct an investigation** to identify patterns of organization in the digestive system. Information could be gathered from dissections, models, simulations, and scientific texts.

SC.HSP.6.7.b **Develop and use a model** to identify and describe the relationship between the structures and physiological processes of the digestive system.

SC.HSP.6.7.c **Obtain, evaluate and communicate evidence** that feedback mechanisms in the digestive system help maintain homeostasis.

SC.HSP.6.7.d **Engage in arguments from evidence** to support claims about the causes of dysfunction in the digestive system. Evidence could include data obtained from case studies.

SC.HSP.6.8 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the *urinary system*.

SC.HSP.6.8.a **Plan and conduct an investigation** to identify patterns of organization in the urinary system. Information could be gathered from dissections, models, simulations, and scientific texts.

SC.HSP.6.8.b **Develop and use a model** to identify and describe the relationship between the structures and physiological processes of the urinary system.

SC.HSP.6.8.c **Obtain, evaluate and communicate evidence** that feedback mechanisms in the urinary system help maintain homeostasis.

SC.HSP.6.8.d **Engage in arguments from evidence** to support claims about the causes of dysfunction in the urinary system. Evidence could include data obtained from case studies.

SC.HSP.6.9 Gather, analyze, and communicate evidence of the relationship between the structures and physiological processes of the reproductive system.

SC.HSP.6.9.a **Plan and conduct an investigation** to identify patterns of organization in the reproductive system. Information could be gathered from dissections, models, simulations, and scientific texts.

SC.HSP.6.9.b **Develop and use a model** to identify and describe the relationship between the structures and physiological processes of the reproductive system. Include spermatogenesis, oogenesis, and menstruation.

SC.HSP.6.9.c **Obtain, evaluate and communicate evidence** that feedback mechanisms in the reproductive system help maintain homeostasis.

SC.HSP.6.9.d **Engage in arguments from evidence** to support claims about the causes of dysfunction in the reproductive system. Evidence could include data obtained from case studies.

SC.HSP.17 Engineering in Health Sciences

SC.HSP.17.1 Gather, analyze, and communicate evidence of the connection between health science careers and engineering.

SC.HSP.17.1.a **Obtain, evaluate, and communicate information** related to health science careers and the various roles they fulfill within the health care system. Examples include researcher, bio-medical engineer, medical professional, technician, manufacturer and distributor, administrator, and data storage and security professional.

SC.HSP.17.1.b **Design a solution** to a complex, real-world problem affecting body systems that can be solved through engineering. Solutions could include prosthetics, mobility enhancement, engineered body parts, treatment processes, and disease control.

SC.HSP.17.1.c **Evaluate a solution** to a complex, real-world human health problem based on prioritized criteria constraints that account for interactions within and between systems. Solutions could include the effects on the human body or solutions for environmental public health issues.

SC.HSP.18 Body Systems

SC.HSP.18.1 Gather, analyze, and communicate evidence of the connections between body systems.

SC.HSP.18.1.a **Construct and revise an explanation** based on evidence for the cycling of matter and flow of energy within and between body systems.

SC.HSP.18.1.b **Develop and use models** to explain the interactions between body systems. Emphasis should also include interactions with the endocrine system.

APPENDIX A: TOPIC PROGRESSION

TOPIC/GRADE	K	1	2	3	4	5	6	7	8	HS
1. Forces & Interactions	SC.K.1			SC.3.1					SC.8.1	SC.HS.1

APPENDIX B: HS INTEGRATED SCIENCE COURSE MODEL

This appendix provides two examples of possible high school science course sequences. The first example outlines the NE Integrated Food, Energy, and Water Model, a series of interdisciplinary classes that blend Nebraska-specific contexts with global science issues. This example of standard bundles was developed in collaboration with University of Nebraska-Lincoln faculty. The second example presents course mapping of Disciplinary Core Ideas (DCIs) into a coherent sequence as outlined in A Framework for K-12 Science Education.

Course 1: Science Foundations seeks to lay a foundation for understanding the complexities of the biological and physical domains by deeply understanding the driving principles that allow matter to exist and function as it does in the universe. The topics in this course will be explored through the lens of the Nebraska Career Education Model.

Unit 1: Newtonian Forces	Unit 2: Gravity/ Electro-magnetism	Unit 3: Energy	Unit 4: Waves & Electromagnetic Radiation	Unit 5: Earth's Interior	Unit 6: Structure and Properties of Matter	Unit 7: Molecular Level Design	Unit 8: Space Exploration
HS.1.1.a HS.1.1.b HS.1.1.c	HS.1.1.d HS.1.1.e HS.4.4.f	HS.4.4.a HS.4.4.b HS.4.4.c HS.15.4.b	HS.2.2.a HS.2.2.b HS.2.2.c HS.2.2.d HS.2.2.e	HS.13.3.b HS.13.3.c	HS.3.3.a HS.3.3.c	HS.3.3.b HS.3.3.d	HS.11.5.a HS.11.5.b HS.11.5.c HS.11.5.d

Course 2: Water in Society begins by expanding upon what was learned in Course 1 by taking a deeper look into matter and energy through the lens of water. It includes general chemistry concepts as they relate to water and life processes & systems. The course then focuses on how organisms and global systems maintain stability, transfer energy, and cycle matter. The final focus is on the sustainability of water.

Unit 1: Introduction to Water	Unit 2: Chemistry Between Life & Water	Unit 3: Small Systems Equilibrium	Unit 4: Systems: Energy in Balance	Unit 5: Movement of Matter in Global Systems	Unit 6: Sustainability of Water
SC.HS.13.3.d SC.HS.5.5.a	SC.HS.8.3.a SC.HS.5.5.f SC.HS.8.3.b SC.HS.8.3.c SC.HS.5.5.b	SC.HS.8.3.e SC.HS.5.5.c SC.HS.5.5.d	SC.HS.6.1.c SC.HS.13.3.a SC.HS.4.4.e SC.HS.14.2.c SC.HS.12.1.b	SC.HS.13.3.e SC.HS.8.3.f	SC.HS.15.4.a SC.HS.12.1.c SC.HS.15.4.d

Course 3: Land, Food, and People expands upon what was learned in both Course 1 and 2 taking a deeper dive into the coevolution of Earth systems and organisms. It is designed to introduce students to information, ideas, and concepts about the interactions of people, land and the demands for food. Students will investigate the history of the Earth, biological adaptation, heredity, and interdependent relationships in ecosystems. At the end of the course, students will be able to analyze, synthesize and communicate information about the dynamic relationships of land, food, and people from ethical, civic and stewardship perspectives and explain the impacts of human decisions on renewable and non-renewable resources.

Unit 1: Earth's History	Unit 2: Biological Evolution	Unit 3: Heredity: Inheritance & Variation	Unit 4: Structure & Function	Unit 5: Interdependent Relationships in Organisms	Unit 6: Sustainability

NGSS Conceptual Progressions Model

2024 Financial Literacy Status Report

LB452, signed by the Governor on May 26, 2021 and went into effect August 28, 2021. Nebraska Statue, 79-3004, known as the Financial Literacy Act, outlines the requirements for instruction in financial literacy. The law stipulates the following:

- A high school graduation requirement is required for all public schools in financial literacy. The class of 2024 must complete a course in personal finance of financial literacy.
- Each public school shall include financial literacy in their K-8 instructional programs as Appropriate.
- By December 31, 2024 and each December thereafter, each school district must provide an annual financial literacy status report to its school board, including, but not limited to, student progress in financial literacy courses and other district-determined measures of financial literacy progress from the previous year.

K-8 Financial Literacy - In Kindergarten through 5th grade, Financial Literacy is taught within the Social Studies and Mathematics curriculum. In math, students learn about money values (pennies, nickels, dimes, quarters, etc.) and learn about counting money starting in first grade.

Kindergarten

- SS K.2.1 Differentiate between wants and needs in decision-making.
 - SS K.2.1.a Classify wants and needs and explain subsequent choices.
- SS K.2.2 Recognize money is used to purchase goods and services to satisfy economic wants and needs.
 - SS K.2.2.a Explain the purposes of money.

1st Grade

- SS 1.2.1 Explain how scarcity necessitates making choices.
 - SS 1.2.1.a Identify gains and losses when choices are made. *For example: tradeoff, opportunity cost*
- SS 1.2.2 Compare spending and saving opportunities.
 - SS 1.2.2.a Give examples of situations where students and families could choose to save for future purchases.
- SS 1.2.3 Explain that resources are used to produce goods and services.
 - SS 1.2.3.a Categorize human and natural resources used to create goods and services. *For example: iron ore (a natural resource) is made into steel, which the factory worker (a human resource) uses to build a bike (a good)*

2nd Grade

- SS 2.2.1 Evaluate choices about how to use scarce resources that involve prioritizing wants and needs.
 - SS 2.2.1.a. Justify a decision made by providing evidence of possible gains and losses. *For example: tradeoff, opportunity cost, delayed gratification, savings*
- SS 2.2.2 Demonstrate knowledge of currency, its denominations, and use.
 - SS 2.2.2.a Make transactions using currency emphasizing its use as a medium of exchange. *For example: via school store, buying pencils, purchases via debit card or Apple pay as a way to make transactions (medium of exchange)*
- SS 2.2.3 Describe how producers deliver products/services, earn an income, and satisfy economic needs and wants.
 - SS 2.2.3.a. Explain the role of goods and services and supply and demand in a community. *For example: meet wants and needs*

- SS 2.2.3.b. Describe how people in their communities earn income/wages through work. *For example: babysitter, teacher, firefighter, grocery store clerk, librarian, banker, lawyer, rancher, farmer, laborer*

3rd Grade

- SS 3.2.1 Explain that people choose and decide what services they ask their local and state government to provide and pay for.
 - SS 3.2.1.a Identify goods and services funded through state or local taxes. *For example: snow removal, waste management, law enforcement*
- SS 3.2.2 Evaluate choices and consequences for spending and saving.
 - SS 3.2.2.a Given a budget, make choices as to what to purchase, what to give up, and what to save.
- SS 3.2.3 Explain that markets are places where buyers and sellers exchange goods and services.
 - SS 3.2.3.a Indicate various markets where buyers and sellers meet. *For example: grocery store, buy things online, mall, fast food places*
- SS 3.2.4 Describe how the local community trades with other communities.
 - SS 3.2.4.a Identify local goods and services that could be traded with people everywhere. *For example: corn, soybeans, beef, irrigation systems, dry edible beans, art, buffalo hides, fish*

4th Grade

- SS 4.2.1 Describe how scarcity requires the consumer and producer to make choices and identify costs associated with them.
 - SS 4.2.1.a Predict how consumers would react if the price of a good or service changed. *For example: Price of gasoline increases; price of haircuts increases; price of milk/bread/sugar increases - would buy less or start to change behavior toward buying less, i.e., plan a carpool and get hair cut less often. Price of something decreases and you buy more of it.*
 - SS 4.2.1.b Predict how producers would react if the profit from selling a good or service changed. *For example: You produce widgets and they have become very popular and the price is rising, what would you do – produce more. In a natural disaster, because of scarcity prices tend to rise for things like water and lumber, if you produced water and/or lumber, the increased price would incentivize you to get more of things where they were needed.*
- SS 4.2.2 Investigate various financial institutions in Nebraska and the reasons for people's spending and saving choices.
 - SS 4.2.2.a Identify financial institutions in the community and their purposes. *For example: a field trip to a bank/credit union or a representative to discuss how banks ensure your money is safe and how they loan money to help businesses grow and help people buy housing among other things.*
- SS 4.2.3 Investigate how resources are used to make other goods and produce services.
 - SS 4.2.3.a Give examples of human, natural, capital, and entrepreneurial resources used in making goods and services in Nebraska and the United States. *For example: human resources (labor), tools used in agriculture, laboratories, equipment, and machinery, game/video designers*
- SS 4.2.4 Identify and explain specialization and trade and why different regions produce different goods and services.
 - SS 4.2.4.a Compare Nebraska with different regions and the goods and services each region produces. *For example: beef, wheat, telemarketing, cotton, coal, beekeeping, tribal traditional art (beading)*
 - SS 4.2.4.b Discuss how technology has affected the specialization of Nebraska's economy and surrounding states. *For example: irrigation, agriculture and farm*

equipment, online trading, geospatial technology (GIS [Geographic Information Systems] and GPS [Global Positioning System])

5th Grade

- SS 5.2.3 Explain how human capital can be improved by education and training and thereby increase standards of living.
 - SS 5.2.3.a List examples of how additional education/training improves productivity and increases standards of living. *For example: On the job training, education can all lead to higher wages.*
- SS 5.2.4 Explain how specialization, division of labor, and technology increase productivity and interdependence.
 - SS 5.2.4.a Describe the historical role of innovation and entrepreneurship in a market economy. *For example: apprentice, journeyman, early inventors and entrepreneurs*
- SS 5.2.6 Summarize how specialization and trade impact the global market and relationships with other countries.
 - SS 5.2.6.a Describe how international trade promotes specialization and division of labor and increases the productivity of labor, output, and consumption. *For Example: New England specialized in ship building and fishing, South Carolina grew rice, the Middle Colonies had grain, and the Upper South grew tobacco and got finished goods like books from Great Britain.*
 - SS 5.2.6.b Explain how trade impacts relationships between countries. *For example: fur, tobacco, cotton, lumber, triangle trade, tribal trading with settlers*

6th Grade

- SS 6.2.1 Investigate how economic decisions affect the well-being of individuals and society.
 - SS 6.2.1.a Compare the benefits and costs of economic decisions made by Ancient Civilizations. *For example: marginal benefits of the migration of the Swahili people throughout southern Africa, Constantine the Great's decision to convert the Roman Empire to Christianity, Ancient Mesopotamians that settled along the Tigris and Euphrates to sustain life in a desert*
 - SS 6.2.1.b Examine how social and governmental decisions impact economic well-being. *For example: Under constant invasion, Chinese dynasties built the Great Wall. Europeans and Asians were able to establish trade through the Silk Road to attain resources not native to their own continents. The caste system of Ancient India established order in the government but at the sake of the liberty of those in lower castes. Use democratic process established in Greece to make a classroom decision.*
- SS 6.2.3 Explain the interdependence of producers and consumers.
 - SS 6.2.3.a Identify producers and consumers for Ancient civilizations. *For example: Examine the independence and interdependence of social classes in ancient societies. List items sold and traded among various medieval societies.*
 - SS 6.2.3.b Explain how the interaction between producers and consumers satisfied economic wants and needs. *For example: Research the various resources that were utilized as mediums of exchange like animals, cowry shells, gold, and porcelain. Examine how societies without currency differed from those with currency.*

7th Grade

- SS 7.2.4 Investigate how varying economic systems impact individuals in a civilization/society.
 - SS 7.2.4.a Compare and contrast characteristics of different socioeconomic groups in economic systems. *For example: traditional, market, command/communism, socialism, feudal, or caste systems - Examine the daily life of the indigenous people of Guatemala as opposed to those in urban areas.*

- SS 7.2.4.b Identify the relationships between diverse socio- economic groups and their economic systems in the modern world. *For example: Compare tax structures in various countries and how the people are impacted.*
- SS 7.2.5 Analyze information using appropriate data to draw conclusions about the total production, income, and economic growth in various economies.
 - SS 7.2.5.a Define the government's role in various economic systems. *For example: democratic governments' impact on capitalism and dictators' impact on command economies, tobacco industry and how rules come about in the US vs. tobacco industry in Cuba*
 - SS. 7.2.5.b Identify various economic indicators that governments use to measure modern world societies, nations, and cultures. *For example: Explore consumption, government spending, business investment, balance of trade, exports, imports, life expectancy, literacy rates, income, etc.*
 - SS 7.2.5.c Categorize goods and services provided in modern societies, nations, and cultures into the four factors of production. *For example: Identify the four factors of production (land, labor, capital, and entrepreneurship) and how they manifest in a diverse way from culture to culture and over time.*
- SS 7.2.6 Illustrate how international trade impacts individuals, organizations, and nations/societies.
 - SS 7.2.6.a Explain how individuals gain through specialization and voluntary trade and how international trade affects the domestic economy. *For example: Business owners are able to explore the world to find labor sources that help maximize profit. Many of the economies of the Americas owe their establishment and success to the development and processing of sugar cane. Corporations chartered for colonial settlement: Dutch East India Company, Virginia Company, etc.*

8th Grade - In 8th Grade, students take Personal Finance 8 in addition to the social studies standards.

- Personal Finance Course Description: Students will be introduced to finance vocabulary and will use terms to complete simulations where they will apply strategies to monitor income and expenses, plan for spending and save for future goals. The learning goal is to help students become financially responsible, conscientious members of society.
- SS 8.2.4 Justify and debate economic decisions made by North American societies.
 - SS 8.2.4.a Research the origins and development of the economic system, banks, and financial institutions in the United States. *For example: Examine the work of Alexander Hamilton and his influence on the banking system in the U.S. economy.*
 - SS 8.2.4.b Explain how tax revenues are collected and distributed. *For example: Review the Constitution to understand the roles of each branch in establishing a national budget and how the separation of powers is structured.*
 - SS 8.2.4.c Describe the progression of money and its role in early United States history. *For example: Identify what forms of currency/bartering were used as a medium for exchange among various Native American tribes. Examine what services and regulations were established during the Progressive Era as urban areas' populations boomed. Examine the National Banking Act of 1863.*

Personal Finance has been a graduation requirement for Schuyler Central High School since before the law was enacted. The standards covered in this course meet the graduation requirements.

BUS-201 Personal Finance Course Description

The goal of Personal Finance is to help students become financially responsible, conscientious members of society. To reach that end, this course develops student understanding and decision-making skills in such areas as income, money management, budgeting, financial goal attainment, the wise use of credit, insurance, and investments. Career Cluster: Finance, Business, Management, and Administration

Student Progress

School Year	Percent of Students Passing
2022 - 2023	86%
2023 - 2024	91%

**INTERLOCAL COOPERATION AGREEMENT
AND MEMORANDUM OF UNDERSTANDING BETWEEN
THE CITY OF SCHUYLER, NEBRASKA AND
SCHUYLER COMMUNITY SCHOOL DISTRICT**

This Interlocal Cooperation agreement and Memorandum of Understanding ("MOU") is made and entered as of the date fully executed below, by and between the **City of Schuyler, Nebraska, a Municipal Corporation**("SPD") and the Colfax County Schools District 10-0123, also known as Schuyler Community Schools ("School District").

WHEREAS, the School District and the SPD share the goal of promoting school safety and a positive school climate ;

WHEREAS, all parties acknowledge that crime prevention is most effective when the School District, SPD, parents, behavioral health professionals, and the community are working in a positive and collaborative manner;

WHEREAS, the School District and the SPD agree it is important to create a school environment in which conflicts are deescalated and students are provided developmentally appropriate and fair consequences for misbehavior that address the root causes of their misbehavior, while minimizing the loss of instruction time;

WHEREAS, the School District staff should generally not involve the SPD's School Resource Officer(s) ("SRO"), in enforcement of the School District's discipline policies;

WHEREAS, the School District and SPD recognize that student contact with SPD's SROs and the School District staff builds positive relationships leading to better student outcomes; and

WHEREAS, the School District and the SPD agree that student discipline practices and referrals to the juvenile justice system need to be closely monitored for fair and equitable treatment for all School District students.

NOW, THEREFORE, the School District and the SPD agree as follows:

Section 1. Purpose - Employment of the School Resource Officer

1. SPD agrees to employ and provide one full-time police officer to be assigned to the School District during the school year as an SRO pursuant to the terms of this MOU. It is clearly understood, acknowledged, and agreed to by the parties that the SRO is an employee of SPD, subject to the administration, supervision, and control of SPD.
2. SPD will furnish training, uniforms, equipment, and schedule of deployment required under Nebraska law or that is needed for the operation of this MOU. The School District shall coordinate with SPD to also provide the SRO with applicable training, supplies, and equipment needed for the operation of this MOU.
3. The SRO shall be subject to all personnel policies and practices of SPD, except as such policies or practices may be modified by the terms and conditions of this MOU.
4. SPD, in its sole discretion, shall have the power and authority to hire, replace and rotate, discharge, and discipline the SRO.
5. As an employee of SPD, the SRO will be subject to the chain of command of SPD.
6. If the School District Superintendent is dissatisfied with the SRO who has been assigned to the school, then the School District Superintendent may request that SPD assign a different law enforcement officer as the SRO for the school unless the nature of the concerns warrant immediate replacement, such a request should normally occur after the Superintendent has met with SPD to discuss concerns and allow a reasonable amount of time for SPD to remediate the issues. If mutually agreed by SPD and School District, SPD shall assign a new SRO to the school. SPD reserves the right to remove/reassign any SRO along with notification given to the Superintendent and the school board.

Section 2. Term

This MOU shall begin on August 12, 2024 and end December August 11, 2025. This MOU may be renewed for additional one-year periods upon mutual written agreement of the Parties.

Section 3. Contact Persons

The principal(s) at each participating school building shall be the School District's on-site contact person for any SRO assigned to that school building. In addition, the SRO Program liaison for the School District shall be the Superintendent, and for SPD shall be the Chief of Police.

Section 4. School Discipline and Law Enforcement Program Goals

The parties seek to:

1. Create a common understanding that (a) school administrators and teachers are ultimately responsible for school discipline and culture; (b) SROs should not be involved in the enforcement of school rules; and (c) a clear delineation of the roles and responsibilities of SROs as to student discipline is essential, and should include a regular review by all stakeholders;
2. Minimize student discipline issues so they do not become school-based to the juvenile justice system;
3. Promote effectiveness and accountability;
4. Provide training as available and appropriate to SROS and School District staff on effective strategies to work with students that align with program goals;
5. Employ accepted industry standards so that all students are treated impartially and without bias by SPD's SROS and the policies of SPD, and also by the School District staff in alignment with rules and procedures applicable to the School District's equity policies;
6. Utilize accepted industry standards for training and oversight with the goal of reducing any existing disproportionality

Section 5. Roles and Responsibilities regarding School Discipline

1. Disciplining students is the responsibility and authority of the School District. Law enforcement is the responsibility of SPD. The School District and SPD shall follow the principles in this MOU regarding the division between school discipline and law enforcement.
2. SPD can provide assistance when: (a) required by law under NEB. REV. STAT. §§ 79- 262 and 79-293 or other state or City/County/Security Agency law; (b) there is a threat to the safety of students, teachers, or public safety personnel; (c) to assist with victims of crime, missing persons, and persons in mental health crisis; (d) in an attempt to prevent criminal activity from occurring; (e) it is required as part of emergency management response; or (f) it is required or allowed by this MOU.

3. The SRO and school administrators will coordinate to differentiate between school disciplinary issues (school administrator responsibility) and criminal issues (SRO responsibility) and respond appropriately, de-escalating school-based incidents whenever possible.
4. The SRO should not act as a school disciplinarian. The School District staff should not involve the SRO in disputes that are related to issues of school discipline. However, the SRO may serve as a complement to school staff, provide education, or act in the role of a mentor, counselor, or trusted adult as herein provided. The SRO will be involved in school discipline when it pertains to certain criminal matters and preventing a disruption that would, if ignored, place students, school personnel, and others at risk of harm, so the SRO will resolve the problem to preserve the safe school climate. In all other cases, disciplining students for policy violations is a school responsibility.
5. The SRO shall confer with school administrators for student offenses that constitute a minor violation of the law. After consultation, a determination will be made as to whether such matters will be best handled by school administration or the SRO.
6. The SRO shall confer with school administrators on issues that do not involve a real and immediate threat to persons or to the public safety, such as public order offenses, including disorderly conduct, disturbance/disruption of schools or public assembly, trespass, loitering, and fighting that does not involve physical injury or a weapon. After consultation, a determination will be made as to whether such matters will be best handled by school administration or the SRO.
7. The SRO should not interview students or collect evidence for solely School District disciplinary purposes.
8. The SPD policy that addresses when a parent or guardian will be notified or present, if a student is subjected to questioning or interrogation by a School Resource Officer or other employee of SPD is [PR O 2307](#). The School District's policy that addresses when a parent or guardian will be notified or present if a student is subjected to questioning or interrogation by a school official or by an SRO in conjunction with a school official is [Policy 5022](#). The School District will make this information available to all parents or guardians in a language that such parent or guardian understands.
9. The SPD policy that addresses under what circumstances a student will be advised of constitutional rights prior to being questioned or interrogated by an SRO or other employee of SPD is [PR O 2307](#). The School District policy or regulation addressing students being advised of constitutional rights prior to being questioned or interrogated by a school official or by a SRO in conjunction with a school official is [Policy 3055 School Resource Officers](#).
10. The School [District policy required by NEB. REV. STAT. § 79-262](#) that addresses

the type or category of student conduct or actions that will be referred to law enforcement for prosecution and the type of student conduct or actions that will be resolved as a disciplinary matter by a school official and not subject to referral to law enforcement is **Policy 5035 Student Discipline**.

11. SPD shall keep records on each student referral by an SRO for prosecution in response to an incident occurring at school, on school grounds, or at a school-sponsored event and ensure that such records allow for analysis of related data and delineate: (a) The reason for such referral; and (b) Federally identified demographic characteristics of such student.
12. School Resource Officers of SPD will maintain confidentiality of all matters regarding the School District, staff, and student information as required by law or applicable policy.

Section 6. Duties of the School Resource Officer

1. The purpose of the SRO is to provide for and maintain a safe, healthy, and productive learning environment, emphasizing the use of restorative approaches to address negative behavior, while acting as a positive role model for students by working in a cooperative, proactive, problem-solving manner between SPD and the School District.
2. The SRO must build relationships, enhance community-policing activities, identify safety concerns within the schools, develop problem solving strategies with school administrators and staff, and collaboratively develop a comprehensive school safety plan with school administrators and staff.
3. The SRO shall attend and participate in applicable school meetings and to communicate and coordinate with the school principals, superintendent, and other appropriate school personnel concerning the needs of the school and its students.
4. In coordination with school administrators, the SRO may provide presentations to the school in safety, crime prevention, bullying, sexting, digital citizenship, etc., and may also provide additional services to the school if requested.
5. SPD and the SRO will work closely with School District officials to improve the social and behavioral skills of students in order to maximize their ability to achieve academically and become successful, contributing citizens. Issues to be addressed may include substance abuse, violence reduction, social skills, problem-solving skills, and other areas of School District and community concern.
6. SPD and School District understand that the SRO may use measures to secure school property as followed through established protocols of SPD's Police Department and the School District in the event of an emergency situation that requires the activation of emergency response procedures (i.e., critical incident protocols such as "lock down" and "secure").

7. The SRO will be a visible, active law enforcement figure dealing with the school's law enforcement matters at school and at school activities and events.
8. The SRO shall initiate positive interaction with students in the classroom and general areas of the school campus to promote the profession of police officers and be a positive role model, while increasing the visibility and accessibility of police to the school community.
9. The SRO will share information with the school's administrators about persons and conditions pertaining to school campus safety concerns to the extent allowed by law and SPD's Police Department policies.
10. The SRO may assist with resolving law enforcement issues that affect the students, the school, the School District, or the broader community. However, matters that are not of a significant or urgent nature or do not directly relate to the students, the school, the School District, or to issues concerning child abuse or neglect, but only concern the broader community, should first be coordinated between school administration and law enforcement before being conducted at the school in order to minimize the effect on student education and the school environment. Outside law enforcement agencies shall first coordinate with school administration.
11. The SRO shall notify school administration upon removing a student from the school campus.
12. The SRO shall notify a parent as soon as possible when minor students are issued a criminal citation or arrested.
13. If a student arrest is warranted, the SRO shall use the least disruptive and the least obtrusive manner reasonably available to conduct the arrest of the student. The SRO should be accompanied by a school principal or other School District administrator, if available, when arresting a student unless exigent circumstances require otherwise for the safety of the student, the SRO, and/or others.
14. The SRO shall not use physical force or restraints on a student, including handcuffs, Tasers, mace, or other physical or chemical restraints unless a student's actions pose a threat or they are subject to arrest.
15. The SRO shall question students in a manner and a time when it has the least impact on the student's education so long as the delay in questioning does not interfere with the effectiveness of an investigation, the disappearance or unavailability of a criminal suspect or evidence, or risk public safety or significant damage to property.
16. The SRO shall become familiar with School District's student conduct and discipline policies.
17. SPD and School District may coordinate and jointly fund other beneficial training opportunities for the SRO and school administrators.

Section 7. Duties of School Administrators

1. School administrators shall provide the SPD with appropriate school administrator names and contact information to facilitate communication.
2. School administrators shall provide an office/storage or workspace for the SRO's materials and personal effects.
3. School administrators shall provide a classroom, equipment, and supplies for classes or other training as discussed in this MOU provided by the SRO, if any .
4. School administrators will arrange meetings with the SRO as needed by the school administration.
5. School Administrators and the SRO will coordinate to differentiate between school disciplinary issues (school administrator responsibility) and criminal issues (SRO responsibility) and respond appropriately, deescalating school-based incidents whenever possible.
6. School administrators shall confer with the SRO for student offenses that constitute a minor violation of the law. After consultation, a determination will be made as to whether such matters will be best handled by school administration or the SRO.
7. School administrators shall confer with the SRO on issues that do not involve a real and immediate threat to persons or to the public safety, such as public order offenses, including disorderly conduct, disturbance/disruption of schools or public assembly, trespass, loitering, and fighting that does not involve physical injury or a weapon. After consultation, a determination will be made as to whether such matters will be best handled by school administration or the SRO.
8. School administrators will make an effort to handle routine student conduct and disciplinary matters without involving the SRO in a law enforcement capacity, unless it is absolutely necessary or required by law.
9. School administrators will facilitate SRO-initiated investigations and actions.
10. School administrators will provide ongoing feedback to the SPD for SRO evaluation purposes.
11. School administrators should notify the SRO responding to a school-based infraction if any student involved has a disability with an accompanying Individualized Education Program ("IEP"), Section 504 Plan, or Health

Care Plan, and who therefore may require special treatment or accommodations to the extent such notice is permitted by law.

12. The School District acknowledges that the SRO is required by SPD policies and procedures to attend mandatory training and/or meetings.
13. If applicable and deemed necessary, school administrators will provide opportunities for the SRO and school administration to meet with parents and community members during the school year.
14. SPD and School District may coordinate and jointly fund and provide other beneficial training opportunities for the SRO and school administrators.

Section 8. Student Rights

SRO Search and Seizure

1. The SRO may conduct or participate in a search of a student's person, school locker, personal belongings, electronic devices, or vehicle only where there is "probable cause" to believe that the search will turn up evidence that the student has committed or is committing a criminal offense.
2. It is recommended that in addition to having probable cause, the SRO should follow state and federal law and the SPD policies and procedures when conducting searches of persons and property which may require a search warrant.
3. Except in the event of exigent circumstances, the SRO shall inform school administrators prior to conducting a "probable cause" search where practicable.
4. The SRO shall not ask school administrators to search a student's person, school locker, personal belongings, electronic devices, or vehicle in an effort to circumvent the student's legal rights and protections.
- 5.

School Administrators Search and Seizure

1. A school administrator may conduct a search of a student's person, personal belongings, electronic devices, or vehicle in accordance with the "reasonable suspicion" legal standards.
2. Absent a real and immediate threat to any person or to the public safety, a school administrator shall not ask the SRO to be present or participate in a search when no probable cause has been established.
3. Strip searches of students by school administrators are prohibited.

Student Questioning

1. SRO. The SRO may question a student as provided in School District policy 3055 - School Resource Officers and/or 5022 Investigations, Arrests, and Other Student Contact by Law Enforcement and Health and Human Services.
2. School Administrators - Student Interviews and Questioning: School administrators are free to communicate, interview, and question students for any academic and non-academic matters, including, but not limited to, issues relating to school and student safety, policy compliance and violations, student discipline, etc.

Access to Education

Records

1. School administrators shall allow the SRO to inspect and copy any public records, including student "directory information, maintained by the school to the extent allowed by state and federal law and School District policy.
2. If some information in a student's educational record is needed in an emergency to protect the health or safety of the student or others, school administrators shall disclose to the SRO the information that is needed to respond to the emergency situation based on: (i) the seriousness of the threat to the health or safety of an individual; (ii) the need of the information to meet the emergency situation; and (iii) the extent to which time is of the essence.
3. If the SRO needs confidential student educational record information, but no emergency situation exists, the information may be disclosed only as allowed by applicable state and federal law.
4. Notwithstanding any provision to the contrary within this Agreement, the Parties shall fully comply with the requirements of NEB. REV. STAT. § 79-2,104 or any other state or federal law or regulation, including Family Educational Rights and Privacy Act of 1974 (FERPA) (20 U.S.C. 1232g), and its implementing regulations (34 C.F.R. Part 99), regarding the confidentiality of student information and records. All SPD requests for student records made to the School District shall be in compliance with this provision. SPD represents, warrants, and agrees that it will: (1) hold the student records in strict confidence and will not use or disclose student records except as (a) permitted or required by this Agreement, (b) required by law, or (c) otherwise authorized by the School District in writing. At the request of the School District, SPD agrees to provide the School District with a written report of the student records and information disclosed to third parties if allowed by state statute regarding juvenile records and sealed case files. A breach of these

confidentiality requirements shall constitute grounds for the immediate termination of this MOU.

Section 9. Training

1. Within six months of being assigned as SROS to the School District, each SRO shall have completed a minimum of twenty hours of training focused on school-based law enforcement, including but not limited to, coursework focused on school law, student rights, understanding special needs of students and students with disabilities, conflict de-escalation techniques, ethics for school resource officers, teenage brain development, adolescent behavior, implicit bias training, diversity and cultural awareness, trauma-informed responses, and preventing violence in school settings. Assignments as an SRO that do not meet the definition of "school resource officer" found at NEB. REV. STAT. § 79-2702 are not subject to the requirements of this MOU, but the use of such assignments should not be used to circumvent the training requirements set forth in this paragraph.
2. Within six months of an SRO being assigned to a school building, a minimum of one administrator in each elementary and secondary school building will have completed a minimum of twenty hours of training, excluding previous college coursework, focused on school-based law enforcement, including, but not limited to course work focused on school law, student rights, understanding special needs of students and students with disabilities, conflict de-escalation techniques, ethics, teenage brain development, adolescent behavior, implicit bias training, diversity and cultural awareness, trauma-informed responses, restorative justice, and preventing violence in school settings.

Section 10. Program Review

1. The SPD student and parent complaint process or policy to express a concern or file a complaint about an SRO and the practice of the SRO with the SPD is (this needs to align with our policy on Complaint Procedure). The School District's student and parent complaint policy to express a concern or file a complaint about an SRO and the practice of the SRO with the SPD is Policy PR-M 1214.
2. The School District, in collaboration with the SPD, shall conduct an annual review of the program and shall: (a) make modifications as necessary to accomplish stated program goals; and (b) create a report of the review to be provided to both parties and, to the extent permitted by law, made available online. The parties will establish an evaluation process, to include community stakeholders, as part of the regular review of program goals and relevant

data, including the specific measures, data points, and metrics included in the report. The first of the annual report will be for the first full school year following the formation of this MOU.

Section 11. Community Partnerships

The School District and SPD shall continue to collaborate with community and governmental agencies to further program goals, support strategies to divert students from the criminal justice system, and access additional support services for students.

Section 12. Payment

The costs for SRO is attached as exhibit A. SPD shall invoice the School District for SRO services rendered under this MOU semi-annually as indicated in Exhibit A. The School District shall make payment for SRO services within thirty (30) days of its receipt of an invoice from SPD. This intent and goal of this shared payment plan is to split the cost of the SRO between the School District and the SPD with the goal and understanding that time will be split between both entities.

Section 13. Body Worn Cameras (BWCs)

All parties agree that any use of BWCS by SROS must be subject to and in compliance with federal, state, and local laws and regulations regarding their use and operation. SPD shall use its best efforts to notify the School District at least two weeks before its officers assigned to the School District are to begin use of BWCs, and it will provide written information and training to the building principals and superintendent of the schools in which the officers may enter. Training shall include the objectives and procedures for the use of BWCs in public and in schools. Every SRO equipped with a BWC shall be trained in the operation of the equipment prior to its use. To maximize the effectiveness of the BWC and the integrity of the video documentation, SROS shall adhere to the objectives and procedures outlined in this MOU and SPD's general operations orders or similar policies or procedures when they utilize BWCs. SPD may, if not otherwise prohibited by law, provide to the School District copies of any such filming of students, parents, employees, or others upon school property, upon request for such copies by the School District, as a law enforcement record. In the event that SPD receives advice that providing a copy of such video is prohibited, SPD agrees to utilize its best efforts to facilitate the availability of its officer(s) that made the video to testify, upon request by the

School District, in any school disciplinary hearing concerning his/her/their knowledge of the facts and circumstances of the videoed incident. Any such film or video taken by, and kept in the possession of SPD may be considered law enforcement records under the Family Educational Rights and Privacy Act (FERPA), 20 U.S.C. sec. 1232g and 34 C.F.R. Sec. 99.8. Any copy of such film or video, if permitted by law to be provided to the School District, may become an educational record of the District. SPD's officers shall at all times recognize and comply with the confidentiality of student and education records and may only seek such records in accordance with the requirements of School District policy and state and federal law.

Section 14. Nondiscrimination

The Parties shall not discriminate against any employee or applicant who is to be employed for performance of this MOU with respect to his or her hire, tenure, terms, conditions, or privileges of employment, because of his race, color, religion, sex, disability, or national origin.

Section 15. Employment Eligibility Verification

The Parties shall use a federal immigration verification system to determine the work eligibility status of employees hired on or after October 1, 2009 and who are physically performing services within the State of Nebraska. If a party employs or contracts with any subcontractor in connection with this MOU, the contracting party shall include a provision in the contract requiring the subcontractor to use a federal immigration verification system to determine the work eligibility status of new employees physically performing services within the State of Nebraska.

Section 16. Termination

Either party may terminate this MOU for any or no reason and at any time by giving the other party at least one-hundred eighty (180) days prior written notice of the same. Any joint funds or property in possession of the Parties as a result of this MOU shall be divided and distributed to the party that contributed it or funded its purchases.

Section 17. Appropriation of Funds

The Parties' obligations under this MOU are expressly subject to the appropriation of funds by the School District's Board of Education and SPD's governing authority. Further, in the event that funds are not appropriated in whole or in part sufficient for performance of the obligations under this MOU, the parties may terminate this MOU.

Section 18. Default

A party shall be in default under this MOU if it breaches, defaults on or otherwise fails to perform or satisfy any agreement, obligation, term, covenant, condition or provision set forth herein or arising hereunder, and such breach, default or failure to perform continues for a period of thirty (30) days after the party receives written notice of such breach or failure to perform from the other party; or, if such breach cannot reasonably be cured within such 30- day period, and the breaching party fails to commence to cure such breach within such thirty (30) days after notice from the non-breaching party or fails to proceed diligently to cure such breach within a reasonable time thereafter. Upon default by a party, the remaining parties may pursue any remedy provided by law.

Section 19. Liability Insurance

Each party shall obtain and pay for its own liability insurance coverage for their participation in this MOU. The minimum coverage under such insurance shall be \$1,000,000 for one accident and \$5,000,000 in the aggregate.

Section 20. Notice

Each Party giving any Notice ("Notice") under this MOU must give written Notice by personal delivery, registered or certified mail (in each case, return receipt requested and postage prepaid), or electronic mail to the School District's superintendent at the e-mail address on file with the Nebraska Department of Education and to SPD at 120 W. 20th St. Schuyler, NE. Notice is effective only if the party giving the Notice has complied with this section.

Section 21. Indemnification

To the extent permitted by applicable law, but without waiving any rights under any applicable state governmental immunity act or constitutional provision, each party agrees to indemnify, defend, and hold harmless the other party from and against any loss, cost, or damage of any kind (including reasonable outside attorneys' fees) to the extent arising out of its breach of this Agreement, and/or its negligence or willful misconduct.

Section 22. No Third-Party Beneficiaries

This MOU does not and is not intended to confer any rights or remedies upon any person other than the Parties.

Section 23. Independent Contractor

The Parties to this agreement shall at all times be acting in the capacity of independent contractors and not as an officer, employee or agent of one another. Neither party nor its respective agents, employees, subcontractors, or assignees shall represent to others that it has the authority to bind the other party unless specifically authorized in writing to do so. SPD shall at all times be responsible for all aspects of the employment, control, and direction of SROS assigned under this MOU. Nothing within this MOU is intended to create an agency or employment relationship between the School District and any officer assigned by SPD to participate in the SRO Program. All compensation, wages, salaries, benefits and other emoluments of employment payable to the SROS shall be the sole responsibility of SPD. No right to School District retirement, leave benefits, or any other benefits of School District employees shall exist as a result of the performance of any duties or responsibilities under this MOU. The School District shall not be responsible for social security, withholding taxes, contributions to unemployment compensation funds, or insurance for SPD's officers, employees, agents, subcontractors, or assignees.

Section 24. Amendments and Modifications

The Parties may amend or modify this MOU only by a signed, written unanimous agreement that identifies itself as an amendment or modification to this MOU. No other alterations in the terms of this agreement shall be valid or binding.

Section 25. Severability

If any provision of this MOU is determined to be unenforceable, the remaining provisions of this MOU remain in full force, if the essential terms and conditions of this MOU for each

party remain enforceable.

Section 26. Counterparts

The Parties may execute this MOU in multiple counterparts, each of which constitutes an original, and all of which, collectively, constitute only one agreement. The signatures of all of the Parties need not appear on the same counterpart, and delivery of an executed counterpart signature page by facsimile or other electronic means is as effective as executing and delivering this MOU in the presence of the other Parties to this MOU. This MOU is effective upon delivery of one executed counterpart from each party to the other party. In proving this MOU, a party must produce or account only for the executed counterpart of the party to be charged.

Section 27. Assignment

The Parties shall not assign or otherwise dispose of this MOU or any duty, right, or responsibility contemplated in this MOU to any other person or entity without the previous written consent of the other Parties.

Section 28. Publication and Posting

Within three months of the adoption of this MOU, the School District's Superintendent shall provide a copy of it to the Nebraska Department of Education and post it on the School District's website. If any change is made to this MOU, the School District's Superintendent shall provide an updated copy of the MOU to the Nebraska Department of Education and post a copy on the School District's website no later than January 1st of the following year.

Section 29. No Separate Legal Entity. This Agreement does not establish a separate legal or joint entity.

Section 30. Administration. The School District's Superintendent and SPD's Police Chief ("Administrators") shall be responsible for jointly administering the cooperative undertaking described in this Agreement. The Administrators may take any action authorized, either explicitly or implicitly, by the Interlocal Cooperation Act, including any action that may be necessary to perform the duties and functions as provided in this Agreement.

Section 31. Manner of Acquiring, Holding, and Disposing of Real and Personal Property. The Parties do not anticipate a need to acquire, hold, or dispose of real or

personal property to accomplish the purposes of this Agreement. The Parties' respective governing boards shall determine the manner of acquiring, holding, or disposing of real or personal property in the event that such a need arises.

Section 32. Financing and Budgeting . Each party will budget separately to pay the costs and expenses that it will reasonably and necessarily incur to fulfill its obligations under this agreement.

Section 33. Taxes. This Agreement does not grant the school districts any authority to levy, collect, or account for any tax authorized under sections 13-318 through 13-326 or 13-2813 through 13-2816.

Section 34. Reservation of Rights. Each party reserves the right to enforce its own rights, obligations, or benefits of this Agreement.

Section 35. Entire MOU

The MOU is the complete and exclusive expression of the Parties' agreement on the matters contained in this MOU. All prior and contemporaneous negotiations and agreements between the Parties on the matters contained in this MOU are expressly merged into and superseded by this MOU.

*Estimated Cost of SRO Position in Total = \$90,000

*This would be split 50/50 between the city and district.

Minutes from November 4, 2024 Foundation Meeting

Members present: Sheri Balak, Joyce Baumert, Victor Lopez, Nina Lanuza, Amanda Jedlicka and Dr. Schroder

Members absent: Brian Vavricek

Student Council Board Report

November 2024

Student Council

- Participated in Trunk or Treat
- Oct 24

Student Council

- Showed appreciation to our Custodial Staff on October 2nd by giving them thank yous and homemade cookies!
- Celebrated our High School Coaching Staff on October 7th (October 6th is National Coaches Day) by giving handwritten thank you notes and a powerade
- Hispanic Heritage Month - Door Decorating Competition

NHS

- Members will be helping at The Center in town to serve our community members their Thanksgiving Dinner on Nov. 27.
- We will have our first blood drive of the school year on Dec. 9 at Schuyler Central High School Auditorium.
 - If you are interested in donating blood please let Mrs. Staci Shonka or Ms. Elizabeth Lickie know
 - Information is on our school website and social media.

FCCLA

- Schuyler FCCLA had our first chapter meeting on Wednesday, Sept. 4th.
- The chapter is excited about hosting District competitive events here in January!
- We took ten members to Fall Leadership Workshop at UNL on Sept. 25th
- We are taking six members to District Leadership Conference on Oct. 11th

Cross Country

- Girls cross country qualified as a team for state for the first time since 1999.
- The girls competed well at state with everyone setting personal bests and the team finishing 12th out of 32 teams in the state.
- Boys were in an incredibly tough district and, unfortunately, did not qualify any athletes.

Volleyball

-We picked up an awesome win against Ralston on Parent's night.

-The girls have been working incredibly hard and have shown so much growth and dedication over this season. We are pushing to peak and play our best volleyball in the weeks to come as we move toward conference and sub district tournaments.

-I am grateful for all the support we had at our home games this season from parents, district staff, and the community. It makes a huge difference to have a home gym full of people and we greatly appreciate all the support.

Football

Picked up a win against Omaha Brownell Talbot on September 20th.

Ladies Golf

-Two ladies medaled at the Beemer JV Invite.

-As a team, 18 hole averages have dropped by 23 strokes over the course of the season!

-Three varsity team members set their personal bests at districts!!!

-All girls will be back next season!
(No seniors this year)

Speech

- We have a solid start to piece selection for our speech team this year!
- Each of our events have between 4-5 participants signed up.
- Coaches have selected 4 students as a Speech Leadership team to help guide new members in practices and at meets when coaches are unavailable. These 4 students are also finding ways to promote and support team members
 - Honoring achievements in both performances and practice
 - Discussing ways to improve student body support at meets
- The 2025 Speech Season has been selected
- Schuyler Central High School will host Districts on Saturday, March 22

2025 Speech Season

Dec. 20th	@	Lincoln Southeast
Jan. 11th	@	Doane University
Jan. 17th	@	Elkhorn High
Jan. 18th	@	Raymond Central
Jan. 25th	@	Scotus Central Catholic
Jan. 31st	@	Lincoln Northeast
Feb. 1st	@	Millard West
Feb. 8th	@	Aurora
Feb. 15th	@	David City
Feb. 21st	@	Schuyler
Feb. 22	@	Battle Creek
Mar. 1st	@	Grand Island Northwest *Conference Speech
Mar. 8th	@	Logan View
Mar. 22	@	Schuyler *District Speech
Mar. 26th	@	Kearney *State Speech

One-Act

- The 4th Annual SCHS Festival went well! We are so thankful to see staff, students, and community members join to watch our show!
- We had 10 students selected for their outstanding performances from our show.
- Throughout the day, judges, students, and coaches from other schools complimented us on how helpful our students were and how amazing our theatre is.
- SCHS competes next at York's Festival on Nov. 9th.

FFA

- State Fair Results
 - Allison Vavricek
 - Grand Champion
 - Addison Vavricek
 - Reserve Champion Market Goat
 - Grand Champion Lightweight Market Goat
- Greenhand Day
 - 23 students got the opportunity to attend CDE Bootcamp at CCC in Columbus
 - Students got to experience different FFA contests

Classrooms

- Mrs. McKenney's Broadcasting and Media Production class created the starter graphics for the scoreboard and are practicing how to fly a drone for commercial photos and videos.
- HS FCS classes have made chocolate chunk cookies, enchiladas from scratch, and omelettes

- Digital Media made some awesome posters highlighting those students that rocked the MAPs tests.

County Government Day

17 Students from the Junior American Government class attended County Government Day Oct 28 at the Colfax County Courthouse. Students were able to tour the building and here from Elected officials and enjoyed lunch at the Eagles.

SCS Band and Choirs

Our marching band season just finished. We saw improvements each time we performed and at our last football game, Mr. Phillips, a former SCHS band teacher, came and gave us some great advice on how to improve as not only a marching band but also during our concert band season.

Omar Barrios made it into the ALL-STATE Orchestra as at trumpet 1. This is equivalent to going to state in any sport and he received the top trumpet spot in all of the ensembles

Our 7/8th grade choir went to a choir festival in Tilden, NE and performed a concert with 200 other Middle School students!

COMING UP:

- All-State Orchestra- November 20-22nd
- Veterans Day Program- November 11th
- UNO BOCH FESTIVAL Auditions- Nov. 20th
- Christmas Concert- December 16th @ 7pm

Tilden Choir Festival

SCHS Kitchen

The kitchen is trying new items to get the children to come in and eat breakfast. Like ice coffee, fruit smoothies, different yogurt parfaits, and, different bread flavors: banana, pumpkin, and chocolate. We will be making a strawberry shortcake that is made with a ring donut. We try to have 4 to 6 different options each morning.

Lunch: We have several grab and go options. The newest is the cottage cheese dip and Cheesy Dill dip which is similar to ham roll-up. Those are added to the Ham, Turkey, or sunbutter options. We also have a yogurt grab and go. We have made Chicken Pozole Verde from scratch. We tried a new pizza that the kids were saying in the lunch line that it looked like Pizza Hut's pizza. We also on certain days add a second hot meal for the students to choose from. Like hamburgers, breaded chicken sandwich, steak sandwich, mini corndogs/fries.

Most everyday we offer a flavored water out on the counter for everyone's access.

We are always looking for feed back or new ideas.

Science and Math Club Quiz Bowl

First competition for Quiz Bowl was held November 1 at Central City. We won 2 rounds and made it semifinals. More competition to come.

Mr Sayer (Coach)
